The HUBER+SUHNER position to its suppliers and customers regarding REACH (Regulation (EC) 1907/2006)

Dear Ladies and Gentlemen,

REACH is an EU law on chemicals and their safe use. It deals with the Registration, Evaluation, Authorization and Restriction of Chemicals. According to REACH, most chemicals (chemical substances) must be pre-registered.

The HUBER+SUHNER REACH strategy

As downstream user, HUBER+SUHNER does not register any substances or notify the European Chemical Agency (ECHA) for any of the used substances.

We therefore insist that the suppliers pre-register under REACH all substances manufactured or imported in the EU. The suppliers are equally responsible to manage their supply chain accordingly and ensure that their own suppliers act according to REACH as well.

HUBER+SUHNER only supplies:

- Substances, preparations and articles that are registered under REACH.
- Materials and articles which do not contain any substances of very high concern in the ECHA list (published on 16 July 2019 in accordance with Art. 59(10) of the REACH Regulation; exceptions see page 2).
- Materials and articles that are not listed under REACH Annex XIV.
- Materials and articles that are not listed under REACH Annex XVII.

HUBER+SUHNER regularly screens the supply base against above requirements.

Exceptions:

1. Piezo-ceramic components used within products of HUBER+SUHNER Polatis may contain more than 0.1% Lead Zirconate Titanate (PZT, CAS no.12626-81-2, EC no.235-727-4) which is listed as SVHC of REACH regulation (reg.no.01-2119615559-31). Detailed information can be found on the product specification.
2. RADOX® LF cables for Automotive and Industrial applications of HUBER+SUHNER may contain more than 0.1% of the Chlorine containing flame retardant CAS no. 13560-89-9, EC no. 236-948-9 (reg.no. 01-2119978271-33-0001), which is listed as SVHC.
3. Lead (CAS no.7439-92-1) is listed as SVHC since June 2018. This is affecting manufacturers, importers and suppliers of a wide variety of products that consist of lead containing alloys.

At HUBER+SUHNER, this mainly affects RoHS-compliant products (exempted application 6(c), "Copper alloy containing up to 4 % lead by weight", Annex III to Directive 2011/65/EU), which contain high melting or machinable alloys.

When used for the intended purpose, these products do not pose a health risk.

For detailed information if your HUBER+SUHNER product is affected by one of the exceptions above, please contact the closest HUBER+SUHNER subsidiary as listed in the table below.

Your Region	Your contact person
Germany, Austria, Switzerland	Peter.Rambau@hubersuhner.com
Eastern and Southern Europe, Africa, France and Russia	Reto.Germann@hubersuhner.com
Australia, India, Bangladesh, Bhutan, Maldives, Sri Lanka, Malaysia, Singapore, Thailand, and Indonesia	Nikhil.Wason@hubersuhner.com
