HUBER+SUHNER

Connect your data center to growth

Your data center serves as the operating core of networked-based services for your company. As such, it must guarantee stable operations and answer to high demands on uptime, speed, security and quality. And in a world where new technologies such as IoT, virtual reality and Industry 4.0 are on the rise, the data center must quickly scale up to offer room to grow.

HUBER+SUHNER offers the passive fiber optic equipment and solutions needed to build a strong and scalable physical layer that lasts. Our technical consultants support you in doing more with less space by designing and setting up an immaculate system that delivers optimal performance – today and in the future.

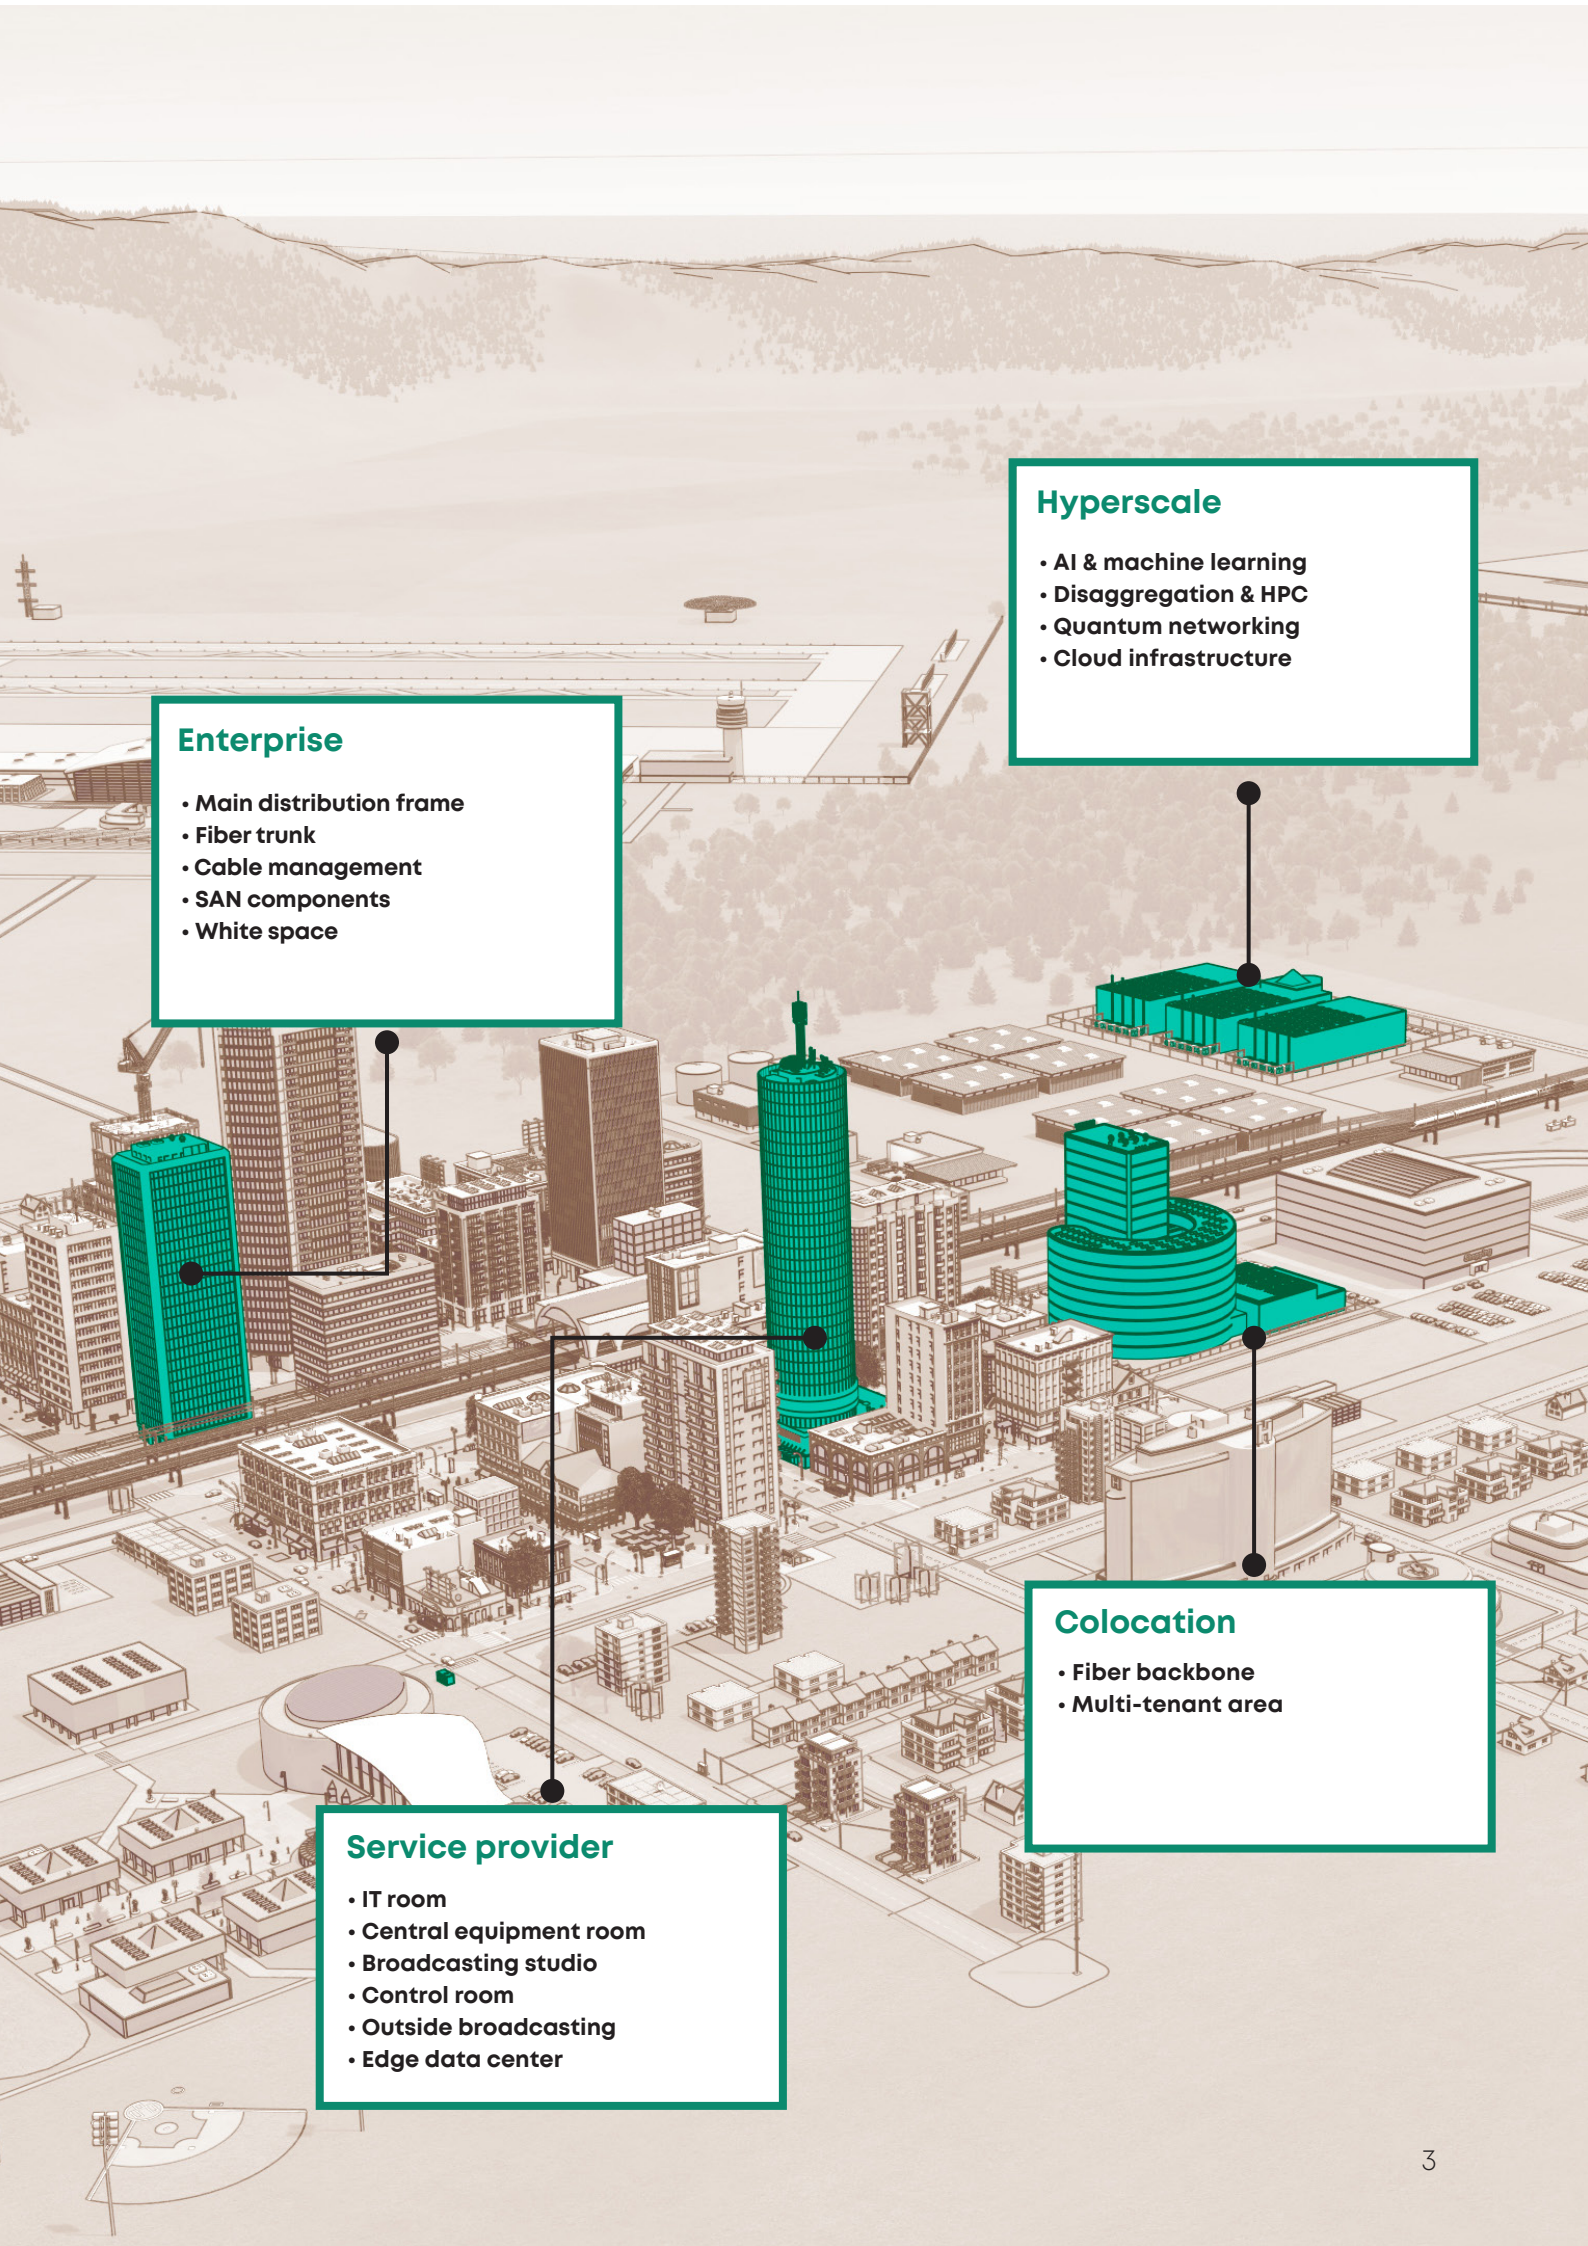

Structure
Set up your data center with fiber optic equipment that makes the most out of available space and requires less manual operation.

Enhance
By fully structuring your data center, you will free up crucial space and valuable time that you can redirect to enhance your current offering.

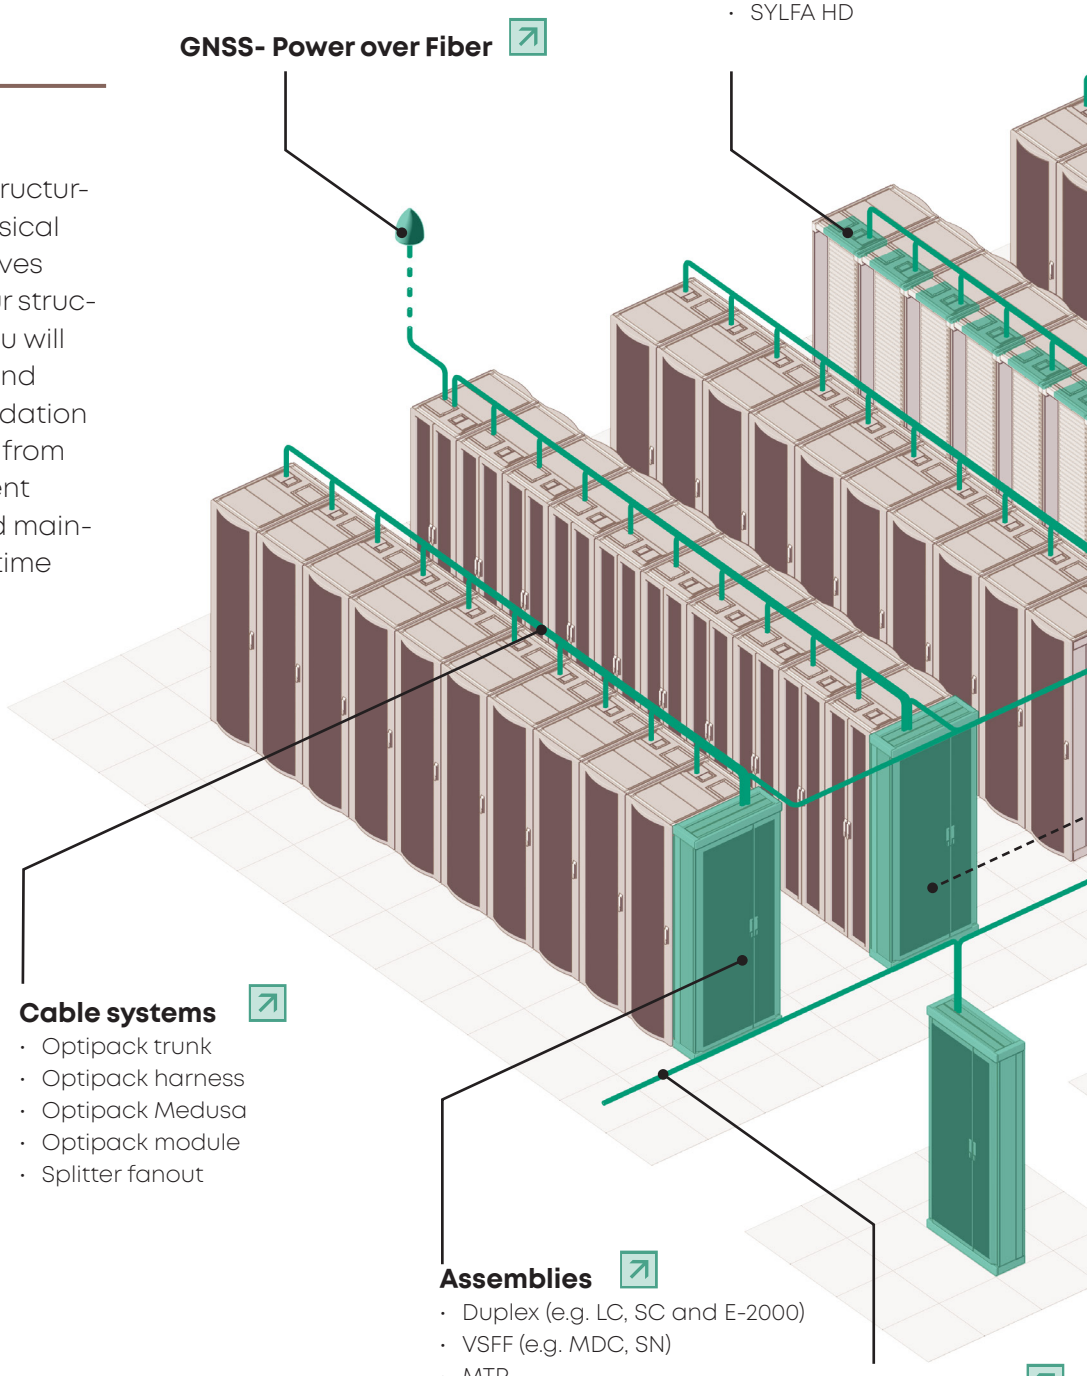

Drive
With a fast, secure and efficient system, you can focus on new investments and revenue-driving activities.

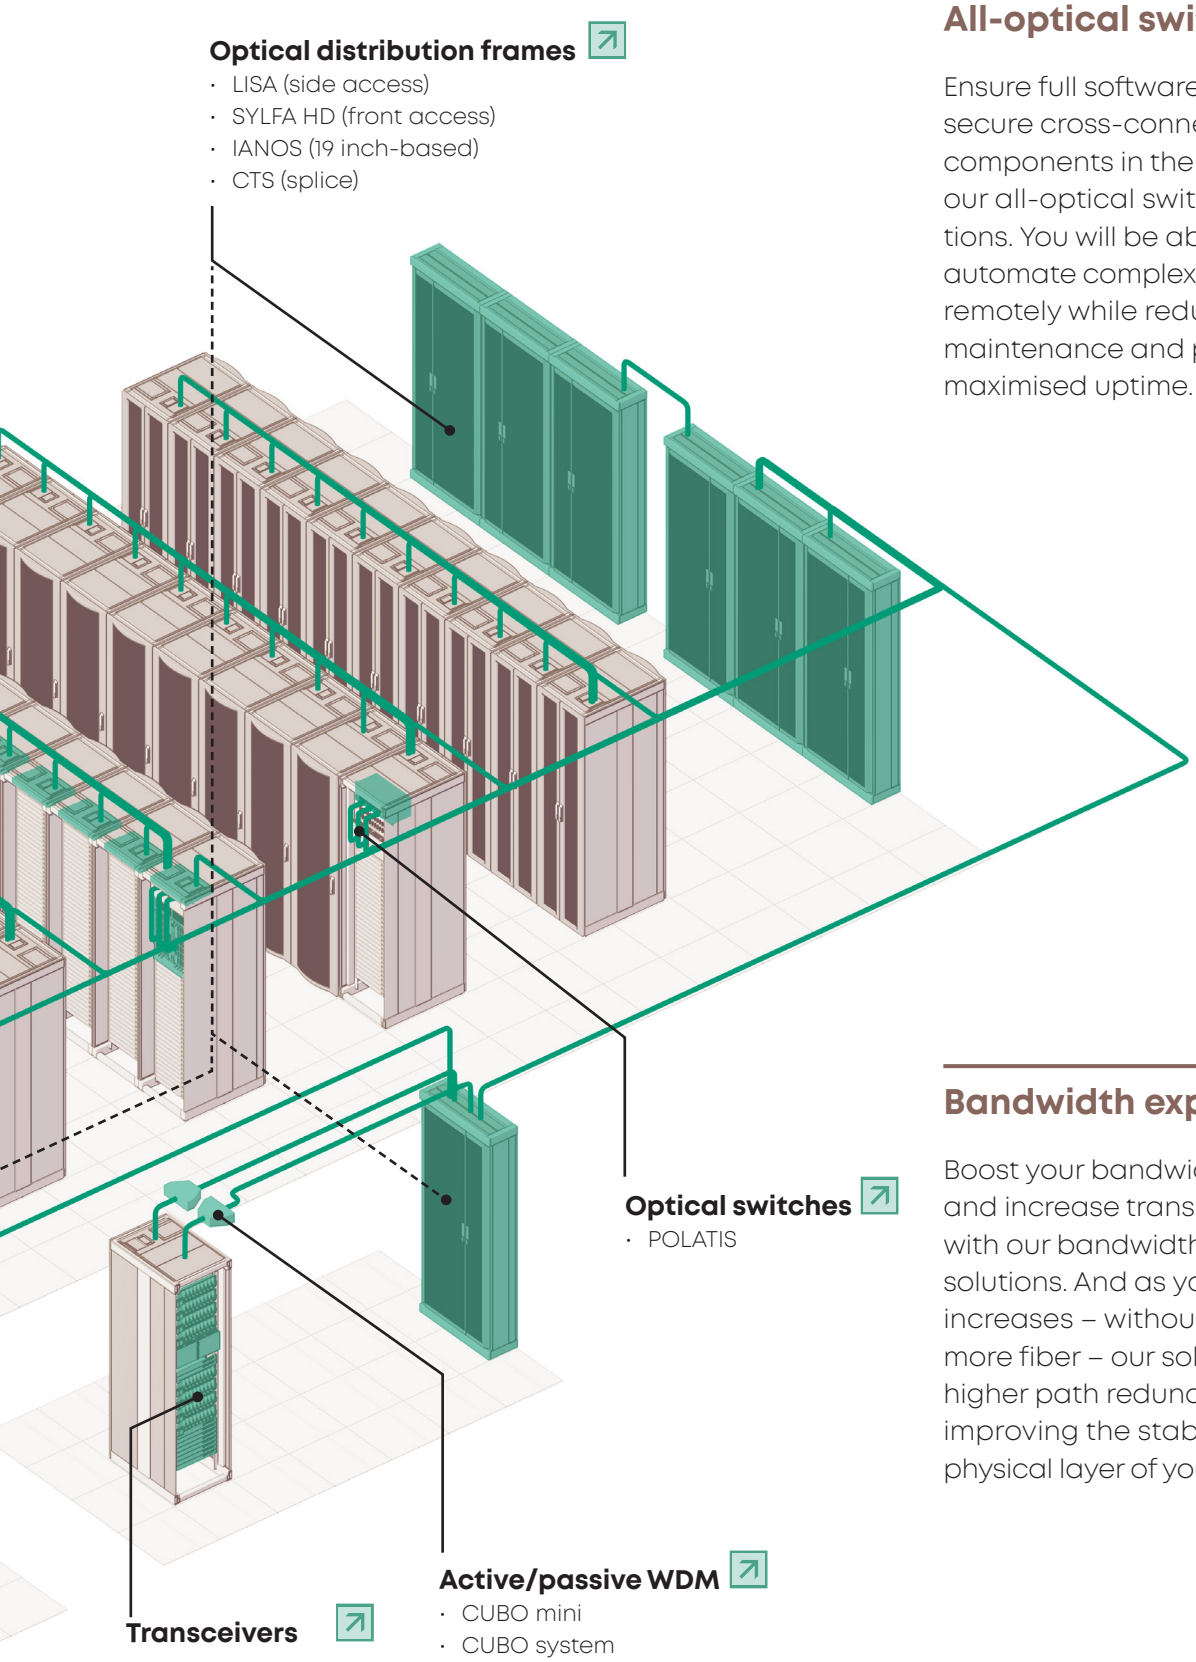

Hyperscale
• AI & machine learning
• Disaggregation & HPC
• Quantum networking
• Cloud infrastructure
Enterprise
• Main distribution frame
• Fiber trunk
• Cable management
• SAN components
• White space
Colocation
• Fiber backbone
• Multi-tenant area
Service provider
• IT room
• Central equipment room
• Broadcasting studio
• Control room
• Outside broadcasting
• Edge data center

Within our data center portfolio, we offer structured cabling, all-optical switching and bandwidth expansion solutions that work together to ensure a strong, stable and lasting physical layer.

Structured cabling

Save space and time by structuring your data center's physical layer with cabling that leaves nothing to chance. With our structured cabling solutions, you will set up a strong, efficient and scalable data center foundation once. You will then benefit from maximised uptime, excellent performance and reduced maintenance needs for a long time to come.

