Declaration of compliance with EU Directive 2011/65/EU (RoHS)

HUBER+SUHNER is a leading global supplier of components and systems for electrical and optical connectivity. Products of HUBER+SUHNER are often directly installed in electrical and electronic equipment.

HUBER+SUHNER are aware that the EU directive 2011/65/EU (RoHS) (including 2015/863 and 2017/2102) is limiting the use of certain hazardous substances in electric and electronic equipment.

In particular the following substances are listed:

1. Mercury
2. Chromium VI
3. Cadmium
4. Flame retardants and plasticizers PBB, PBDE, DEHP, BBP, DBP, DIBP
5. Lead

The following statement regarding compliance of our products with EU directive 2011/65/EU (RoHS) is based on our actual research and inquiries to our suppliers:

- The content of above mentioned substances in our products are not exceeding the limits as defined in the RoHS Directive.
- HUBER+SUHNER is systematically using lead-free soldering materials, unless the specific customer, the primarily intended application (e.g. some HUBER+SUHNER Astrolab products for which ROHS compliance are available on request) or technical reasons (e.g. products for space and defense applications) require other, lead-containing soldering materials.
- The RoHS status of many of our products is listed on data sheets in catalogues or in our product data base (see <http://ecatalog.hubersuhner.com>). To find out about the RoHS compliance of individual products, please contact your local sales representative.

Best regards

Oliver Srb