All-optical switching

Ensure full software control and secure cross-connects of network components in the fiber layer with our all-optical switching solutions. You will be able to efficiently automate complex connections remotely while reducing manual maintenance and providing maximised uptime.

Bandwidth expansion

Boost your bandwidth capacity and increase transmission reach with our bandwidth expansion solutions. And as your data flow increases – without adding more fiber – our solutions ensure higher path redundancy, further improving the stability of the physical layer of your data center.

Lead time reference

Preferred products
Recomennded to use: improved lead time and technical fit

Standard products
Recurrent items produced according to forecast

On-demand products
Products available on request

Fiber type

Singlemode / APC
Products containing singlemode fibers with APC connectivity

Singlemode / UPC
Products containing singlemode fibers with UPC connectivity

Multimode / OM4
Products containing multimode fibers OM4 with PC connectivity

Multimode / OM3
Products containing multimode fibers OM3 with PC connectivity

Base types

Base type Base-2
Base-2 connectivity method, products containing only duplex connectors

Base type Base-8
Base-8 MTP connectivity method, products containing MTP connectors with 8 fibers and with defined polarity methods. Uses polarity B, male to male trunks.

Base type Base-12 “enhanced”
Base-12 MTP connectivity method, products containing MTP connectors with 12 fibers and with defined polarity methods. Uses polarity B, male to male trunks.

Base type Base-12 “legacy”
Base-12 MTP connectivity method, products containing MTP connectors with 12 fibers and with defined polarity methods. Uses polarity A, female to female trunks.

Base type Base-24
Base-24 MTP connectivity method, products containing MTP connectors with 24 fibers and with defined polarity methods. Uses polarity A, male to male trunks.

Base type Base-24 (16)
Base-24 MTP connectivity method, products containing MTP connectors with 16 fibers and with defined polarity methods. Trunks are same as in Base-24 method.

Transmission technology

FO
Fiber optic technology

RF
Radio frequency technology

Colour

Grey or Black
Products with grey or black primary colour

Cables – CPR rating

B2ca, C2ca, D2ca, E2ca
Products containing CPR B2ca, C2ca, D2ca and E2ca rated cable

Cables – Construction

Singlemode
Singlemode cables, containing 8-, 12-, 16- or 24- fibers or sub units with respective number of fibers

Multimode
Multimode OM4 cables, containing 8-, 12-, 16- or 24- fibers or sub units with respective number of fibers

Jelly filled
Cables using jelly, preventing moisture or water to enter the cable.

Jelly free
Cables using dry block, preventing moisture or water to enter the cable.

UL approved
Cables that have been tested and approved by UL and meet the requirements of the National Electrical Code (NEC)

Orientation

Left or right
Products designated to use in either left or right part, for example LISA chassis

Introduction

MTP base methods and links

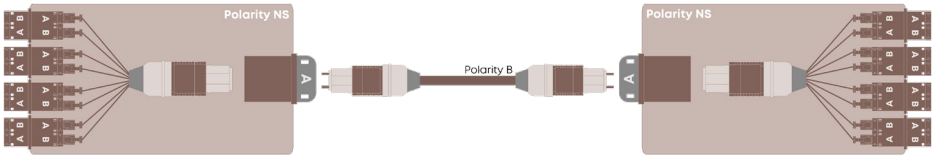

MTP base methods

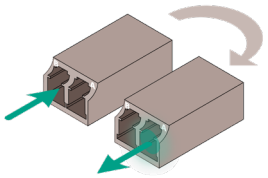

8

Base-8 method includes:
- 8-fiber MTP male to MTP male trunk, polarity B
- Transition module with 4 duplex ports, MTP female and polarity NS

The result permanent link is A-B

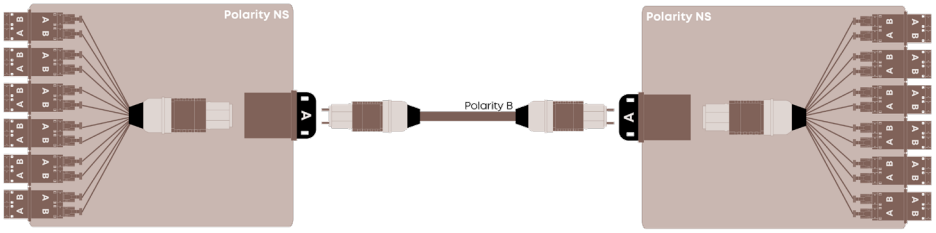

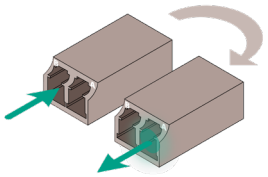

12

Base-12e “enhanced” method includes:
- 12-fiber MTP male to MTP male trunk, polarity B
- Transition module with 6 duplex ports, MTP female and polarity NS

The result permanent link is A-B

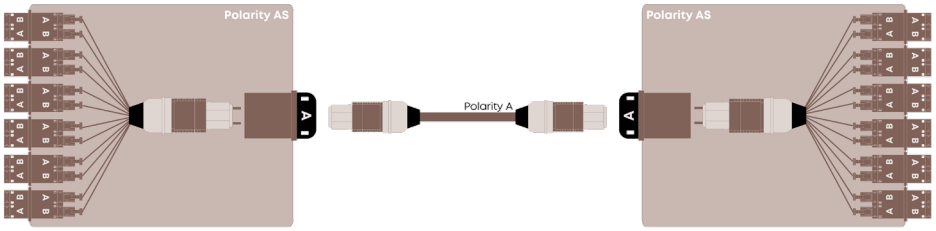

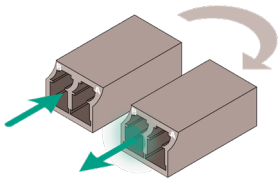

12

Base-12 “legacy” method includes:
- 12-fiber MTP female to MTP female trunk, polarity A
- Transition module with 6 duplex ports, MTP male and polarity AS*

The result permanent link is A-A

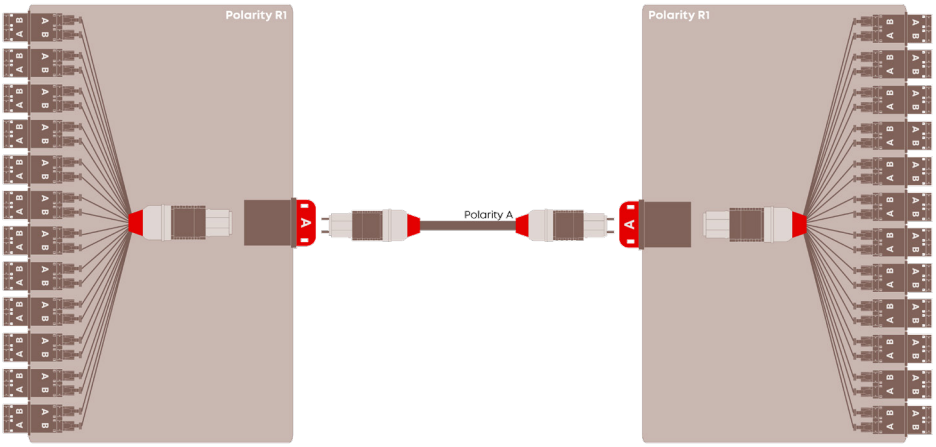

* Replacing one of transition modules from polarity AS to AP converts permanent link A-A to A-B

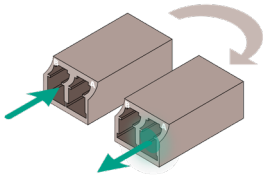

24

Base-24 method includes:
- 24-fiber MTP male to MTP male trunk, polarity A
- Transition module with 12 duplex ports, MTP female and polarity R1

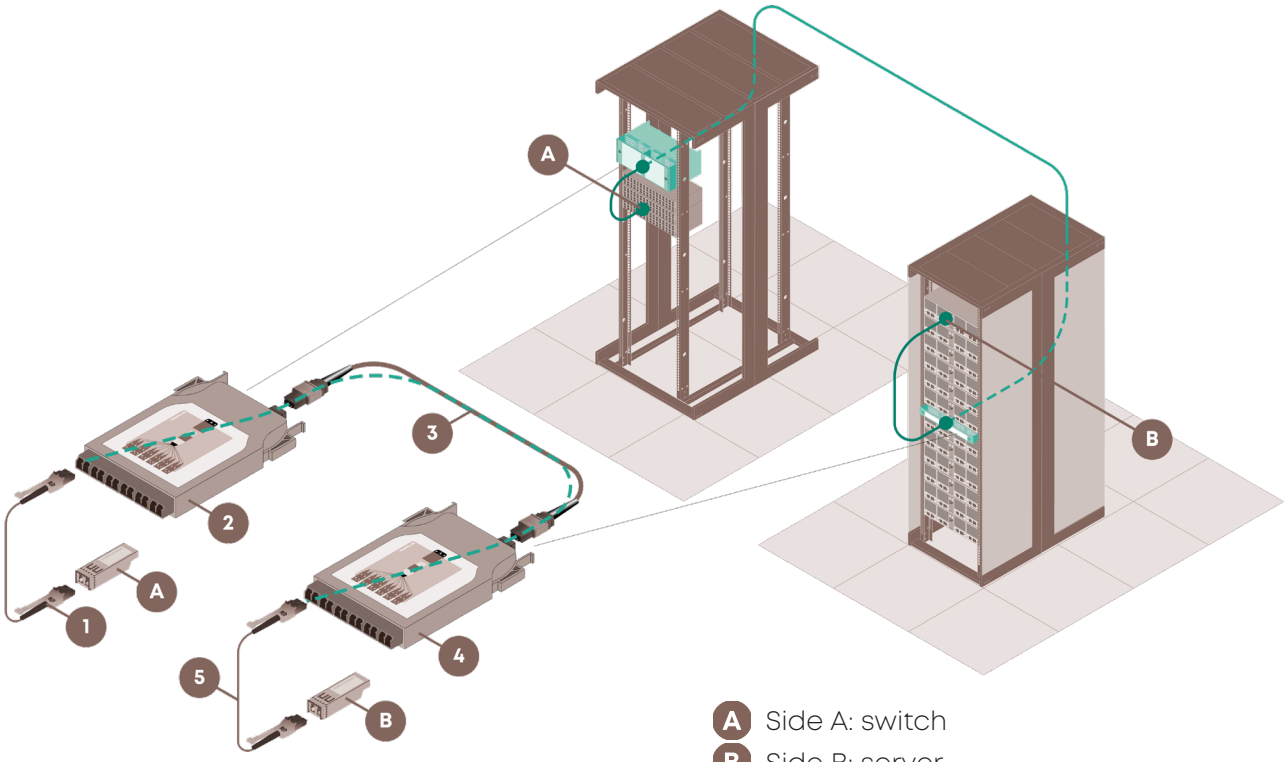

The result permanent link is A-B

Data center typical link

A Side A: switch
B Side B: server
(1) Patch cord on switch side
Permanent link
(2) Transition module
(3) MTP trunk
(4) Transition module
(5) Patch cord on server side

In the **permanent link type A-B** the light sent to port A on one side is received on port B on another side. Same duplex patch cord A-B/B-A required on both ends.

Permanent link A-B

In the **permanent link type A-A** the light sent to port A on one side is received on port A on another side. One side requires A-B/B-A patch cord while another side requires A-A/B-B.

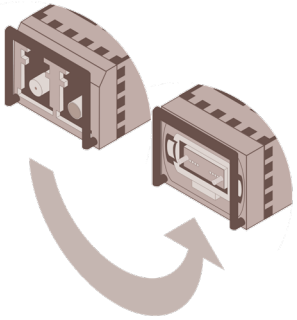

Permanent link A-A

Upgrade path and conversions

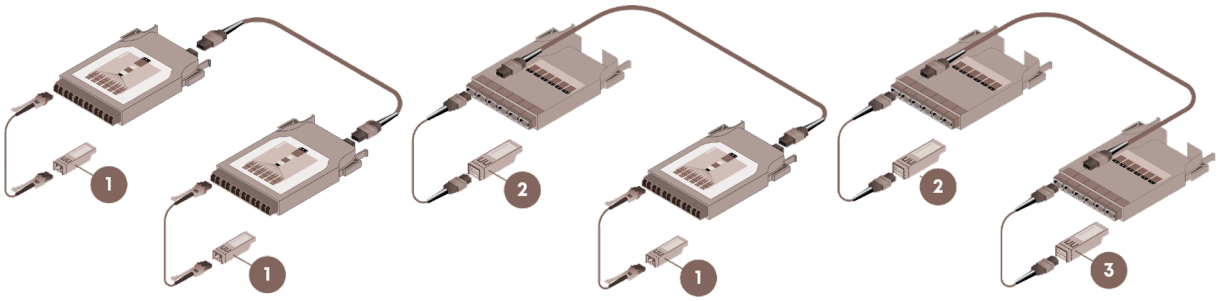

Upgrade path methods

Allow to re-utilize fiber infrastructure in future upgrade of transceiver technology. Depending on the deployed MTP base method different methods may apply.

(1) Duplex transceivers on both ends
(2) Switch transceiver upgraded from duplex to MPO
(3) Server transceiver upgraded from duplex to MPO

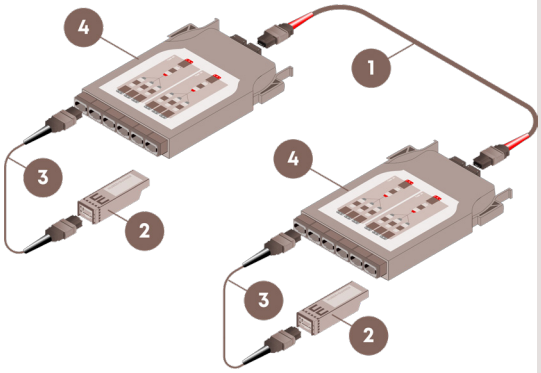

TODAY **TOMORROW** **BEYOND**

Conversion methods

Conversion methods required when the MTP trunk is not matching the MPO transceiver.

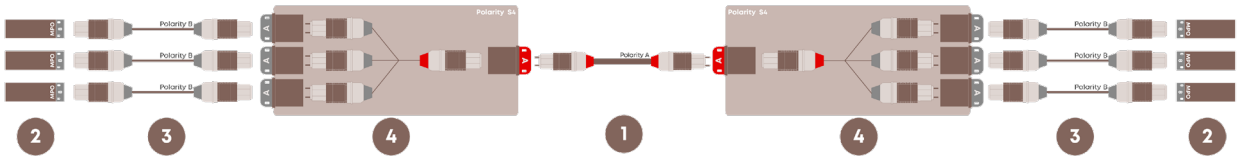

(1) MTP Base-24 trunk
(2) MPO 8-fiber transceiver
(3) MTP Base-8 patch cord
(4) Conversion module

Conversion examples

Trunk	Transceiver	Trunk	Transceiver
24	8	12	8
24	12	12	24
8	24	12	8
12	24	8	16

Example of conversion link:

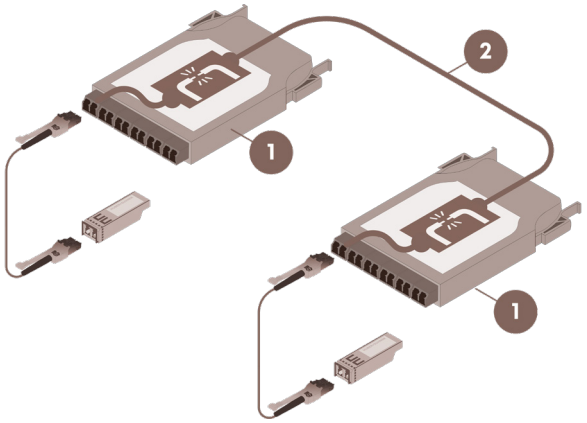

Splicing and patching

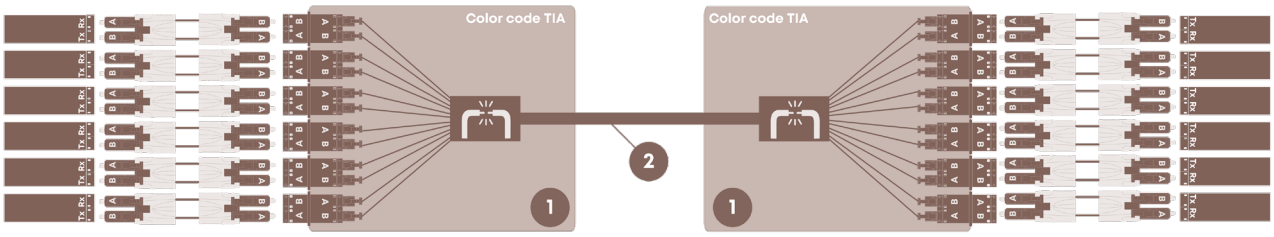

Splicing

Trunk (FO cable) spliced to a pigtail.

(1) Splice module
(2) FO cable

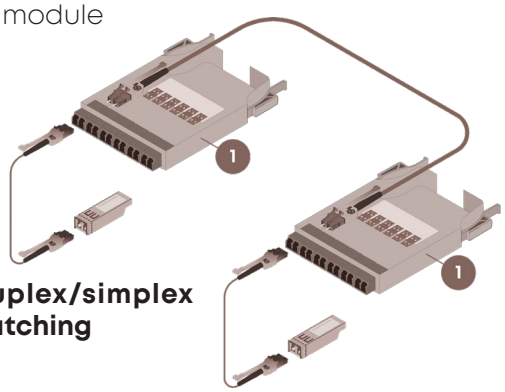

Example of splicing link, 12x fibers

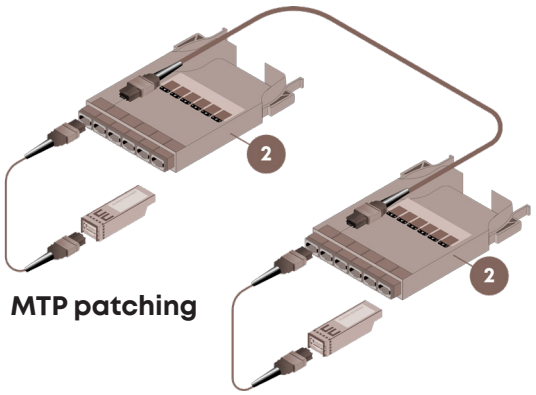

Patching

Trunk has the same connector as the patch cord

(1) Duplex patch module
(2) MTP patch module

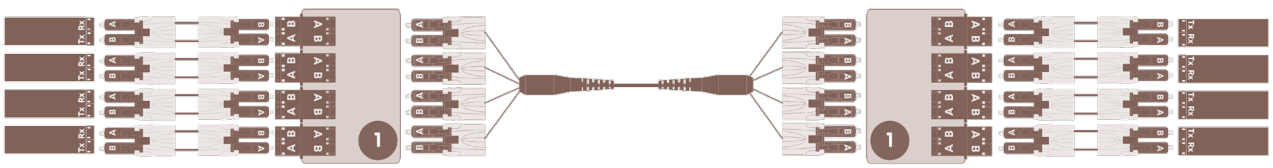

Duplex/simplex patching

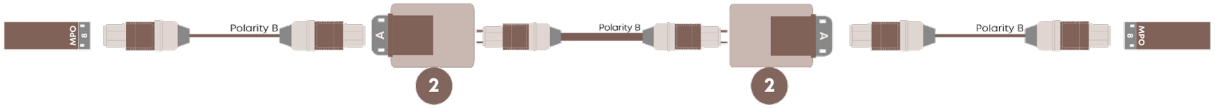

MTP patching

Example of duplex patching

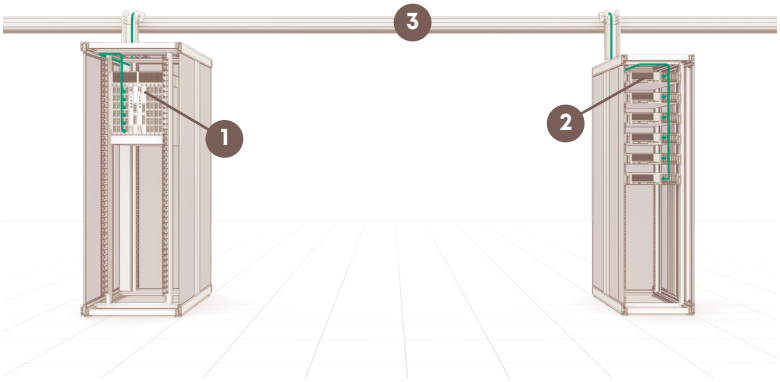

Example of MTP Base-8 patching

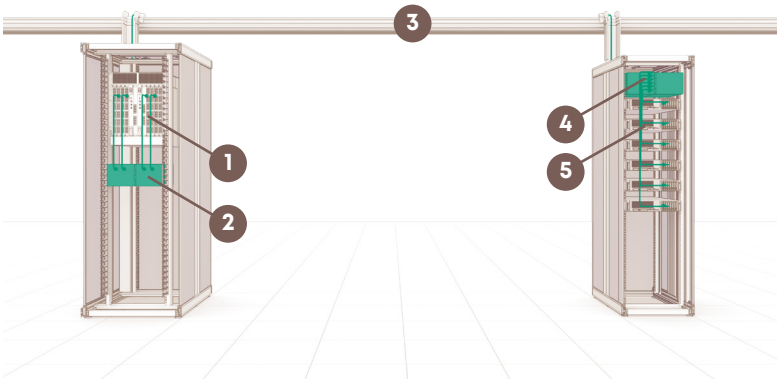

Connection methods

Direct-connect

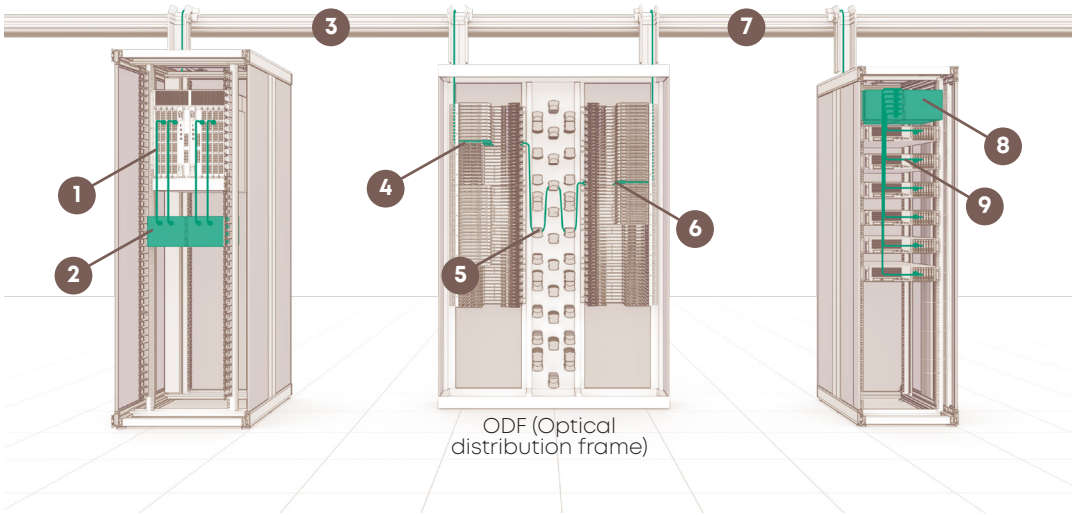

(1) Switch
(2) Server
(3) Patch cord

Inter-connect

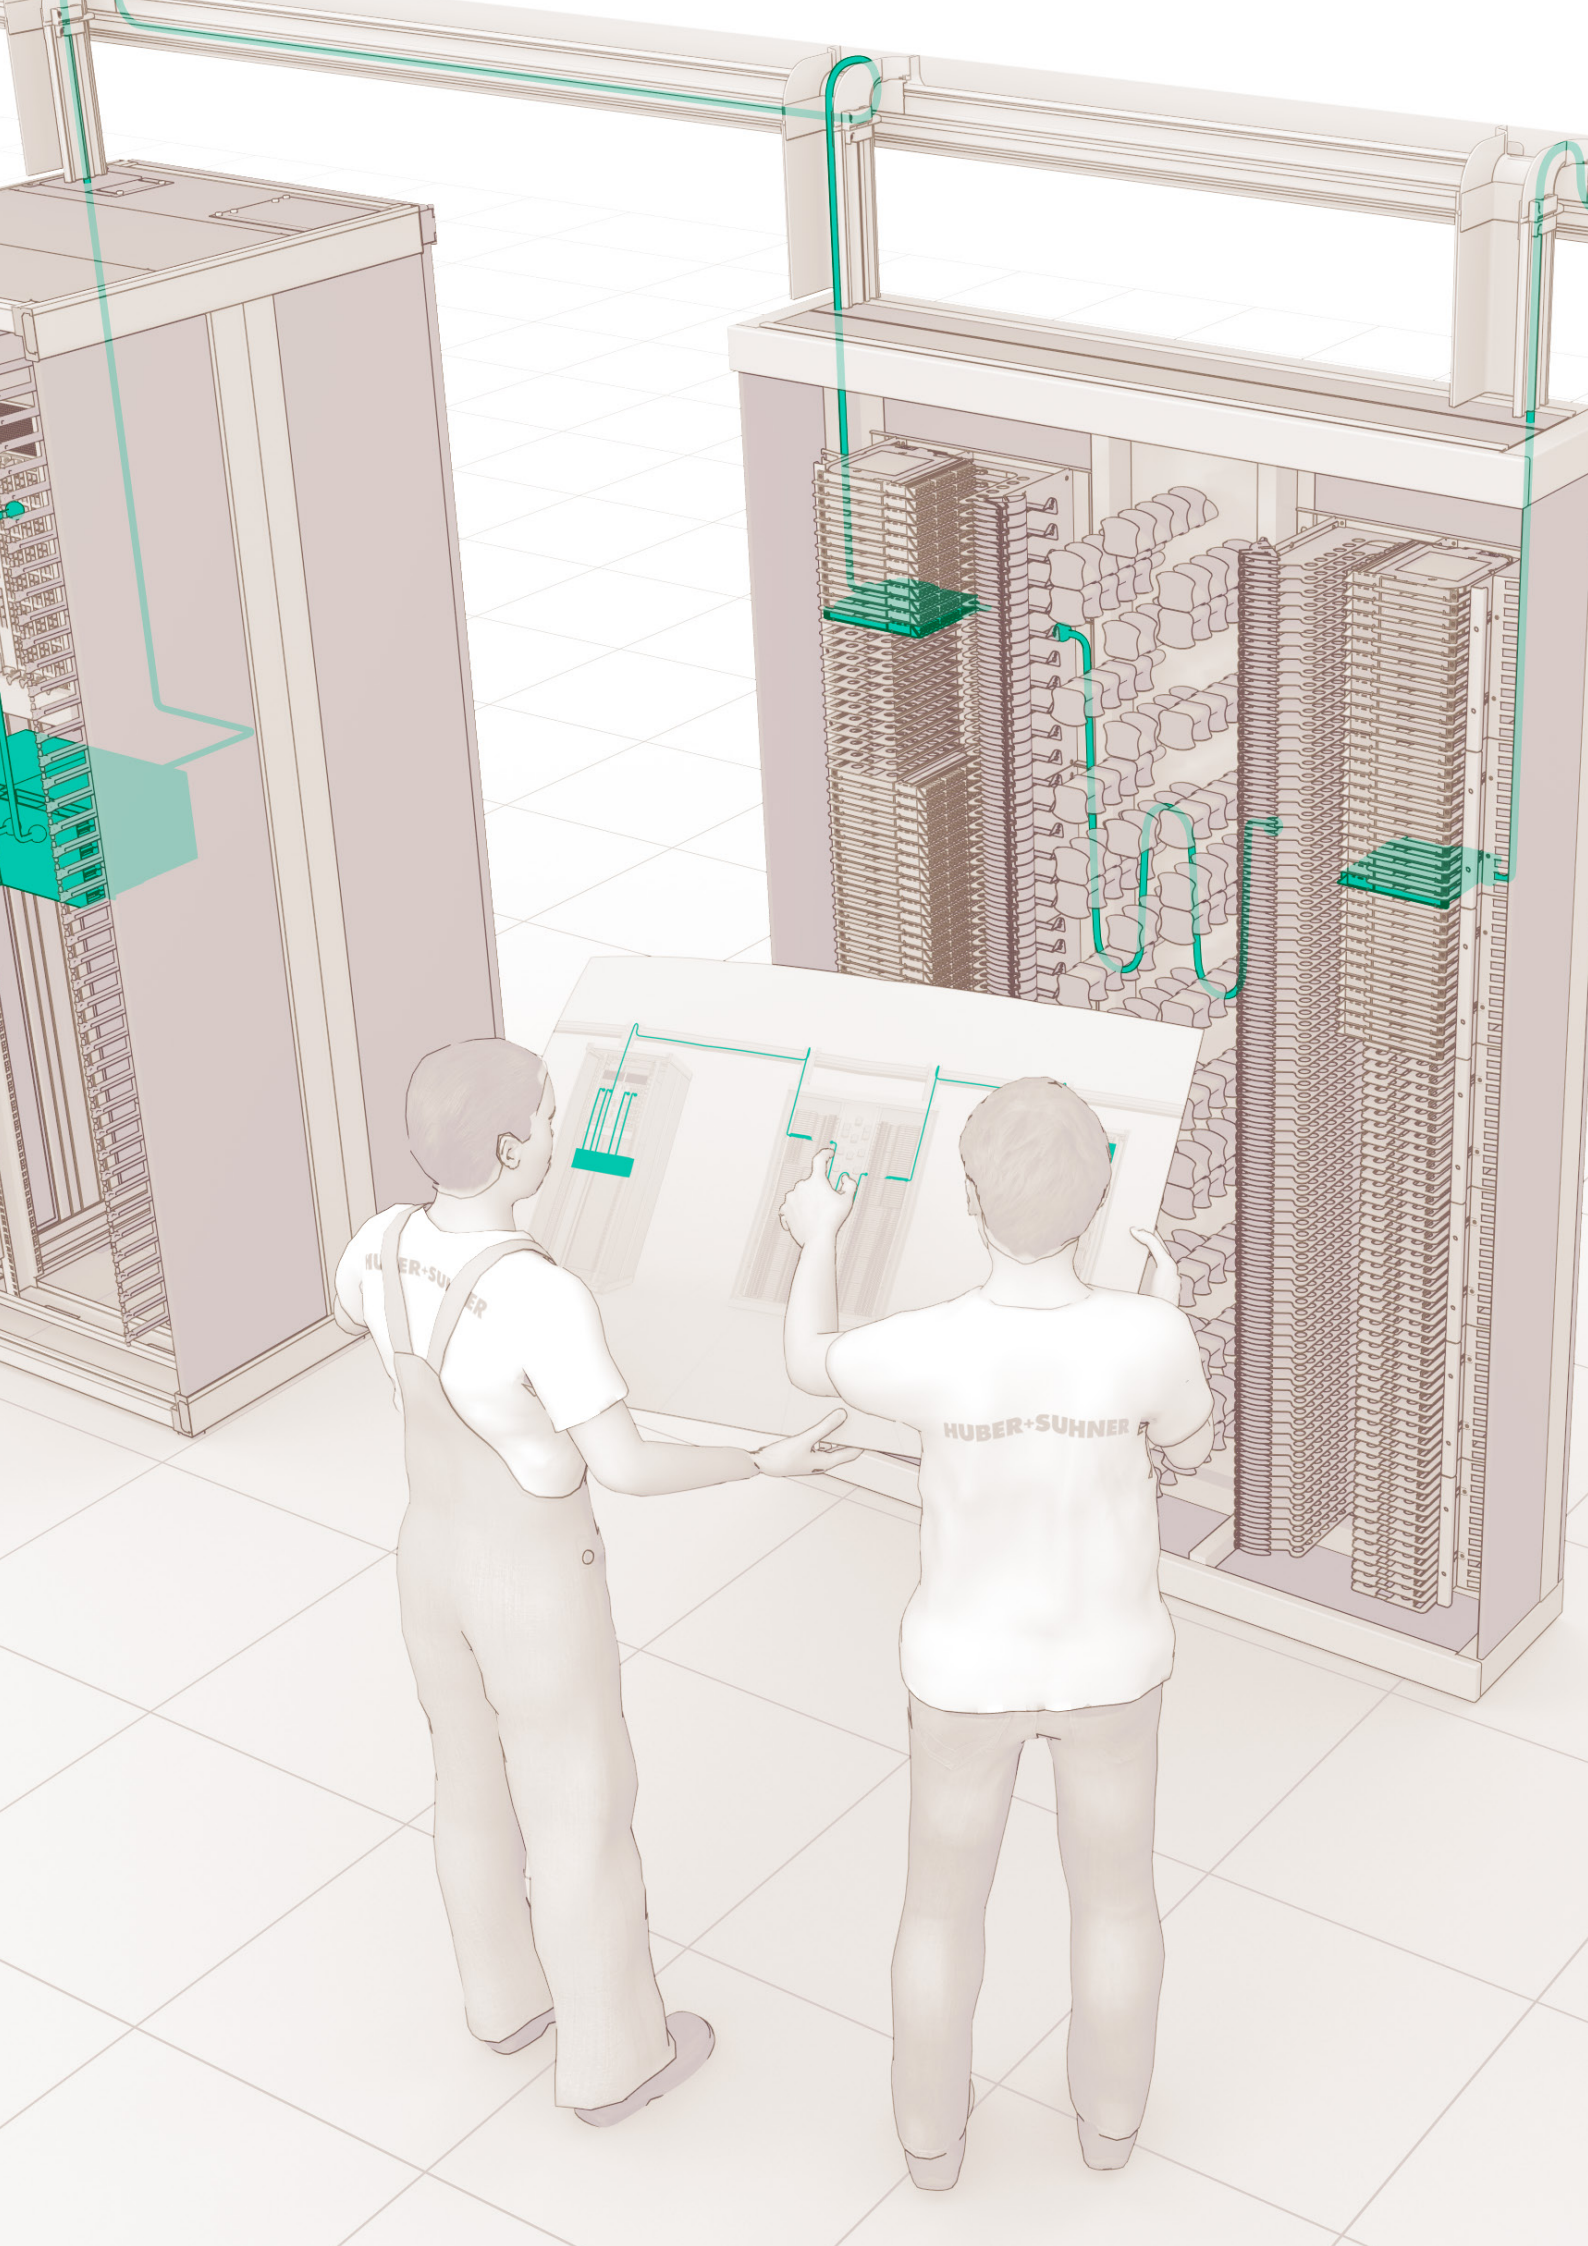

Permanent link
(1) Patch cord, switch side
(2) Module, switch side
(3) Trunk or cable
(4) Module, server side
(5) Patch cord, server side

Cross-connect

Permanent link
(1) Patch cord, switch side
(2) Module, switch side
(3) Trunk or cable
(4) Module in ODF, switch replication
(5) Patch cord, cross-connect

Permanent link
(6) Module in ODF, server replication
(7) Trunk or cable
(8) Module, server side
(9) Patch cord, server side

HUBER+SUHNER

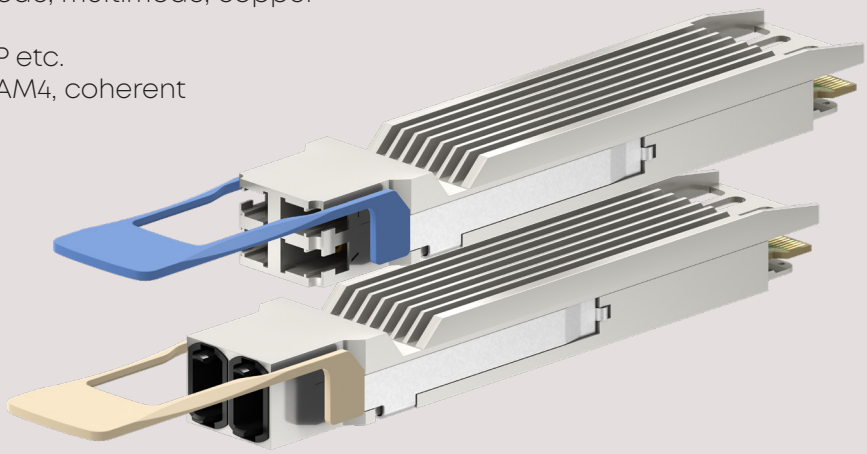

Transceivers

Transceiver overview

Transceiver types

(1) Form factor: QSFP, QSFP28, QSFP-DD, OSFP, SFP+, SFP, XFP; CFP ...
(2) Data rate: 800G 400G, 100G, 40G, 25G, 10G ...
(3) Protocol: Ethernet, Fiber Channel, Infiniband ...
(4) Power Budget: 4 dBm to 50 dBm
(5) Wavelength / WDM Grid: CWDM and DWDM (C14-C60)
(6) Transport media: singlemode, multimode, copper
(7) Coding: Cisco, Juniper ...
(8) Physical interface: LC, MTP etc.
(9) Signal modulation: NRZ, PAM4, coherent

Data center Ethernet transceivers overview

#	Technology	Connector type	Form factor	Duplex or parallel	Number of optical lanes	Speed per lane	Fiber type	Average distance (depends on used fiber)
1	100G	MPO	QSFP28	Parallel	4	25G	MM	100 m
2	100G LR4	LC	QSFP28	Duplex	4	25G	SM	10 km
3	100G LR4 OTU	LC	QSFP28	Duplex	4	25G	SM	10 km

Fiber optic cables

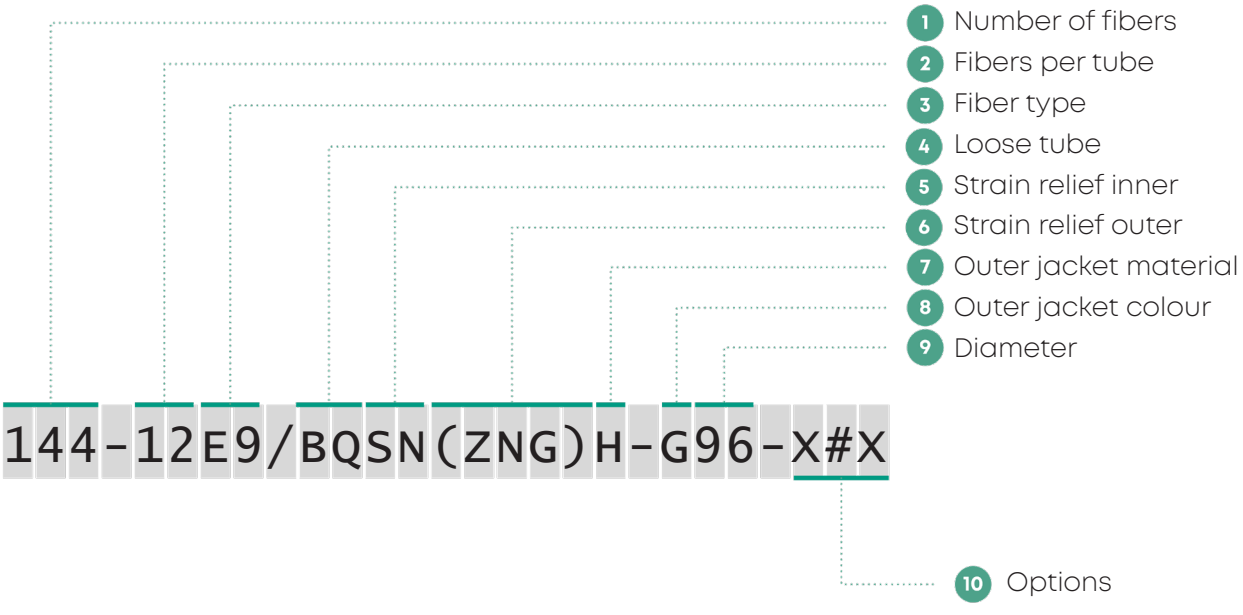

Fiber optic cables overview

Fiber optic cables in data centers

(1) **Indoor cables** – within data center room or rooms
(2) **Universal cables** – within data center rooms and partially outside
(3) **Outdoor cables** – between data centers

Order code fiber optic cables

Order code cables

1 Total number of fibers

XX or XXX Total number of fibers in a cable
Always indicated with two or three digits

2 Number of fibers per tube

08	8 fibers per inner cable or per loose tube	8 8
12	12 fibers per inner cable or per loose tube	12 12
16	16 fibers per inner cable or per loose tube	16 16
24	24 fibers per inner cable or per loose tube	24 24

3 Fiber type

E9	Singlemode fiber 9/125/245 µm
E9A1	Singlemode fiber low-bend 9/125/245 µm A1
E9A2	Singlemode fiber low-bend 9/125/245 µm A2
G50	Multimode fiber 50/125/245 µm

4 Loose tube

__	No loose tube (skip)	
BQ	Mini multifiber loose tube, jelly-free – dry block Ø2.2 mm	
Q	Standard multifiber loose tube, jelly-free – dry block Ø2.8 mm	
BW	Mini multifiber loose tube, jelly-filled – Ø2.2 mm	
W	Standard multifiber loose tube, jelly-filled – Ø2.8 mm	

5 Strain relief inner

__	No strain relief (skip)
SN	Central strength member, non-metallic

6 Strain relief outer

(ZN)	Strain-relief, non-metallic (aramide)
(ZNG)	Glass roving for strain relief/rodent protection

7 Outer jacket material

H	Outer jacket material LSFH™
HH	Outer jacket material of inner and outer cable – material LSFH™
SNH	Outer jacket material LSFH™ with strength member
HAH	Outer jacket material of inner and outer – LSFH™ with steel wire armouring
Y	Outer jacket material PE (LD-PE)
V	Outer jacket material PE (HD-PE)
YAY	Outer jacket material or inner and outer – PE (LD-PE) with steel wire armouring
VAV	Outer jacket material or inner and outer – PE (HD-PE) with steel wire armouring

8 Outer jacket colour

E	Yellow
L	Heather violet
G	Black
Z	Black with orange stripes

9 Diameter

XXX Diameter of the cable (1/10mm), e.g.

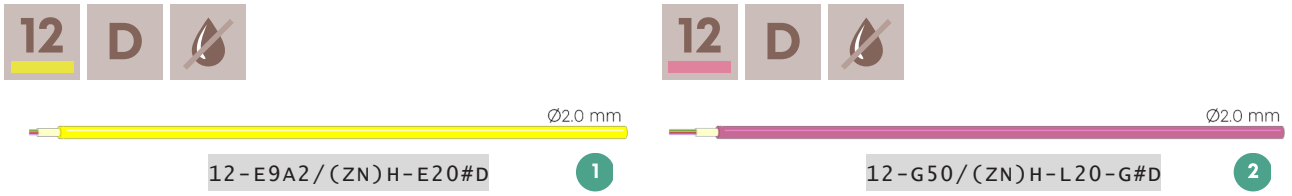

49	Ø4.9 mm
150	Ø15.0 mm

10 Options

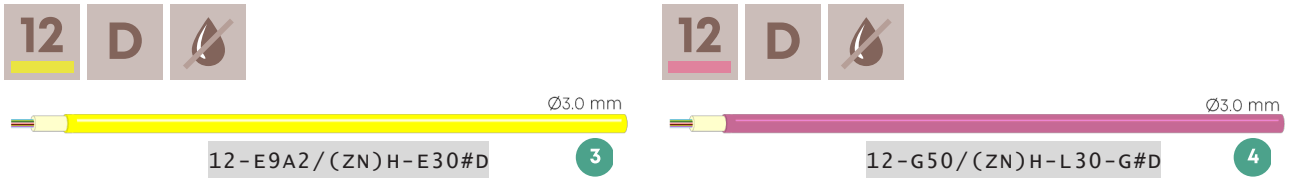

G	OM4 fiber 3500/500 MHz x km
UR	UL-listed OFNR: Riser cable UL1666

Assemblies

Duplex assemblies overview

Duplex assembly applications

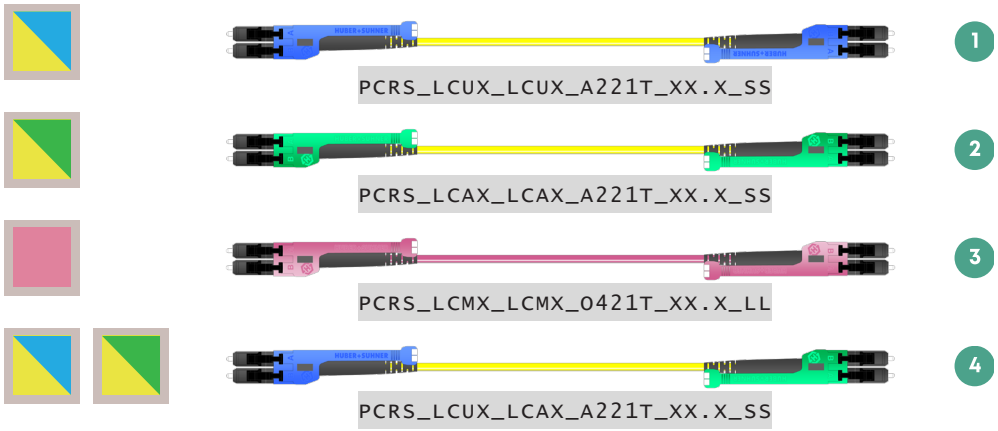

(1) Direct-connect duplex transceivers with A-B/B-A duplex assembly (light goes from Tx to Rx)
(2) Interconnect duplex adapters with A-B/B-A duplex assembly (light goes from A to B)
(3) Interconnect duplex adapters with A-A/B-B duplex assembly (light goes from A to A)

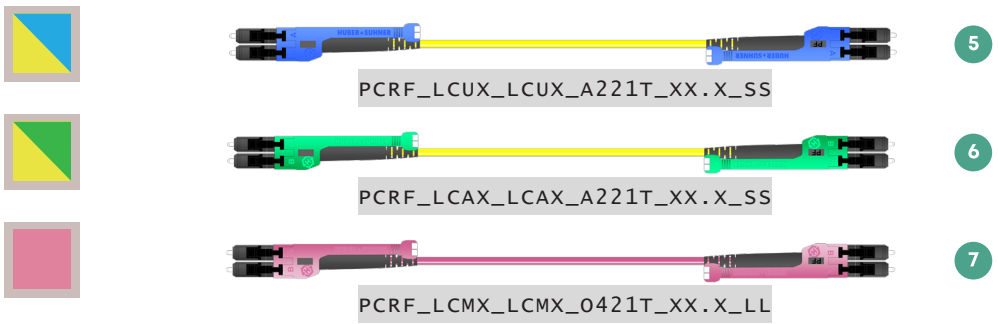

Duplex assembly polarity can be adjusted if required by structured cabling link design.
PF indicates pairs flipped.

LC-XD to LC-XD, figure-0 uniboot cable, ⌀2.1 mm

Polarity A-B/B-A

Polarity A-A/B-B

Order code pigtails

Order code pigtails

1 Assembly type

PT01	Single pigtail, colour according fiber type
PS12	Pigtail set 12 pcs, 12 colours per TIA colour code*
PS24	Pigtail set 24 pcs, 2 times 12 colours per TIA colour code*

* Same pigtail set is used in all other colour codes

2 3 Connector side A or B

LCUS	LC UPC BTW*	
LCAS	LC APC BTW	
LCMS	LC BTW	
SCUS	SC UPC BTW	
SCAS	SC APC BTW	
SCMS	SC BTW	
LHUS	E-2000 UPC BTW	
LHAS	E-2000 APC BTW	
LHMS	E-2000 BTW	

*BTW – behind the wall, connector with short boot

4 Fiber type

SM	Singlemode G.652.D
O4	Multimode 50/125 fiber OM4

5 Cable type

09E	Ø0.9mm (900µm) round cable, easy strip tube

Tube and fiber coating have same colour

6 Length

XXXX	Pigtail length in meters, 4 characters allowed, e.g.:

01.0 1 meter 02.0 2 meters

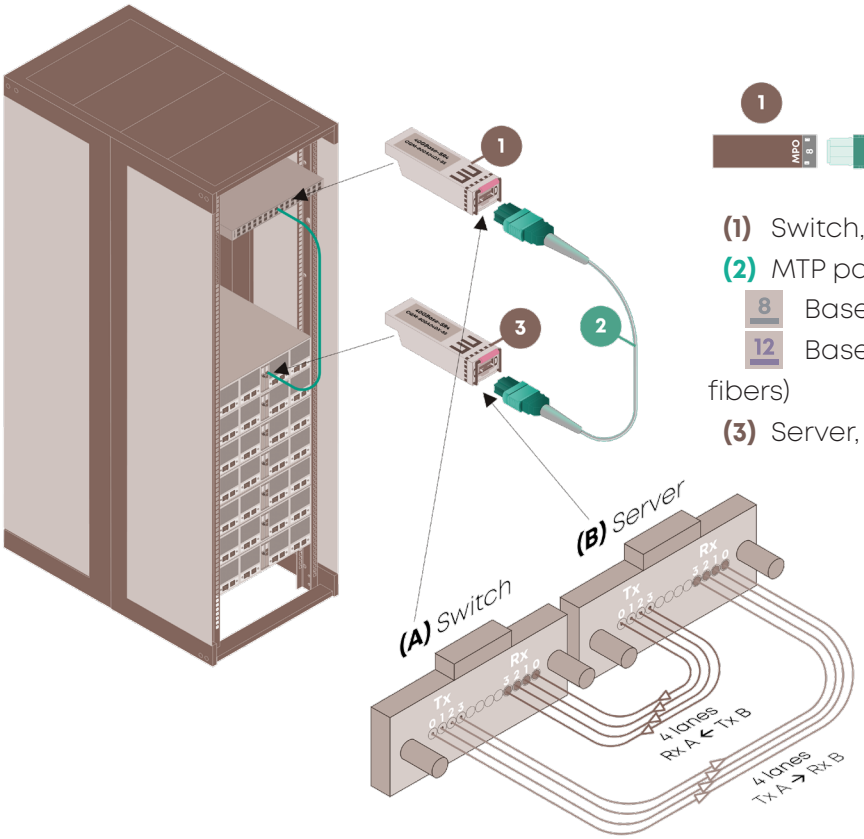

7 Performance

S0	Class S – singlemode standard
B0	Class B – singlemode grade B
L0	Class L – multimode low-loss
M0	Class M – multimode standard

MTP patch cords overview

Direct-connect MPO 8-fiber transceivers

8 12

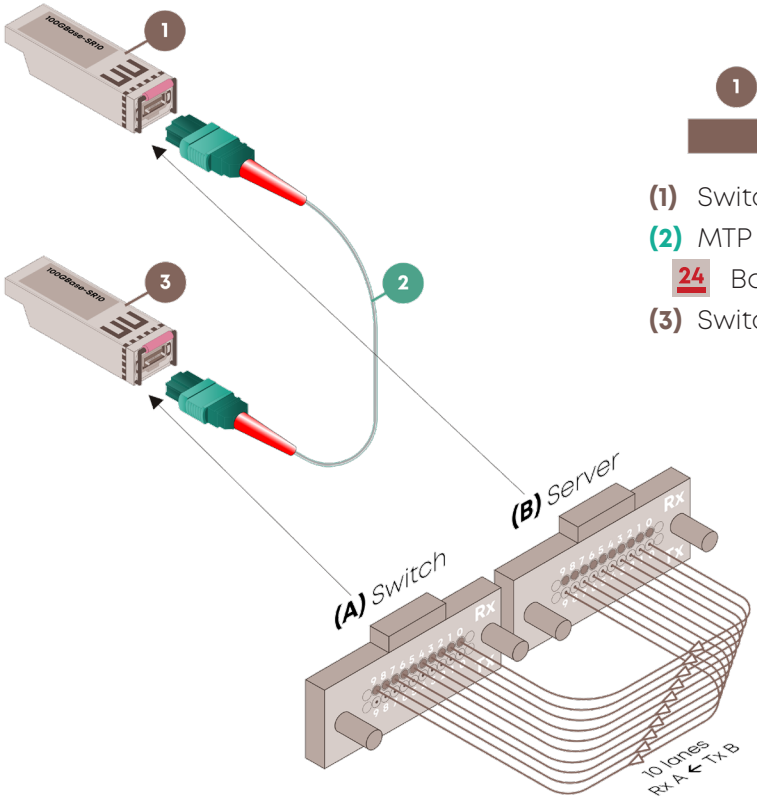

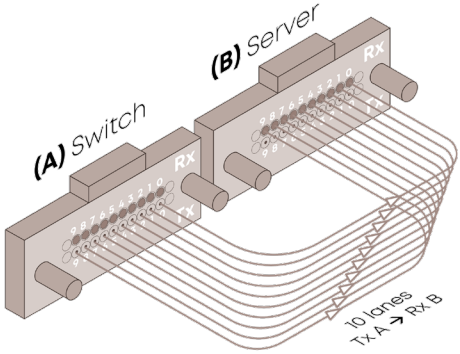

(1) Switch, transceiver MPO 8-fiber
(2) MTP patch cord, female to female
8 Base-8, polarity B
12 Base-12e, polarity B (4 unused fibers)
(3) Server, transceiver MPO 8-fiber

Direct-connect MPO 20-fiber transceivers

24

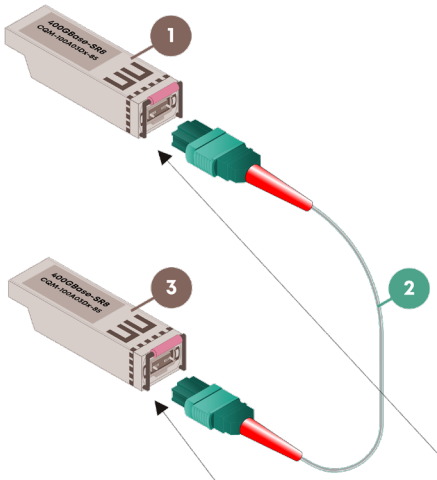

(1) Switch, transceiver MPO 20-fiber
(2) MTP patch cord, female to female
24 Base-24, polarity A (4 unused fibers)
(3) Switch, transceiver MPO 20-fiber

Direct-connect MPO 16-fiber (MPO-24 interface) transceivers

16

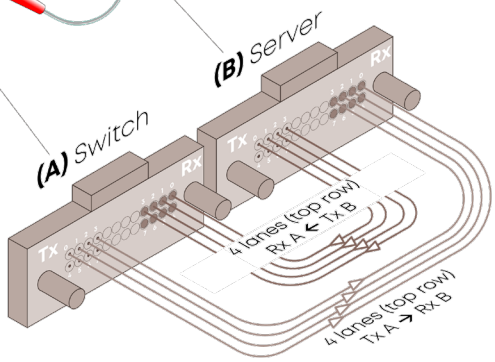

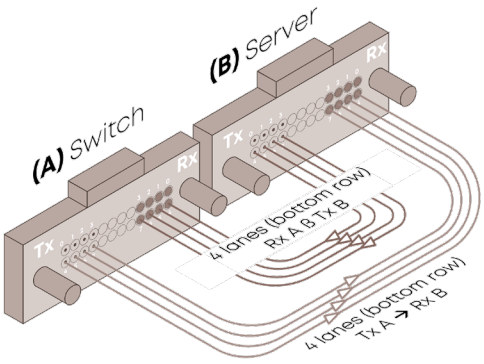

(1) Switch, transceiver MPO 16-fiber
(2) MTP patch cord, female to female
16 Base-16, polarity modifed B*
24 Base-24, polarity modifed B* (8 unused)

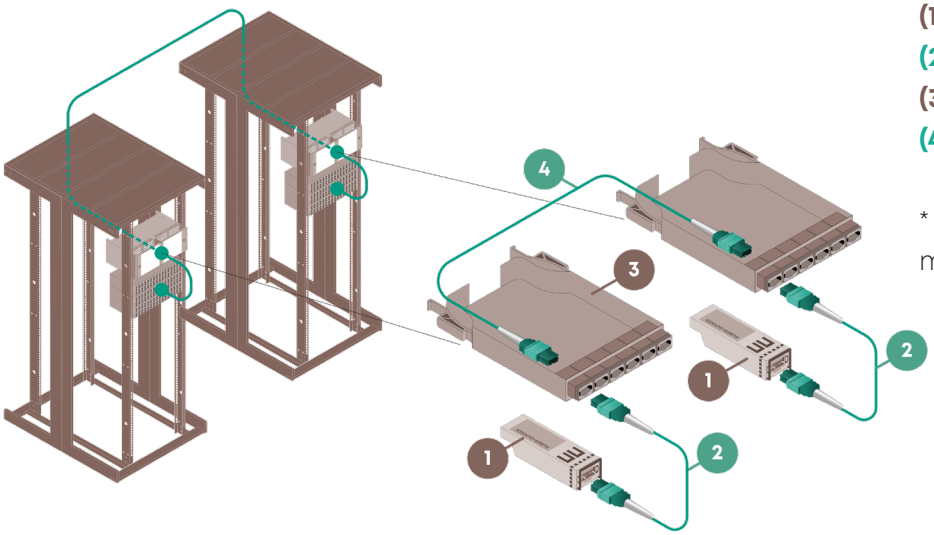

* modifed B requires no fiber rows flipping

(3) Switch, transceiver MPO 16-fiber

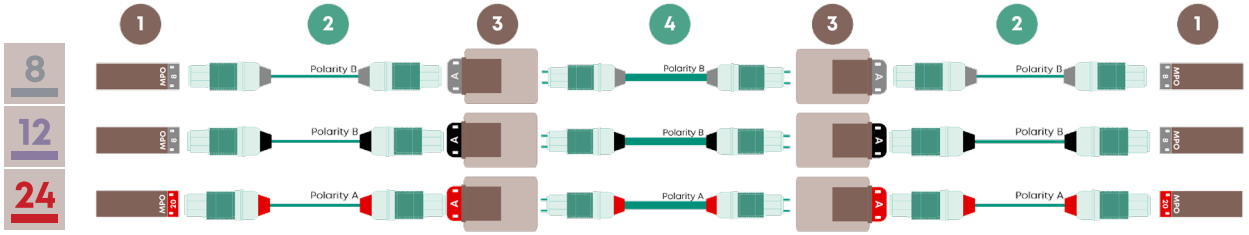

Recommended inter-connect of MPO transceivers

(1) Transceiver
(2) MTP patch cord
(3) Adapter
(4) MTP jumper or trunk

* see required IANOS modules

MTP patch cords Base-8 and -12e

MTP patch cords Base-8

Changing gender and polarity of MTP Pro connector for legacy support

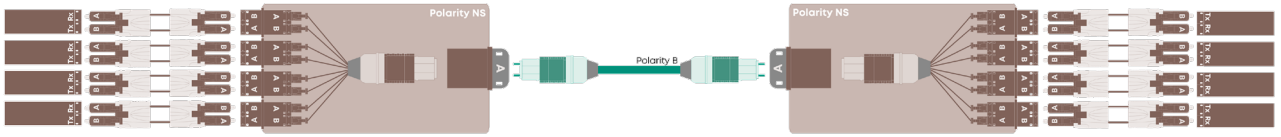

Inter-connect of MPO 8-fiber transceivers using legacy trunk (polarity A, female to female)

* key change for polarity adjustment possible only for multimode patch cords and jumpers

MTP jumpers overview

Inter-connect of 4 duplex transceivers with Base-8 trunk

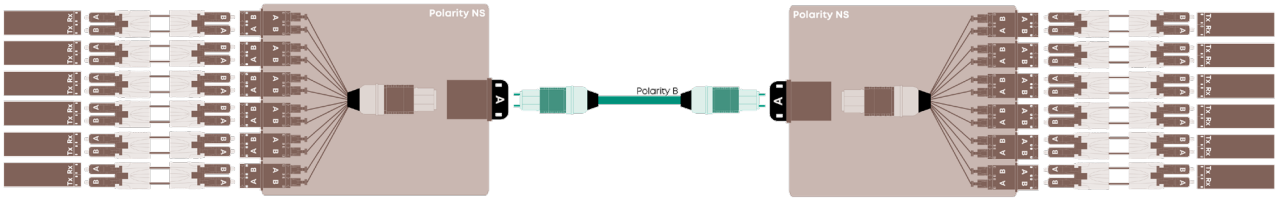

8

Duplex transceiver
Duplex patch cord A-B/B-A
Transition female Base-8 polarity NS
MTP jumper or trunk male to male Base-8, polarity B
Transition female Base-8 polarity NS
Duplex patch cord A-B/B-A
Duplex transceiver

Inter-connect of 6 duplex transceivers with Base-12e trunk

12

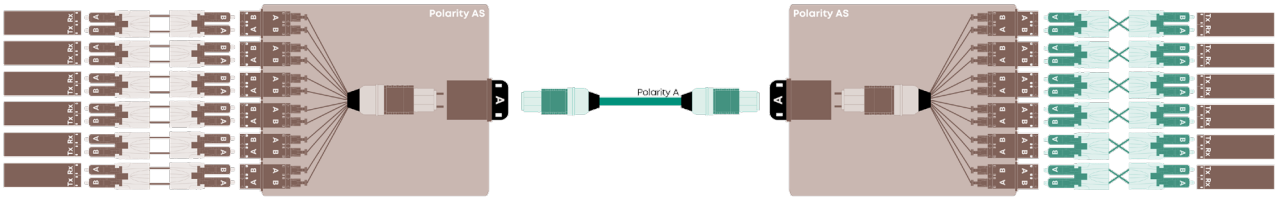

Duplex transceiver
Duplex patch cord A-B/B-A
Transition female Base-12e polarity NS
MTP jumper or trunk male to male Base-12e, polarity B
Transition female Base-12e polarity NS
Duplex patch cord A-B/B-A
Duplex transceiver

Inter-connect of 6 duplex transceivers with Base-12 trunk

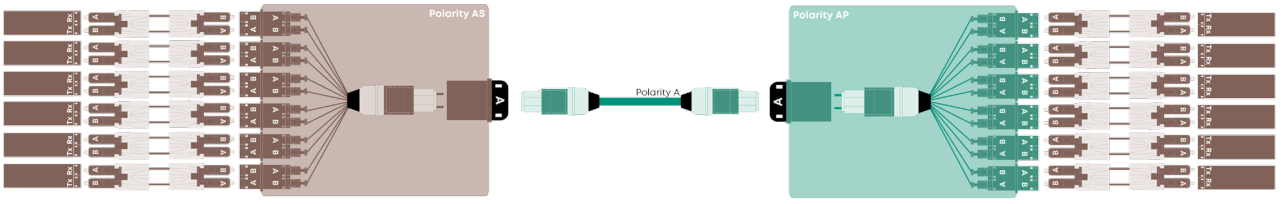

12

Option 1

Duplex transceiver
Duplex patch cord A-B/B-A
Transition male Base-12 polarity AS
MTP jumper or trunk female to female Base-12, polarity A
Transition male Base-12 polarity AS
Duplex patch cord A-A/B-B
Duplex transceiver

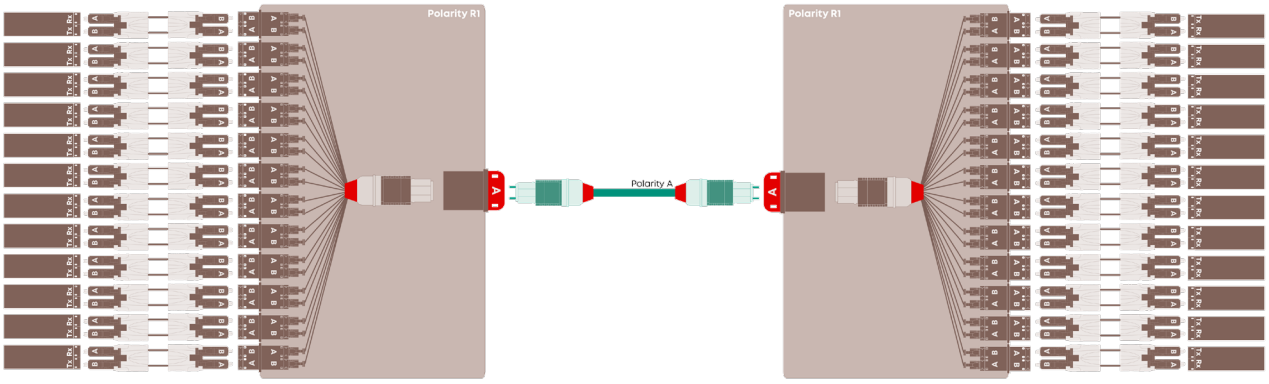

Option 2

Duplex transceiver
Duplex patch cord A-B/B-A
Transition, male Base-12 polarity AS
MTP jumper or trunk female to female Base-12, polarity A
Transition, male Base-12 polarity AP
Duplex patch cord A-B/B-A
Duplex transceiver

Inter-connect of 6 duplex transceivers with Base-24 trunk

24

Duplex transceiver

Duplex patch cord A-B/B-A

Transition female Base-24 polarity R1

MTP jumper or trunk male to male Base-24, polarity A

Transition female Base-24 polarity R1

Duplex patch cord A-B/B-A

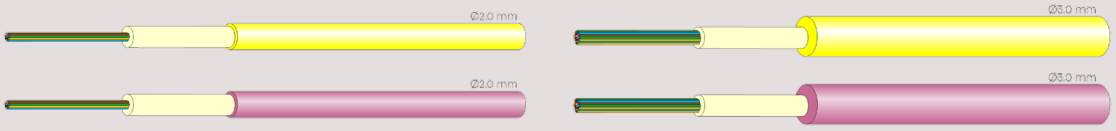

Duplex transceiver

Fiber management systems Optical distribution frames

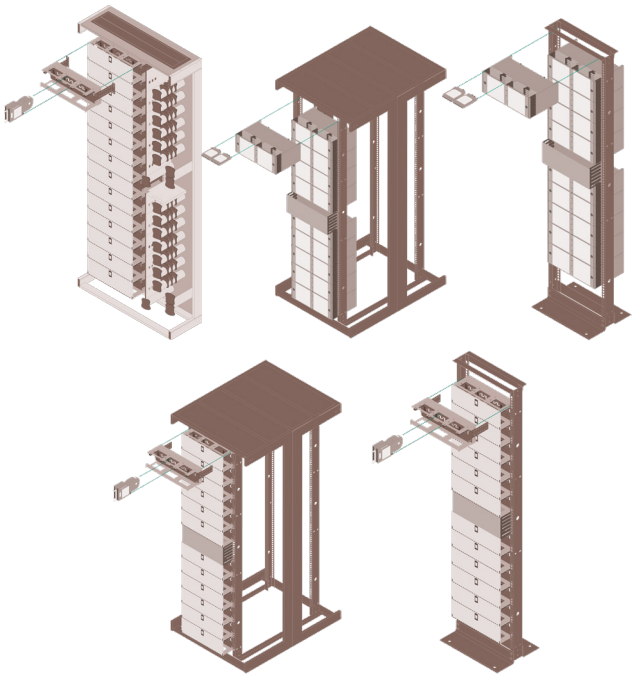

ODF overview

Optical distribution frame examples

An Optical Distribution Frame (ODF) is a point at which connections between two or more elements within a fiber optic network are facilitated and managed in varying degrees of density and flexibility as demanded by the application or network architecture.

Modular ODF consists of:

(1) Cassettes and modules
(2) Chassis
(3) Rack

ODF examples

ODF name	(1) Rack	(2) Chassis	(3) Cassettes and modules
ODF LISA **ODF LISA HD**	CDR 47U, 300 mm	LISA chassis	LISA cassettes
ODF SYLFA HD 300mm	NGR 46U, 300 mm	SYLFA HD chassis	SYLFA HD modules
ODF IANOS	Generic 19 inch racks, cabinets or open frames	IANOS 19 inch chassis	IANOS modules
ODF SYLFA HD 19 inch		SYLFA HD 19 inch chassis	SYLFA HD modules

ODF can be also mix of different chassis and racks. Compatibility matrix:

Product family	CDR or NGR	Generic 19 inch
LISA	✓	✓[1]
IANOS	✕	✓
SYLFA HD	✓	✓
CTS	✓	✕
ZDPHD	✕	✓

Difference NGR and CDR

Feature	CDR	NGR
Height	47U	39U, 46U
Frame	aluminium	steel
Customization via variant configurator	✕	✓
Region	NEU	worldwide

CDR overview

CDR selection guide

Step 1	**Rack**	**Pre-configured CDR** ↗ Pre-defined typical frames + doors configurations	
		Custom CDR ↗ Combining various frames and doors	CDR Frames
			CDR Doors
Step 2	**Accessories** ↗ Add accessories required by use case		

CDR frame types

(1) **CDR 300 patch cord management**
Mounted to CDR 600 to create ODF 900 LEFT or to CDR 900 to create ODF 1200 PATCH

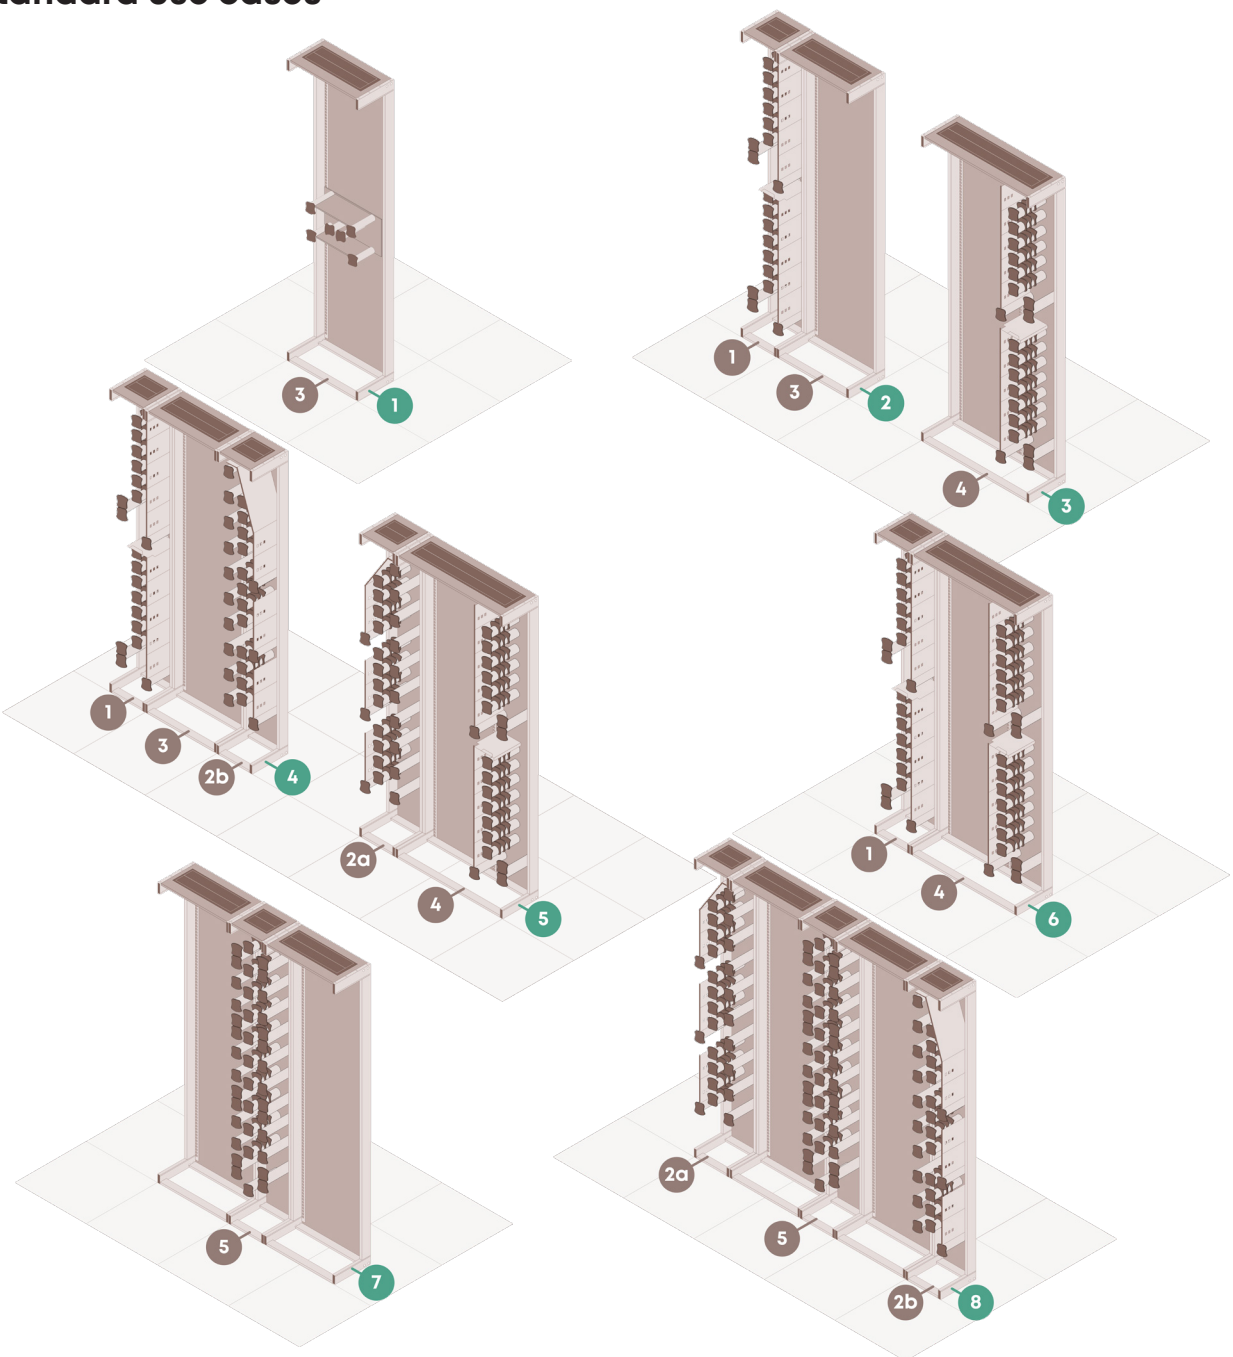

(2) **CDR 300 trunk slack management - LEFT (2a) and RIGHT (2b)**
When extra LEFT and RIGHT trunk slack management required

(3) **CDR 600**
Single 47U mounting space or in combination with other CDR

(4) **CDR 900**
Single 47U mounting space and integrated RIGHT patch cord management

(5) **CDR 1500**
Two 47U mounting spaces with central patch cord management

Standard use cases

(1) ODF 600
Patching, transition or splicing applications

(2) ODF 900 LEFT
Transition or splicing applications

(3) ODF 900 RIGHT*
Transition or splicing applications

(4) ODF 1200 LEFT
With LEFT trunk and patch cord slack management

(5) ODF 1200 RIGHT
With RIGHT trunk and patch cord slack management

(6) ODF 1200 PATCH*
Patching applications

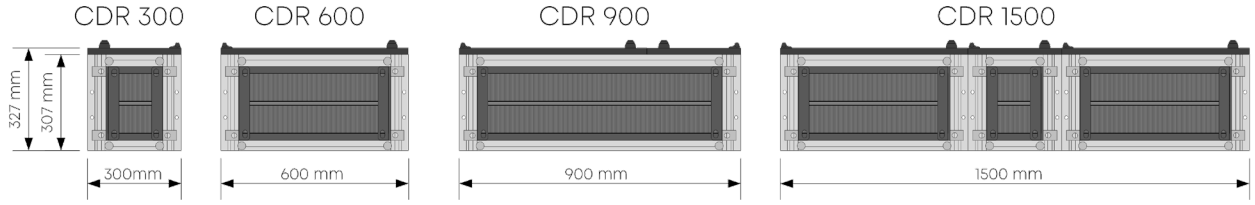

(7) ODF 1500 DOUBLE ACCESS
Transition or splicing applications

(8) ODF 2100 DOUBLE ACCESS*
Transition or splicing applications with LEFT and RIGHT trunk slack management

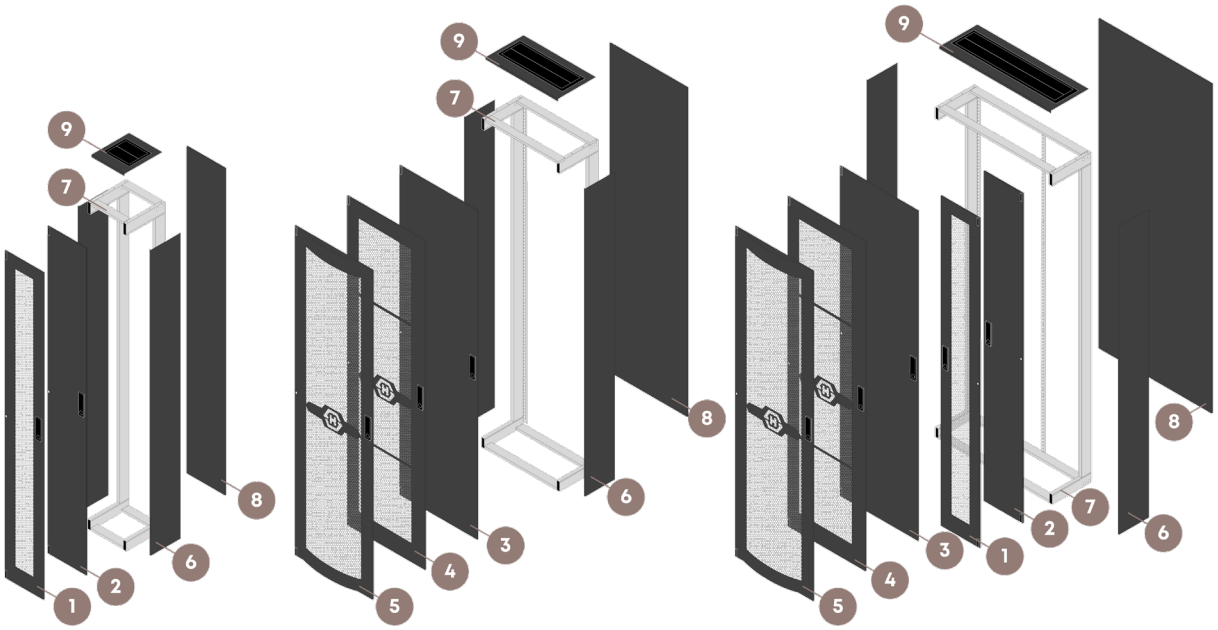

* Highlighted are popular use cases

1 Numbers show CDR frame types

CDR footprint (bottom view)

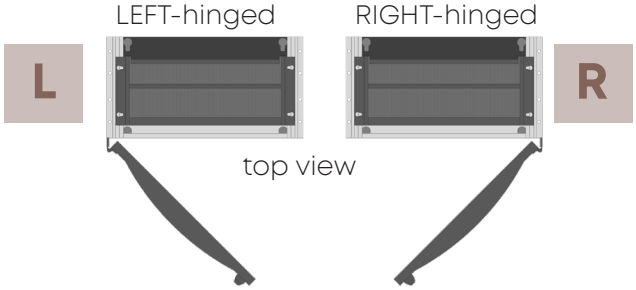

CDR main components

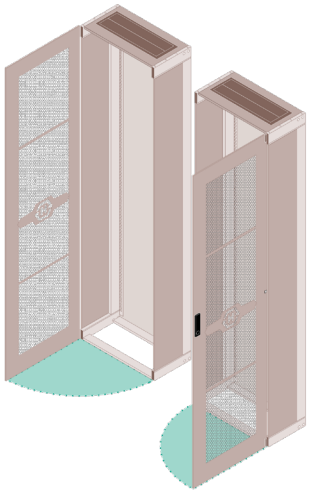

(1) 300 mm perforated flat door
(2) 300 mm solid flat door
(3) 600 mm solid flat door
(4) 600 mm perforated flat door
(5) 600 mm perforated curved door
(6) Side walls
(7) C-shape frame (aluminium)
(8) Back wall
(9) Brush top cover

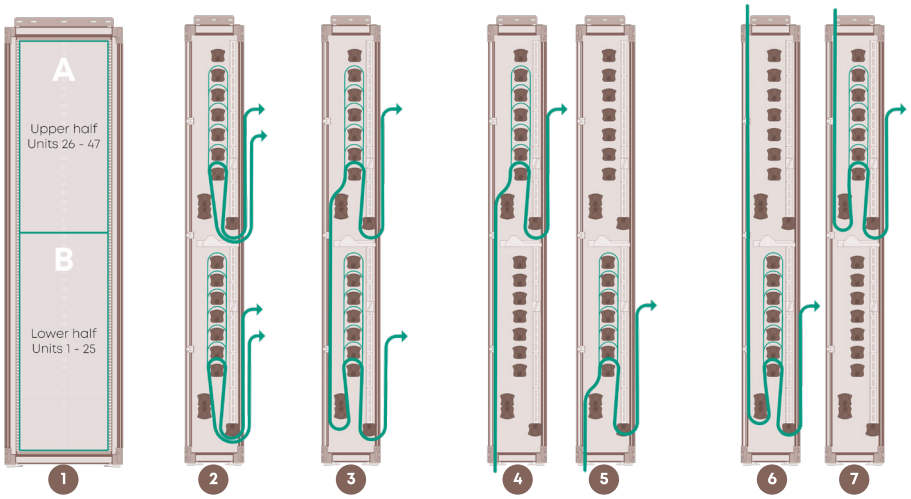

CDR door orientations

CDRs are equipped with LEFT-hinged or RIGHT-hinged doors

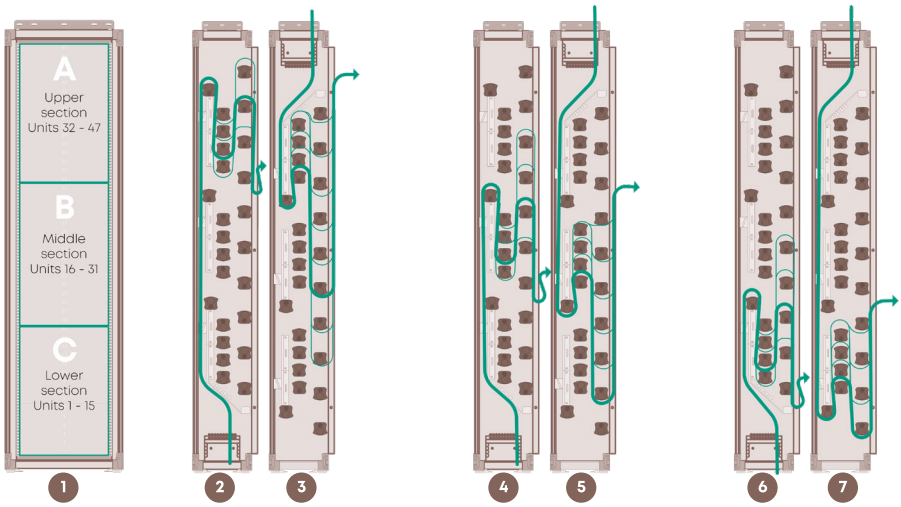

CDR patching guide - patch cord slack management

Patching lengths

(1) Two sections - A and B
(2) Inside A or B - **3.5 m**
(3) From A to B - **5 m**
(4) From A to bottom - **3.5 m**
(5) From B to bottom - **2.5 m**
(6) From B to top - **4.5 m**
(7) From A to top - **2.5 m**

CDR patching guide - trunk slack management

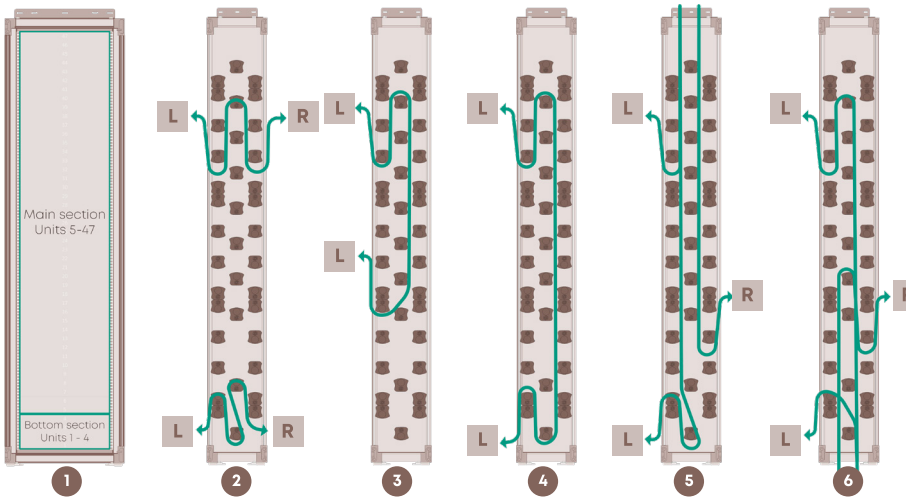

Trunk lengths*

(1) Three sections - A, B and C
(2) A to bottom - **3.0 m**
(3) A to top - **2.7 m**
(4) B to bottom - **3.0 m**
(5) B to top - **2.7 m**
(6) C to bottom - **3.0 m**
(7) C to top - **2.7 m**

* provided lengths are for transition or splicing applications, in case of patching application add 0.7m for every trunk

CDR patching guide - central patch cord slack management

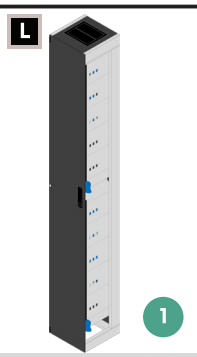

Patching lengths

(1) Main section and bottom section
(2) L to R - **2.5 m**
(3) L to L or R to R, inside main section - **3.5 m**
(4) L to L or R to R, main to bottom - **3.5 m**
(5) Patching out top entry - **3.5 m**
(6) Patching out bottom entry - **3.5 m**

CDR accessories

CDR frame integrated accessories

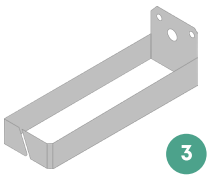

Mounted in pre-configured and custom CDR but can be ordered separately if necessary

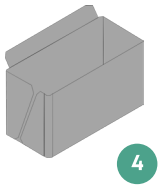

CDR-CONDUIT-TIE-PLT-SR

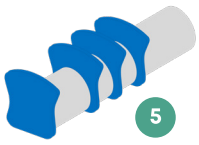

CDR-VERT-CABLE-BRKT-xx

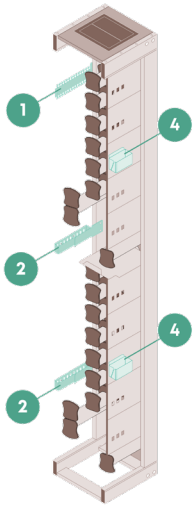

CDR-PATCH-MAN-BRKT-SR

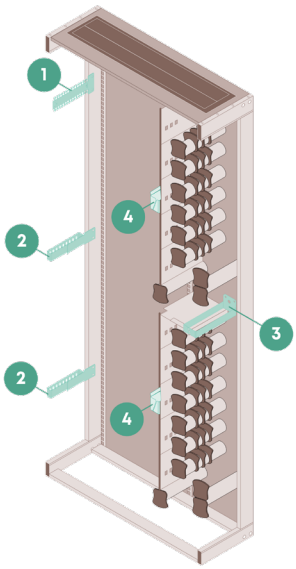

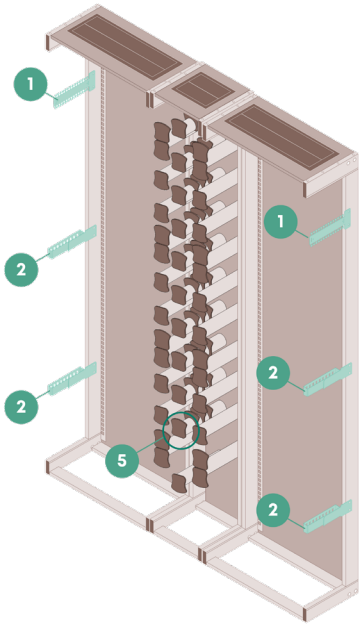

CDR-PATCH-SEP-BRKT-SR

CDR00-MAN-3DIV

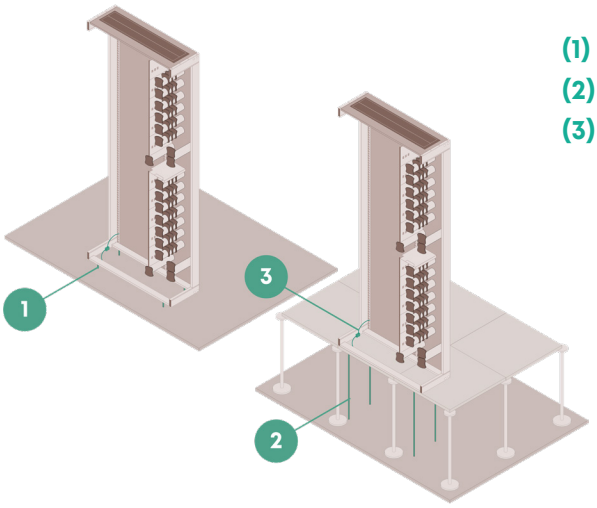

Ordering information

#	Item number	Descriptive code	Item text	LT
1	85021672	CDR-CONDUIT-TIE-PLT-SR	CDR conduit tie plate, silver	
2	85021673	CDR-VERT-CABLE-BRKT-BK	CDR vertical cable bracket, small, black	
3	85029919	CDR-PATCH-MAN-BRKT-SR	CDR patch cord guiding bracket for patch cord management plate, small, silver	
4	85029918	CDR-PATCH-SEP-BRKT-SR	CDR hook-in patch cord guiding bracket for vertical divide plate, small, silver (white aluminium)	
5	85029681	CDR00-MAN-3DIV	Front mountable mandrel assembly with 3 divider plates and endplate, incl. mounting material, length 225 mm	

CDR other accessories

(1) Fastening kit for concrete floor
(2) Fastening kit for raised floor
(3) Earthing kit (is part of standard delivery)

Ordering information

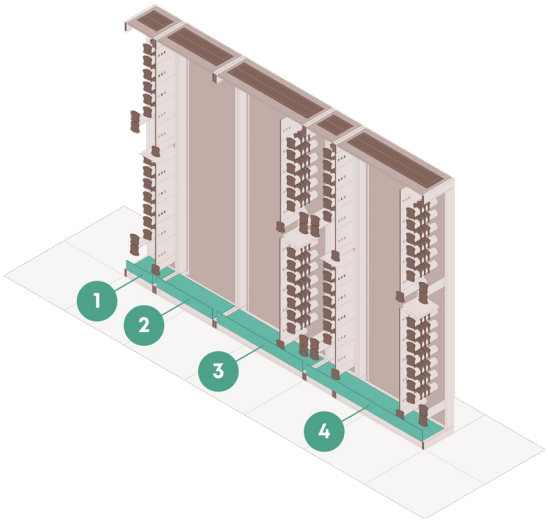

#	Item number	Descriptive code	Item text	LT
1	85038724	ODR-FFK-SF-1	CDR solid/ concrete floor fixing kit (4 per kit), incl. anchors, nuts and washers	
2	85029106	CDR00-FFK-RF-1	CDR raised floor fixing kit (4 per kit), incl. anchors, threaded-rod, nuts and washers	
3	85068485	CDR00-EART-KIT	CDR grounding/ earthing Kit	

CDR routing channel

Routing channel adds the possibility to patch between side-to-side or back-to-back racks

(1) For CDR 300
(2) For CDR 600
(3) For CDR 900
(4) For CDR 1200 (900+300)

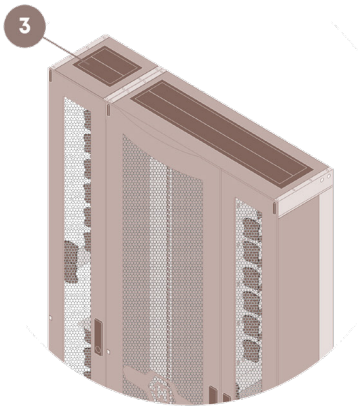

Routing channel for CDR 1500 shown in NGR accessories

Ordering information

#	Item number	Descriptive code	Item text	LT	URL
1	85029837	CDR03-ROUT-CHAN-SR	CDR 300 mm 2U routing channel, silver (white aluminium)		
2	85113147	CDR06-ROUT-CHAN-SR	CDR 600 mm 2U routing channel with adjustable rear opening, silver (white aluminium)	✓	
3	85029682	CDR09-ROUT-CHAN-SR	CDR 900 mm 2U patch cord routing channel with adjustable rear opening, silver (white aluminium)		
4	85096557	CDR12-ROUT-CHAN-SR	CDR 1200 mm 2U patch cord routing channel with adjustable rear opening, silver (white aluminium)	✓	

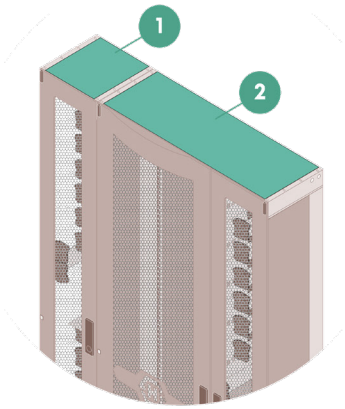

CDR top cover

Replaces the integrated brush top cover with a solid steel cover

.

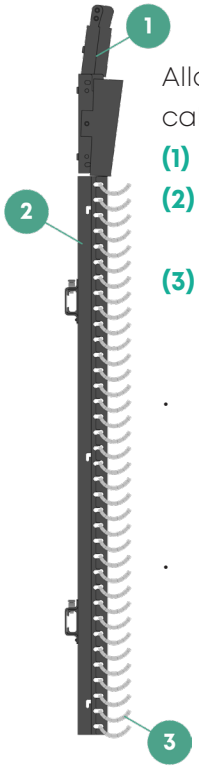

(1) For CDR 300
(2) For CDR 900
(3) Brush top

Ordering information

#	Item number	Descriptive code	Item text	LT
1	85072627	CDR03-COVR-PLAT-SR	CDR 300 top cover plate, silver, incl. mounting material	✓
2	85072626	CDR09-COVR-PLAT-SR	CDR 900 top cover plate, silver, incl. mounting material	✓

Ribbon breakout box - for CDR

Allows to splice ribbon cables in ODF LISA

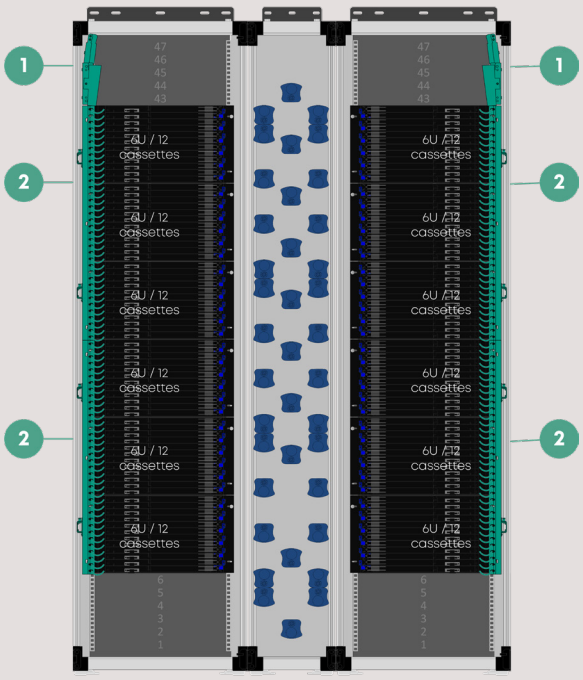

(1) Cable fixation

(2) Ribbon cable breakout box

(3) Ø6mm protection tube set for ribbon box

- One box for 36x cassettes, respectively 3x 6U LISA chassis
- Two stackable boxes for 72x cassettes, respectively 6x 6U LISA chassis

Example of ODF LISA 1500 ribbon splice

4x 864f ribbon cable (or 2x 1728f) in one ODF LISA 1500 using 4x ribbon boxes

Ordering information

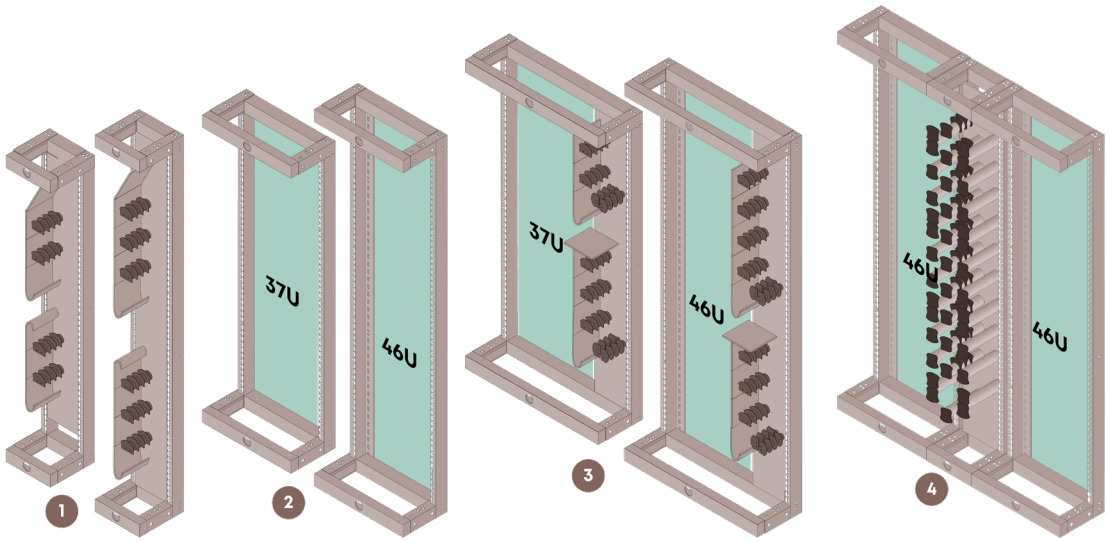

#	Item number	Descriptive code	Item text	LT
1	85128728	RIBBON-BOX-CAB-FIX-BK	LISA ribbon breakout cabel fixation box, up to 2x ribbon cables with diameter Ø20 - Ø32 mm, black	☑
2	85128729	RIBBON-BOX-CAB-B/OUT-BK	LISA ribbon breakout conduit fixation box, up to 36x 6mm conduits, black	☑
3	85139048	OFPT-6.35-4.2-PP-WHT	Cable conduit for LISA ribbon breakout box, diameter Ø6 mm, 36x 530 mm conduits, white	◔

NGR overview

NGR selection guide

Step 1	**Rack**	**Pre-configured NGR** Pre-defined NGR for standard applications
		Custom NGR NGR for standard applications configured with the order code
		Application specific NGR Pre-defined NGR for custom applications
Step 2	**Accessories** Add accessories required by use case	

NGR frames for standard applications

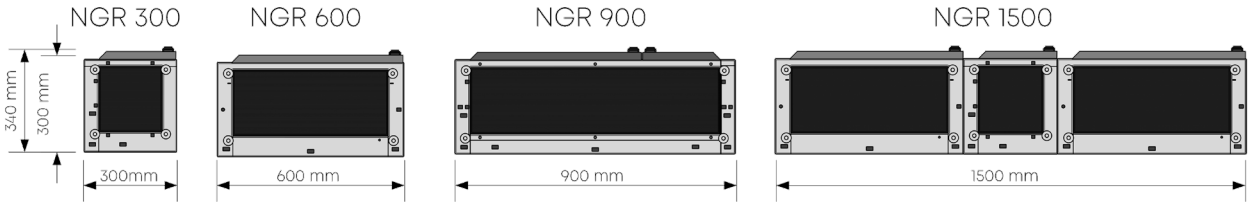

(1) **NGR 300 patch cord /trunk management**
Stacked to NGR 600 to create ODF 900 LEFT or to NGR 900 to create ODF 1200 PATCH

(2) **NGR 600**
Standalone single 37U or 46U mounting space or in combination with other NGR

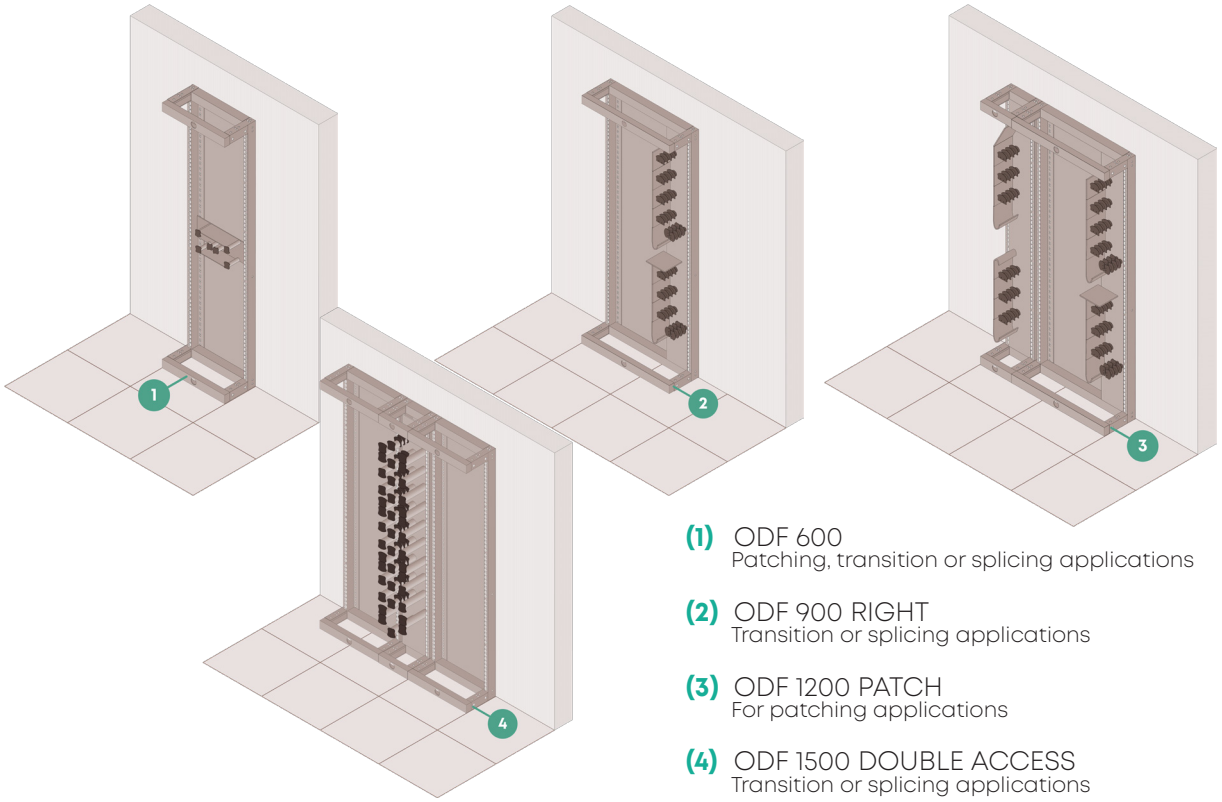

(3) **NGR 900**
Single 37U or 46U mounting space and integrated RIGHT patch cord management

(4) **NGR 1500**
Two 46U mounting spaces with central patch cord management

NGR footprint (bottom view)

NGR standard applications

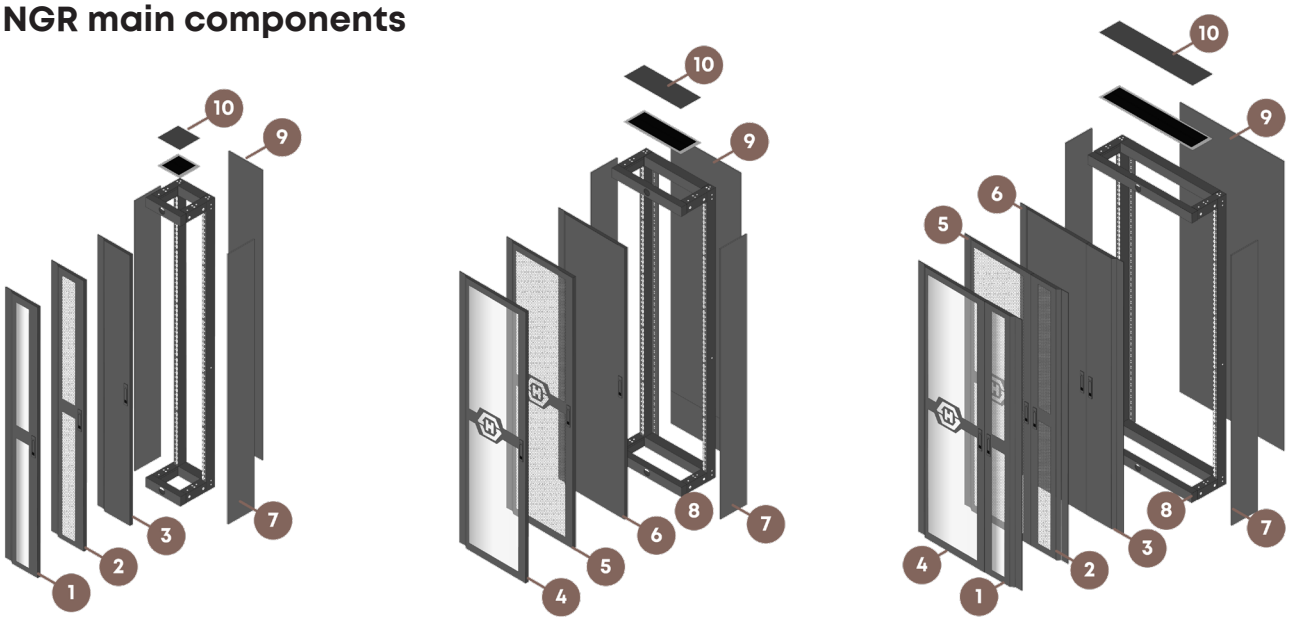

(1) ODF 600
Patching, transition or splicing applications

(2) ODF 900 RIGHT
Transition or splicing applications

(3) ODF 1200 PATCH
For patching applications

(4) ODF 1500 DOUBLE ACCESS
Transition or splicing applications

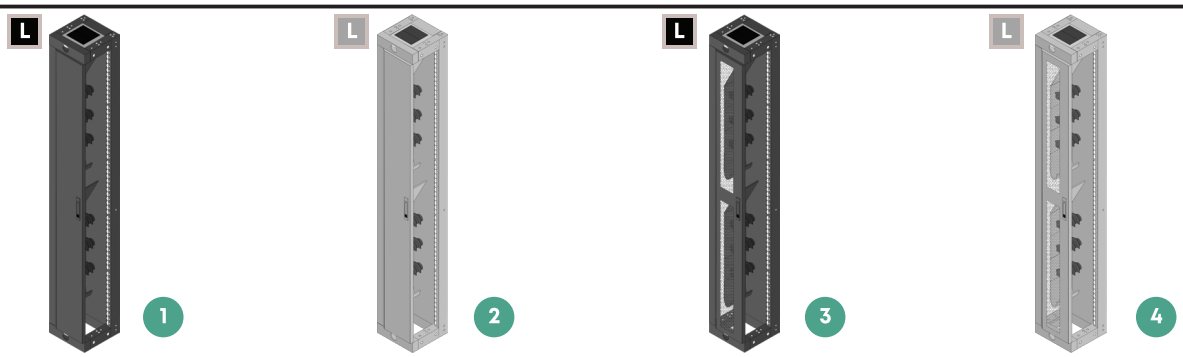

NGR main components

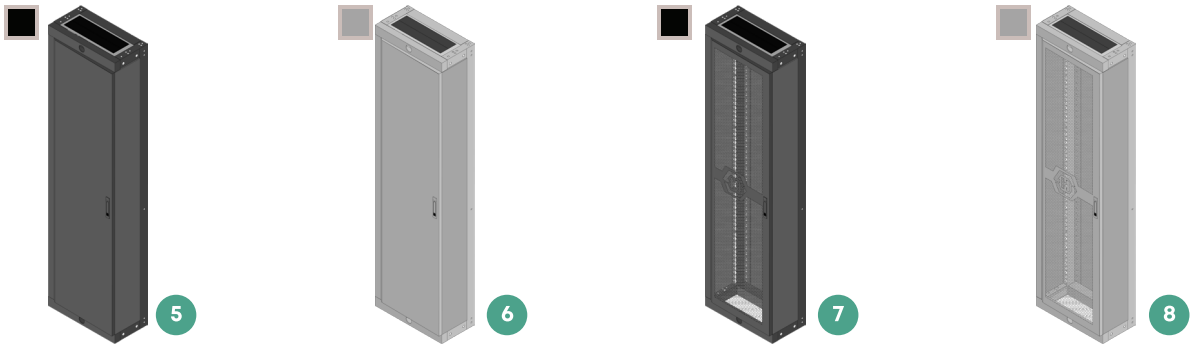

(1) 300 mm safety-glass flat door (on request)
(2) 300 mm perforated flat door
(3) 300 mm solid flat door
(4) 600 mm safety-glass flat door (on request)
(5) 600 mm perforated flat door
(6) 600 mm solid flat door
(7) Side walls
(8) C-shape frame (steel)
(9) Back wall
(10) Brush or solid top cover

Pre-configured NGR

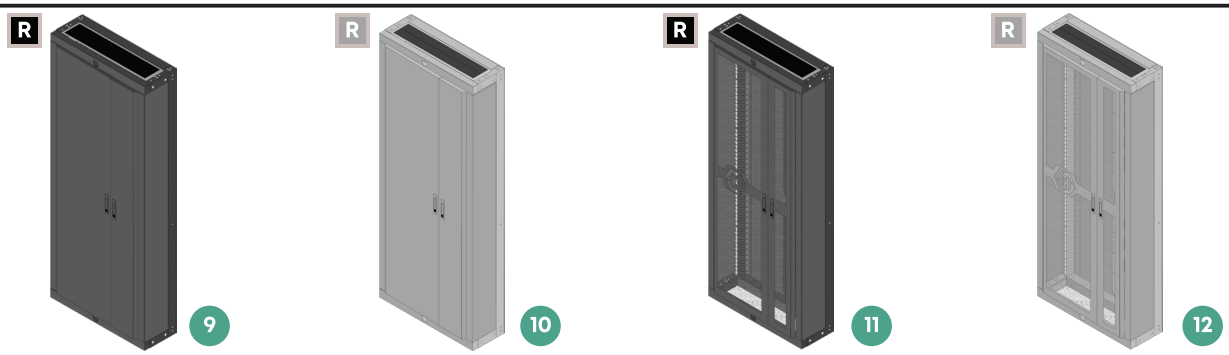

NGR 300 with left (L) patch cord management

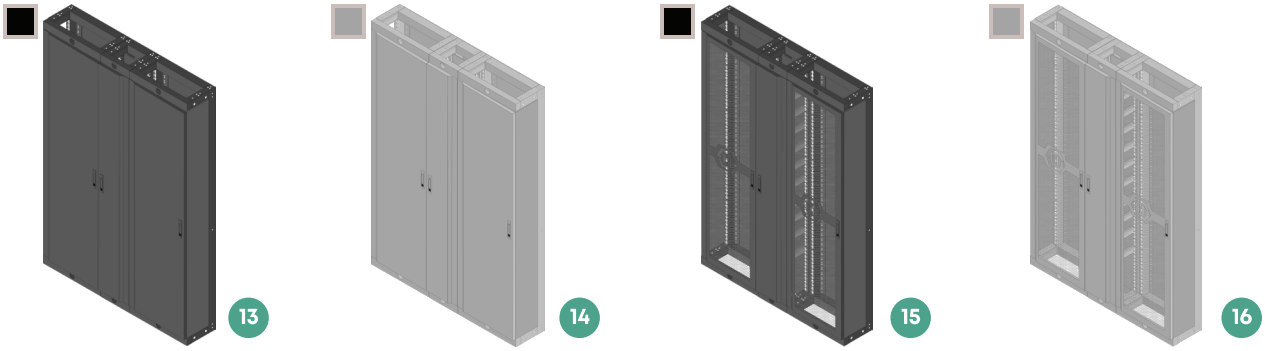

NGR 600 without patch cord management

NGR 900 with integrated right(R) patch cord management

NGR 1500 with central patch cord management

Custom NGR

Order code NGR

1 Rack type

NG03	NGR 300 mm
NG06	NGR 600 mm
NG09	NGR 900 mm

2 Rack height

18	NGR 1800 mm, 37U
22	NGR 2200 mm, 46U

3 Configuration

P	for NG03 : trunk / patch cord management
S	for NG06 and NG09: standard configuration

4 Cable entry

T	top cable entry
U	bottom cable entry

NGR's mandrel positioning will be slightly different, see examples

5 Doors configuration

000	no doors equiped
xxx	see door selection options

6 Back wall

B0	no back wall
B1	back wall full height
B2	back wall 4U shortened (for back to back patching)

7 Side wall

S00	no side walls
S10	Only one side wall included
S11	Both side walls (left + right) included

8 Top cover

R0	no top cover
R1	top cover with brushes
R2	solid top cover

9 Rack fixation

C0	no rack fixation kit included
C1	wall fixation kit
C2	ceiling fixation kit, 1000 mm
C3	ceiling fixation kit, 1000 mm + wall fixation kit
C4	concrete floor fixation kit
C5	raised floor fixation kit

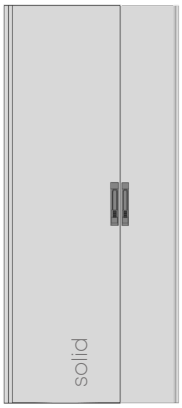

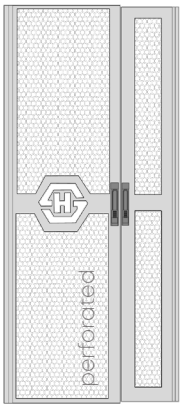

10 Colour

A	grey colour
B	black colour

11 Various assembly options

xxxxx	The rack can be additionally pre-equipped with accessories, such as breakout plates, chassis or protection tubes.
oo00A	Add this in the end of the order code for a rack without any pre-equipped accessories

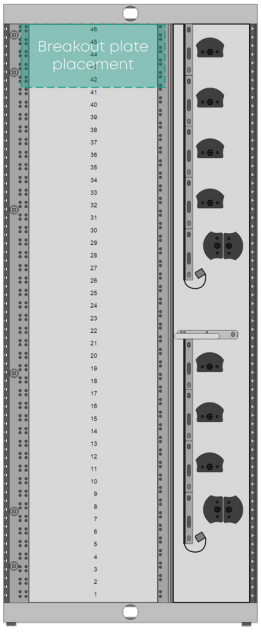

NGR door selection options

	NGR 300 mm		NGR 600 mm		NGR 900 mm	
						
no lock[1]	100	700	010	070	011	077
with lock	200	800	020	080	022	088

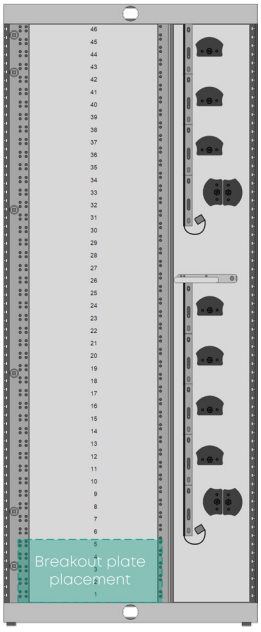

1 It is possible to upgrade the door with lock at later stage

Cable entry variants

T Top entry

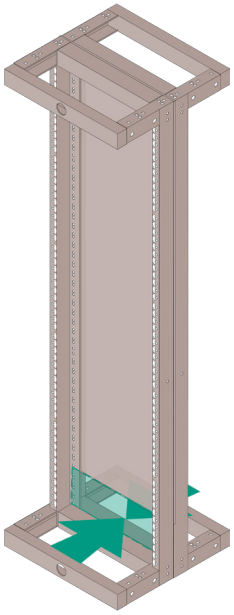

U Bottom entry

Back wall options

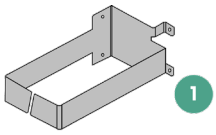

Shortened back wall allows to patch between rack placed back to back

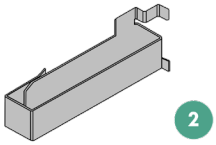

NGR accessories

NGR cable management accessories

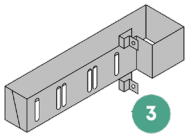

Some accessories are mounted in pre-configured or custom NGR but can be ordered separately if necessary

Application specific NGR

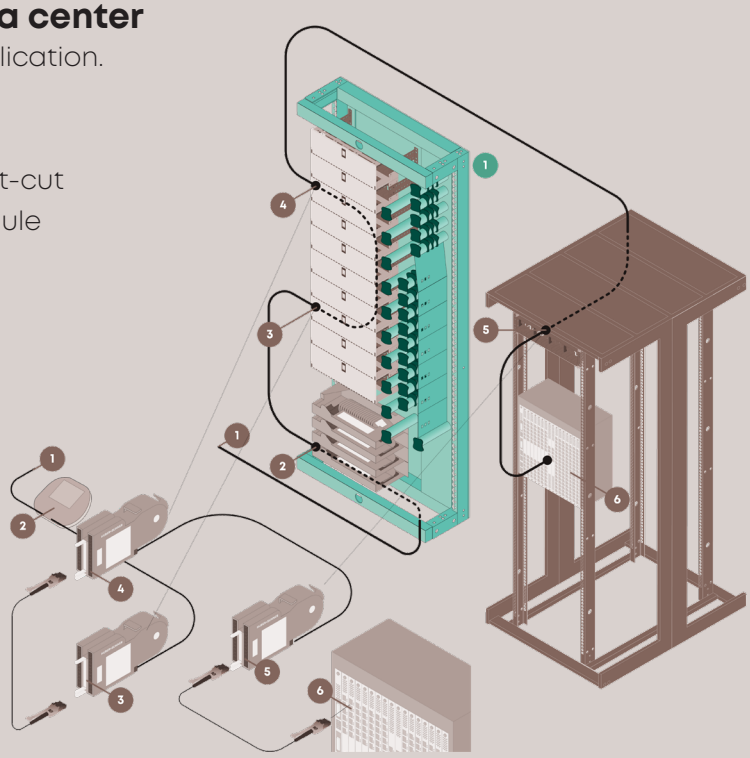

ODF SYLFA HD for telecom data center

Specific NGR 900 in ODF SYLFA HD application.

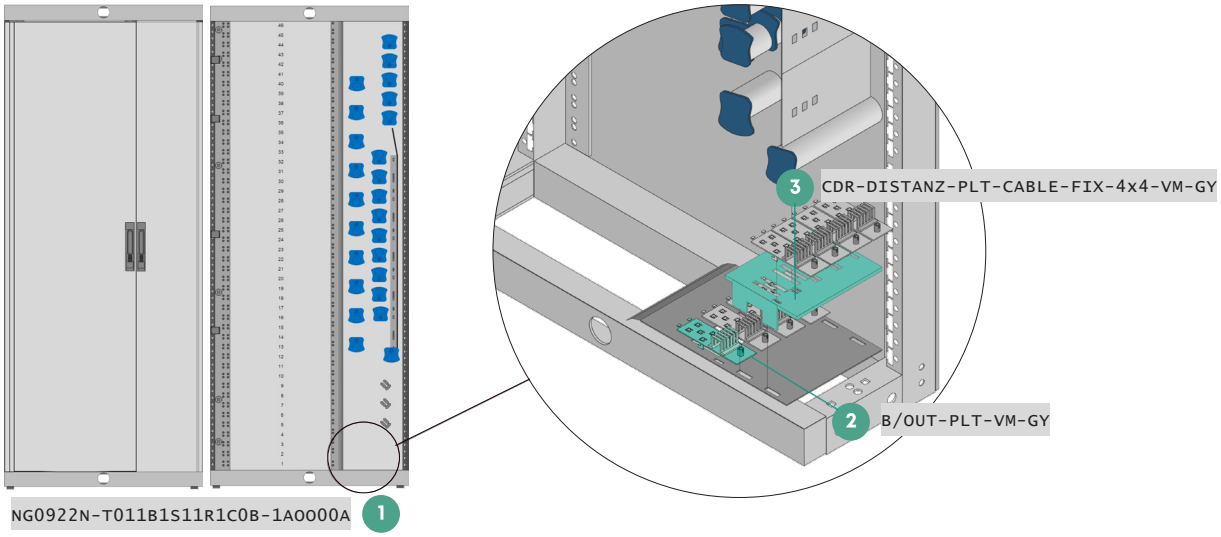

(1) Outside plant cable
(2) Splice point in CTS chassis
(3) Optipack SYLFA HD module to blunt-cut
(4) Optipack SYLFA HD module to module
(5) SYLFA HD 19 inch patch panel

Example of ODF SY-HD

NGR 900 for ODF SYLFA HD

Ordering information

#	Item number	Descriptive code	Item text	LT
1	85158574	NG0922N-T011B1S11R1C0B-1AOO00A	Specific NGR 900, 2200 mm, for ODF SYLFA HD application, up to 2880 fibers, solid doors, for 4 CUBs, grey	
2	85143212	B/OUT-PLT-VM-GY	Modular CUB (cable breakout), maximum 8 per ODF	
3	85143210	ODF-DISTANZ-PLT-CABLE-FIX-4x4-VM-GY	Extension plate for CUBs, to put 4 additional CUB to the ODF	

NGR 300 for trunk slack management (aliminium mandrels)

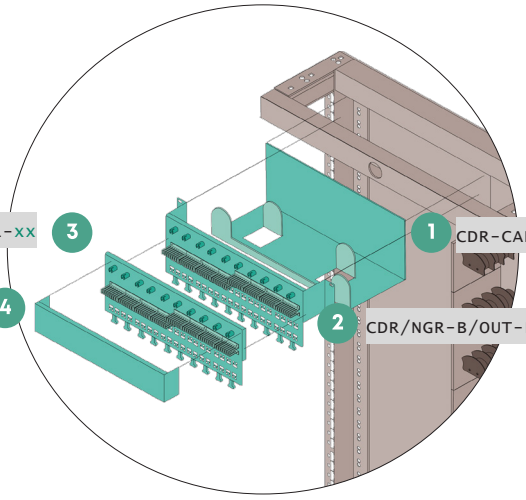

Ordering information

#	Item number	Descriptive code	Item text	LT
1	85141279	NG0322N-T200B1S00R1C1B-1AOO00A	NGR 300, 2200 mm, LEFT trunk cable management with top entry, grey, solid doors	
2	85159350	NG0322N-T200B1S00R1C1B-1BOO00A	NGR 300, 2200 mm, LEFT trunk cable management with top entry, black, solid doors	
3	85141278	NG0322N-T002B1S00R1C1B-1AOO00A	NGR 300, 2200 mm, RIGHT trunk cable management with top entry, grey, solid doors	
4	85159349	NG0322N-T002B1S00R1C1B-1BOO00A	NGR 300, 2200 mm, RIGHT trunk cable management with top entry, black, solid doors	

Racks | CDR or NGR breakout plates

Breakout plate 19 inch CDR/NGR, large

Top or bottom mounting

optional
CDR/NGR-B/OUT-PLT-19"-SL-xx (3)

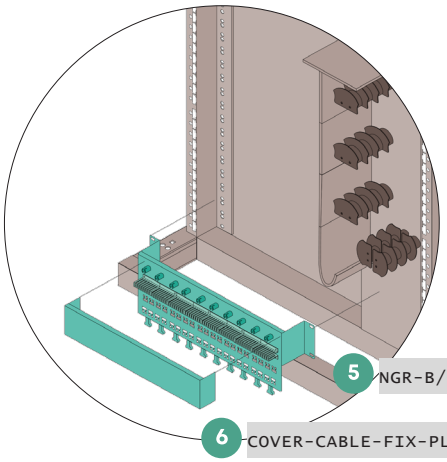

optional
CDR/NGR-B/OUT-PLT-19"-COVER-xx (4)

Required only for top mounting
(1) CDR-CABLE-TROUGH-UNI-19"-xx

(2) CDR/NGR-B/OUT-PLT-19"-xx

Breakout plate 19 inch CDR/NGR, small

Top or bottom mounting

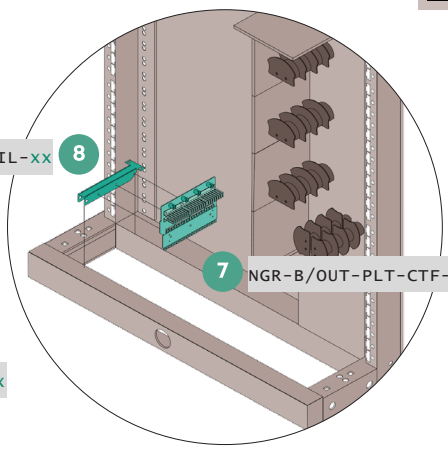

(5) NGR-B/OUT-PLT-CTF-19"-10CSM-xx

(6) COVER-CABLE-FIX-PLATE-19"-xx

Breakout plate 300, NGR only

Top or bottom mounting

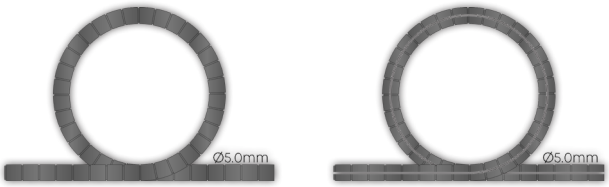

(8) NGR-CABLE-FIXING-PLT-RAIL-xx

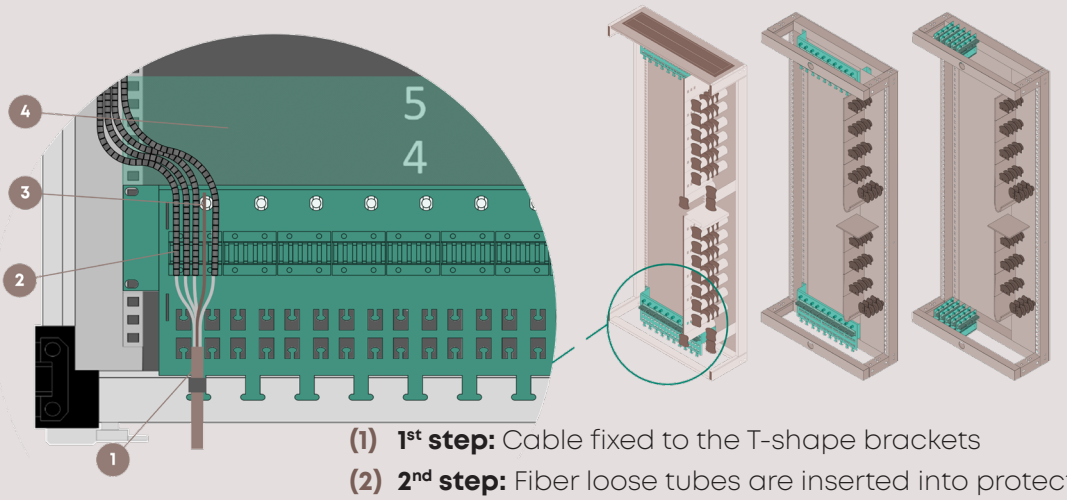

(7) NGR-B/OUT-PLT-CTF-300-4CSM-xx

Optical fiber protection tube (OFPT), ⌀5 mm

Protection tubes with different design and colour

Example of loose tube cable termination to the breakout plate in ODF LISA 900

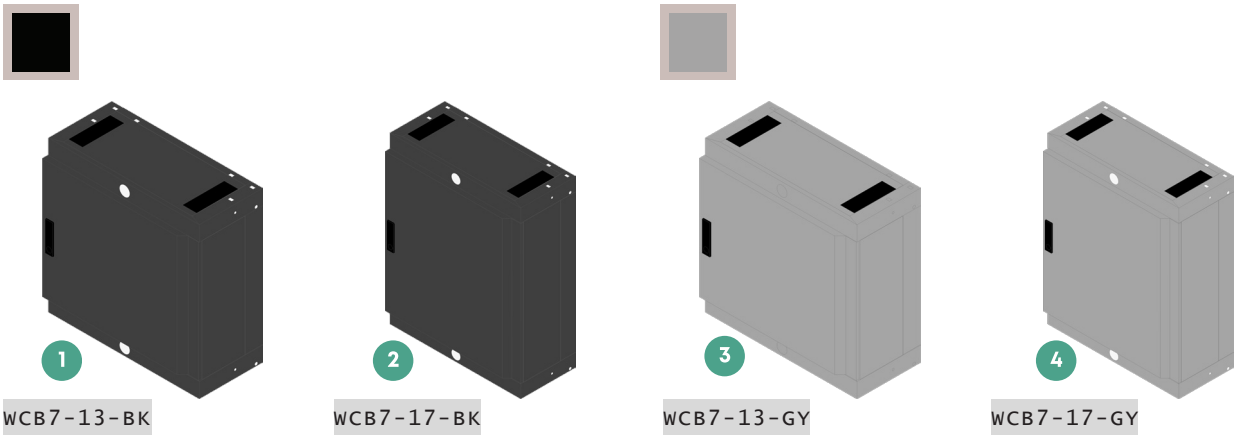

(1) **1st step:** Cable fixed to the T-shape brackets
(2) **2nd step:** Fiber loose tubes are inserted into protection tubes
(3) **3rd step:** Central strength member (CSM) fixed
(4) Reserved 2U space for protection tube distribution

LISA chassis overview

LISA chassis capacity

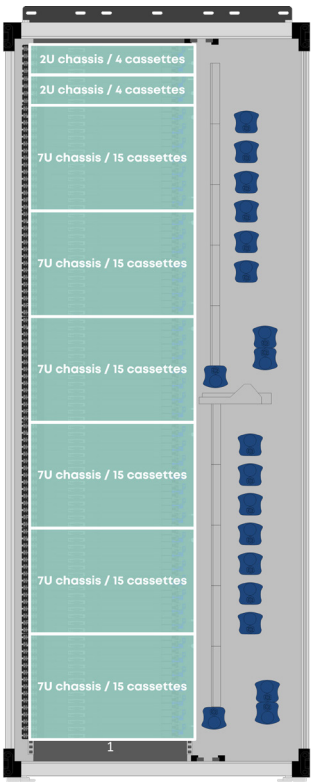

Height	Chassis per 900mm rack and used space	Number of cassettes per chassis	Number of fibers and duplex ports per full ODF	
			24-way cassette Basic version	36-way cassette High-density version
1U	46x / 46U	2	2208 fibers / 1104 ports	3312 fibers / 1656 ports
2U	23x / 46U	4		
3U	15x / 45U*	6	2160 fibers / 1080 ports	3240 fibers / 1620 ports
6U	7x / 42U*	12	2016 fibers / 1008 ports	3024 fibers / 1512 ports
7U (HD)	6x / 42U*	15	2160 fibers / 1080 ports	3240 fibers / 1620 ports

* It is possible to mix various chassis inside the rack to achieve higher density

Maximum ODF LISA capacity

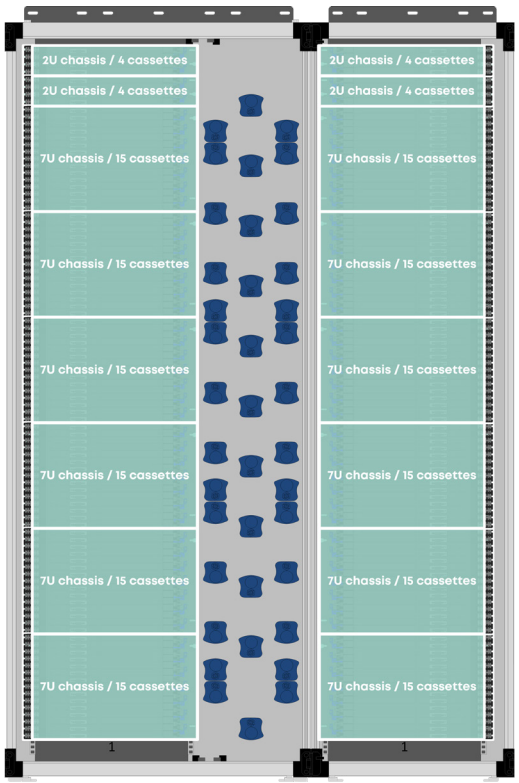

ODF LISA 900 LEFT:

- 6x 7U chassis
- 2x 2U chassis
- 98 cassettes
- 3528 fibers
- 1764 duplex ports

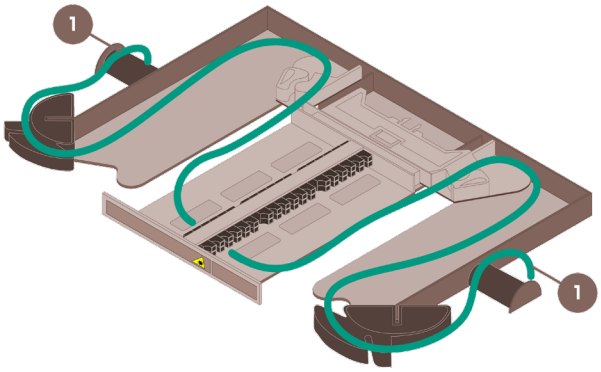

ODF LISA 1500 DOUBLE ACCESS:

- 12x 7U chassis
- 4x 2U chassis
- 196 cassettes
- 7056 fibers
- 3528 duplex ports

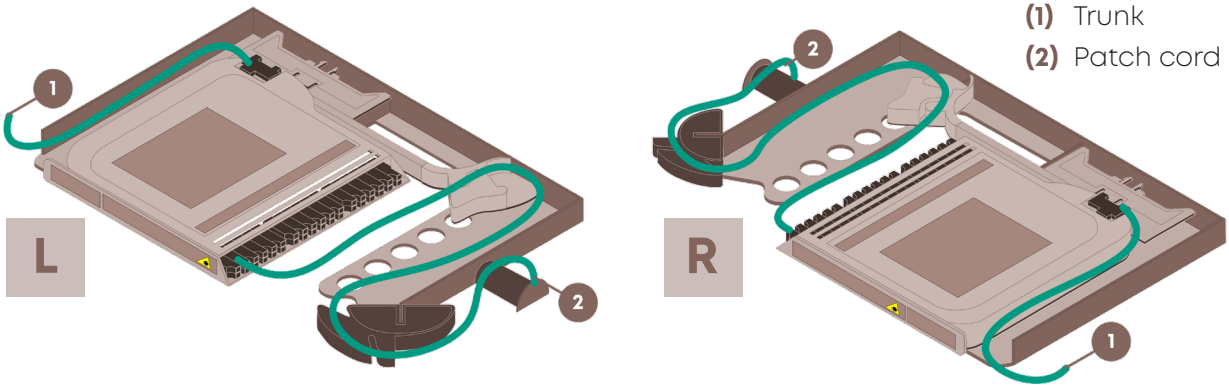

Chassis types for patching applications

(1) Trunk or patch cord

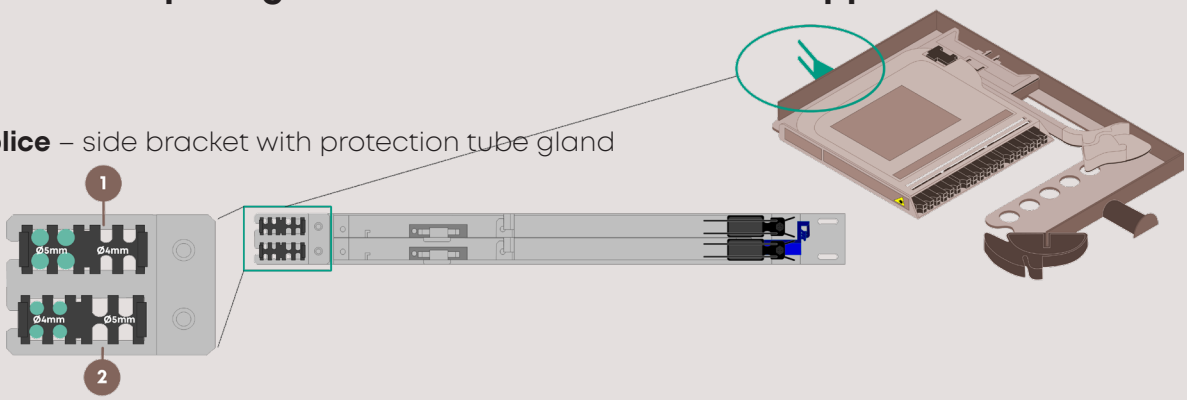

Chassis types for transition or splicing applications

(1) Trunk
(2) Patch cord

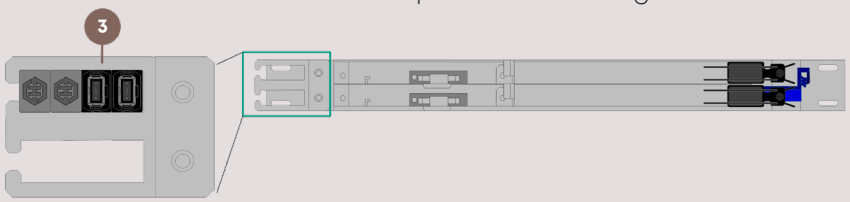

Transition/splicing universal chassis for various applications

Splice – side bracket with protection tube gland

Transition – side bracket without protection tube gland

Ribbon splice – no side bracket

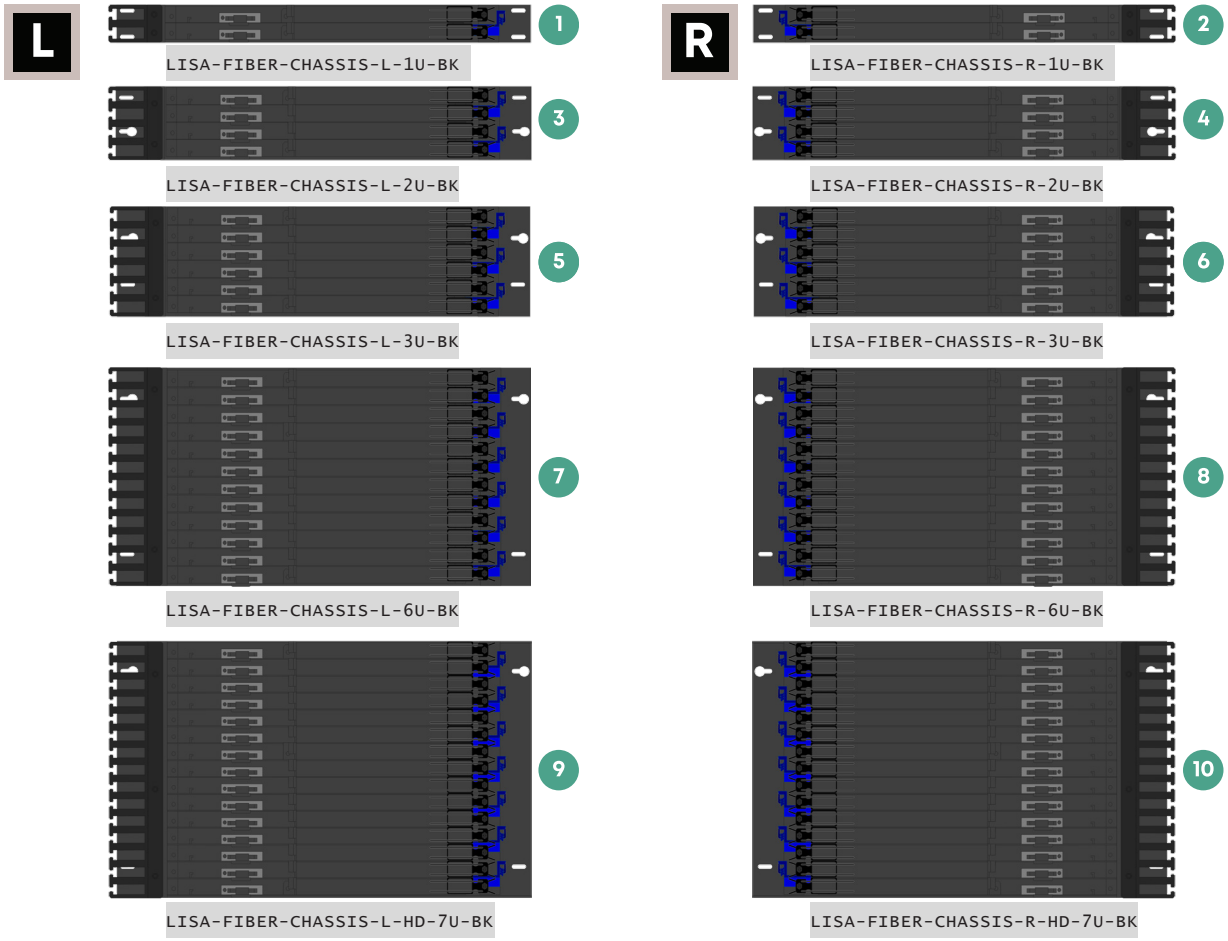

(1) 4x Ø5 mm per cassette
- Ø5 mm protection tubes
- Ø4.9 mm / Ø5 mm cable

(2) 4x 4 mm per cassette:
- Ø4 mm protection tubes
- Ø4 mm cable

(3) Max. 4x MTP adapters

SYLFA HD chassis overview

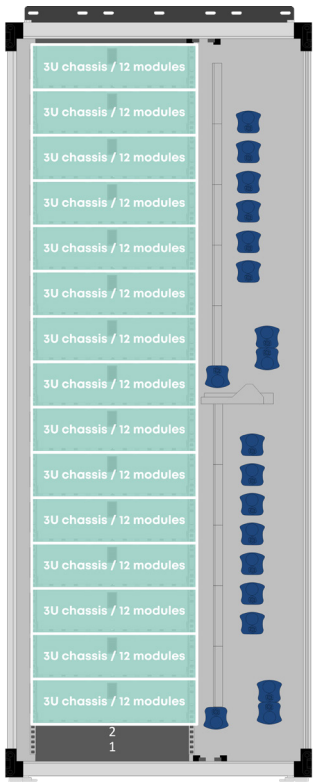

SYLFA HD chassis capacity

Height	Chassis per 900mm rack and used space	Number of modules per chassis	Number of fibers and duplex ports per full ODF 24-way module
3U	15x / 45U	12	4320 fibers / 2160 ports

Maximum ODF SYLFA HD capacity

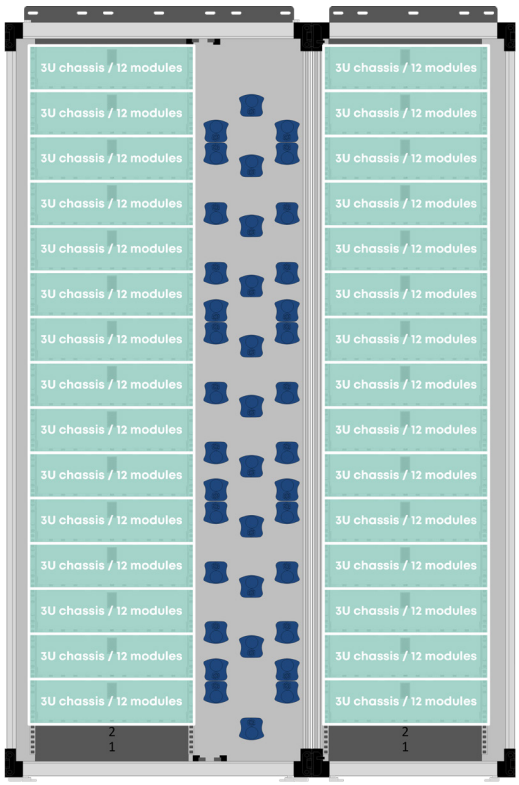

ODF SYLFA HD 900 LEFT:

- 15x 3U chassis
- 180 modules
- 4320 fibers
- 2160 duplex ports

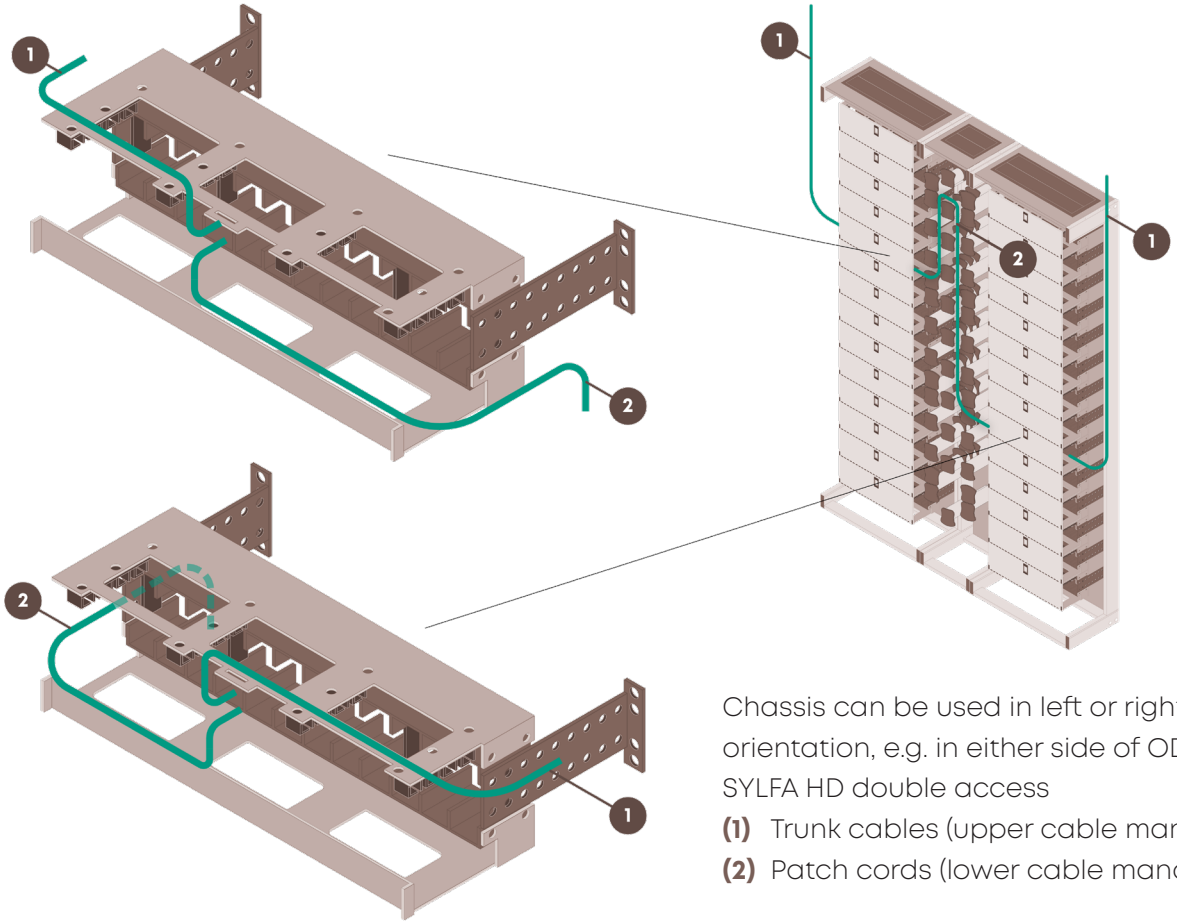

ODF SYLFA HD double access:

- 30x 3U chassis
- 360 modules
- 8640 fibers
- 4320 duplex ports

SYLFA HD chassis orientation

Chassis can be used in left or right orientation, e.g. in either side of ODF
SYLFA HD double access

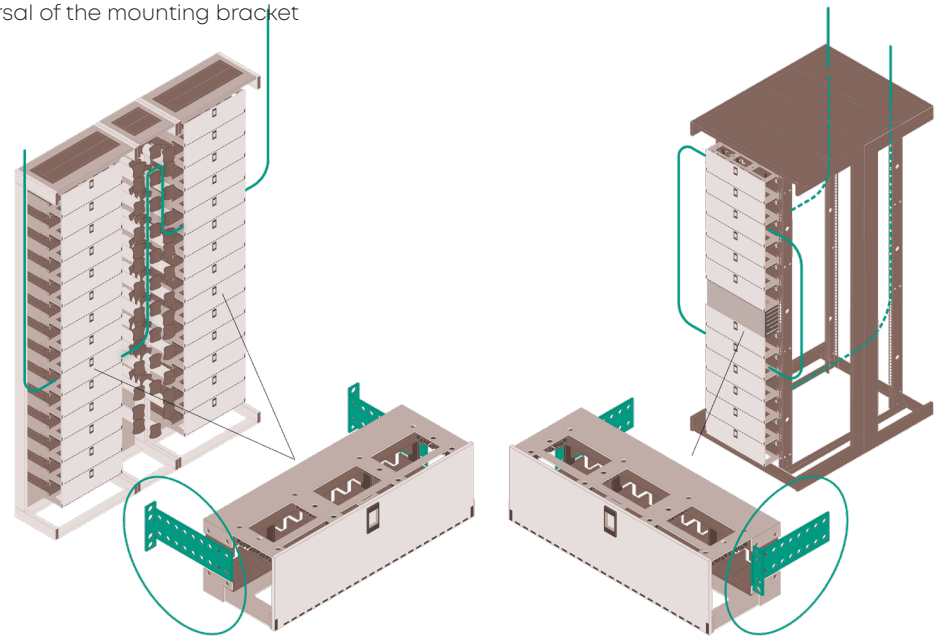

(1) Trunk cables (upper cable manager)

(2) Patch cords (lower cable manager)

SYLFA HD chassis for 19 inch cabinets

The same chassis* can be used in ODF 300mm or 19 inch cabinets.

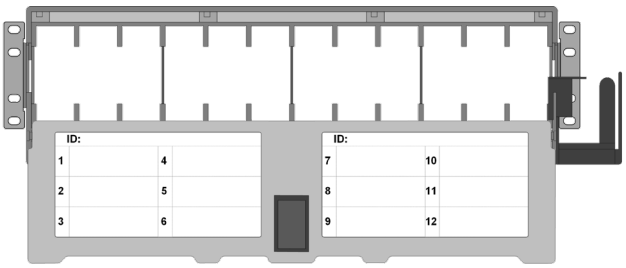

* Requires a reversal of the mounting bracket

Cable termination chassis (CTS) overview

ODF application example

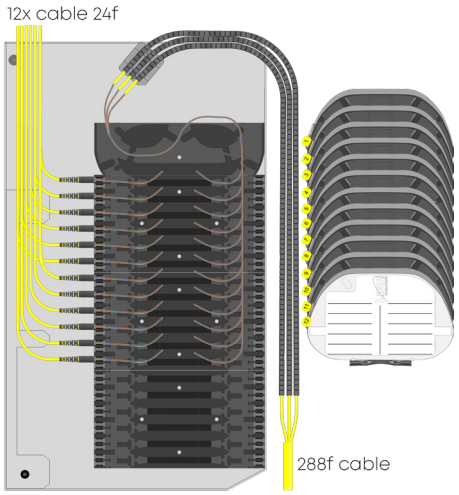

ODF CTS splice to patch, 1440 fibers

(1) 5x 288f Optipack breakout cables
(2) 60x 24f Optipack in-rack harness, patched to 60x LISA patch cassettes
(3) 5x CTS chassis 2U each, total 10U, 1440 splices, see CTS application examples

CTS application example 1

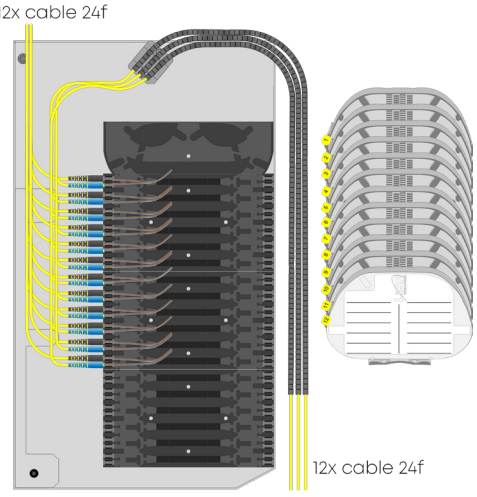

From 288f Optipack breakout cable **to** 12x 24f Optipack non-ruggedised, ruggedised or cable or trunk

Bill of materials:
- 1x CTS chassis
- 12x Single sided cassettes
- 12x Set of 1x splice comb with 24x heatshrinks
- 12x Large cassette cover
- 12x Set of cable relief clamp (CRC)+ black boot
- 5 m protection tube Ø5 mm
- Cassette marking

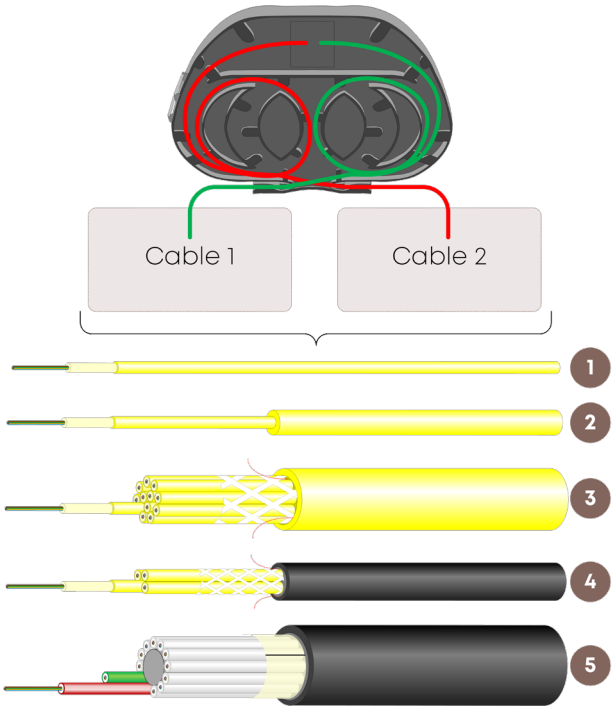

CTS application example 2

From 12x 12f Optipack non-ruggedised, ruggedised cable or trunk **to** 12x 12f Optipack non-ruggedised, ruggedised cable or trunk

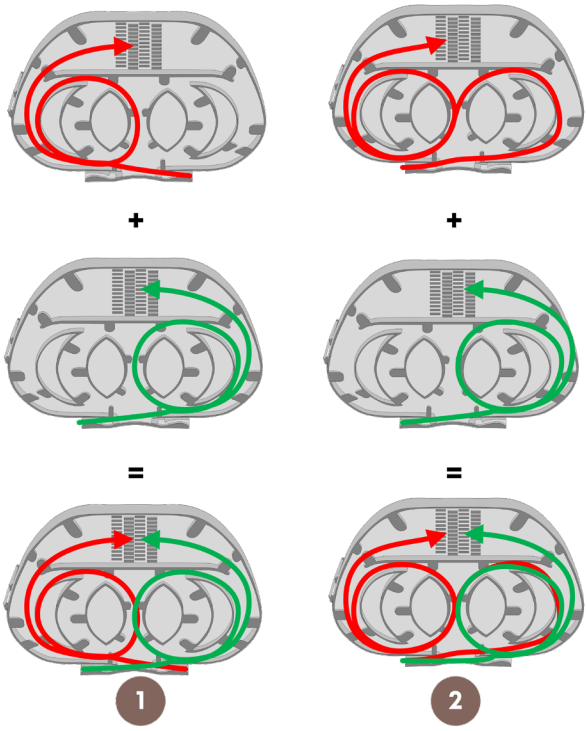

Bill of materials:
- 1x CTS chassis
- 12x Double sided cassettes
- 12x 24x heatshrinks
- 12x Large cassette cover
- 12x Set of CRC + black boot
- 12x Set of CRC + blue boot
- 5 m protection tube Ø5 mm
- Cassette marking

CTS compatible cables

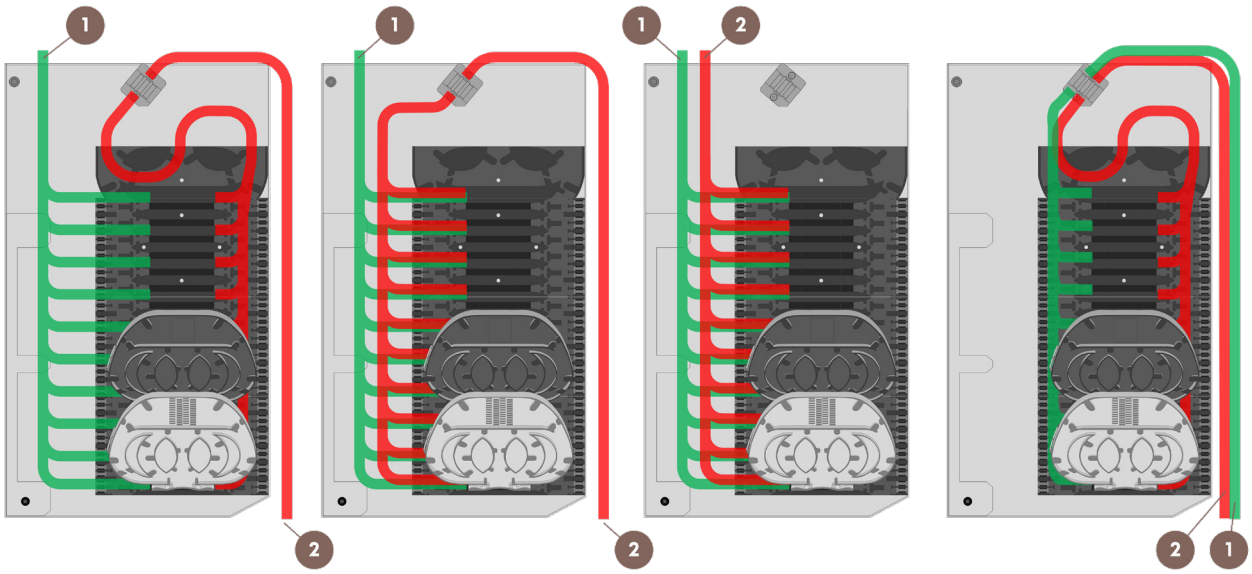

(1) Patch or ruggedised trunk cable
(2) Double jacket trunk cable
(3) Optipack breakout cable
(4) Optipack universal cable
(5) Loose tube cable

Fiber pathways inside a cassette

(1) Entering cassette from **two** sides
(2) Entering cassette from **one** sides

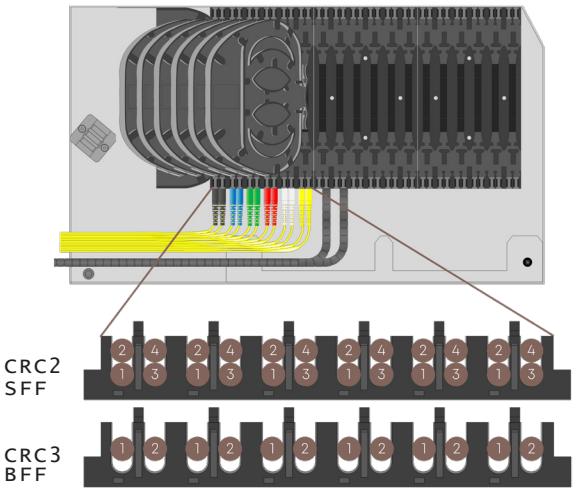

CTS compatible cables

(1) Cable 1 (e.g. patch cable)

(2) Cable 2 (e.g. trunk cable)

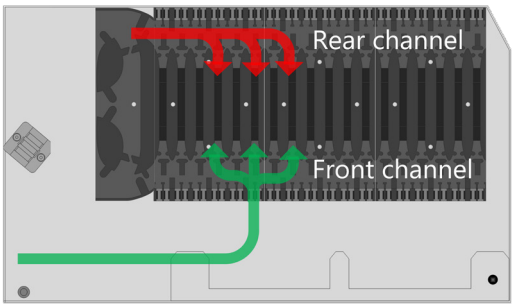

Cassette base entries

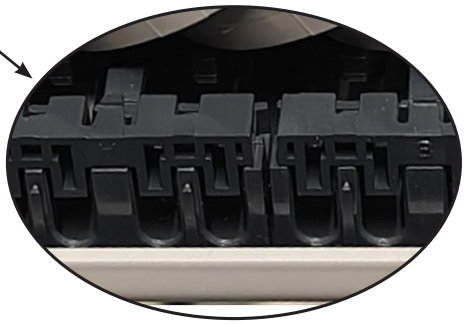

Per one cassette:

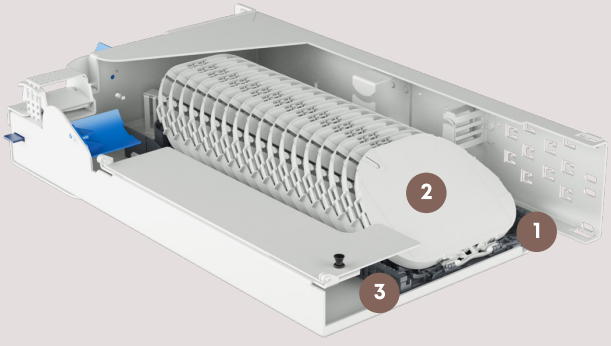

- 4x Ø5 mm protection tube
- 2x CRC sleeves BFF
- 4x CRC sleeves SFF

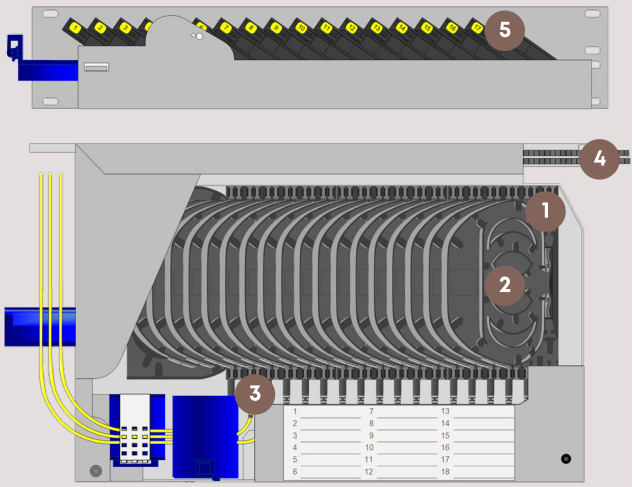

Cassette base fiber routing

CTS chassis components

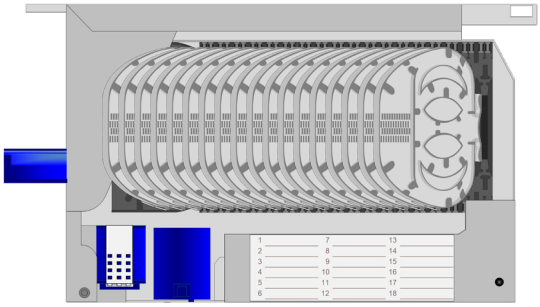

(1) Chassis
(2) Splice cassettes
(3) Cable relief clamps and boots
(4) Protection tubes

LISA ODU

LISA ODF and LISA ODU application

LISA ODU **(1)** is the 19 inch patch panel which can be installed in any generic 19" rack or cabinet **(2)** or in LISA ODF and allows to use LISA cassettes **(3)**.

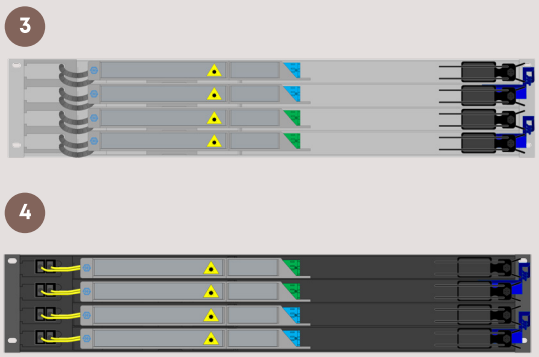

LISA ODU capacity

Patch panel type	Number of cassettes	24-way cassette	36-way cassette
LISA ODU 1U	2	48 fiber / 24 ports	72 fiber / 36 ports
LISA ODU 2U	4	96 fiber / 48 ports	144 fiber / 72 ports
LISA ODU 3U	6	144 fiber / 72 ports	216 fiber / 108 ports

LISA ODU examples

IANOS overview

IANOS application

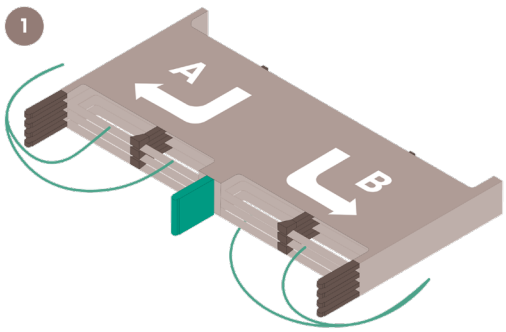

IANOS **(1)** is a 19 inch patch panel which can be installed in any generic 19" rack or cabinet **(2)** and allows to use different IANOS modules.

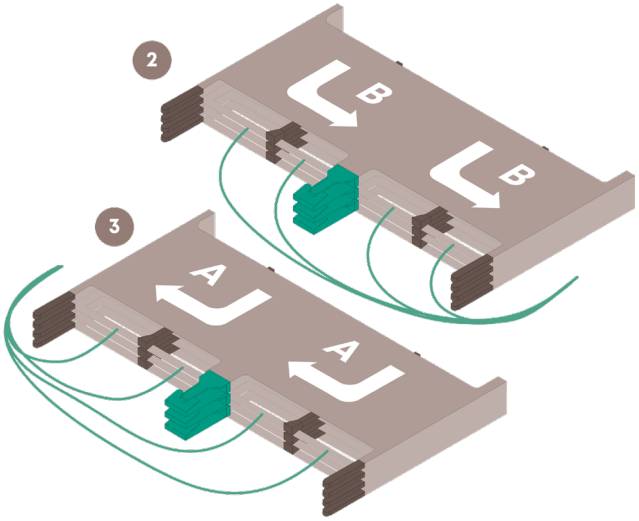

IANOS capacity and comparison

Patch panel type	Number of single modules and maximum fiber capacity	Number of double modules	Design	Door
IANOS 1U standard	12 / 144 fibers	6 / 144 fibers	Sliding	Left + Right door with labels
IANOS 4U standard	48 / 576 fibers	24 / 576 fibers		
IANOS 1U lite	8 / 96 fibers	4 / 96 fibers	Fixed	

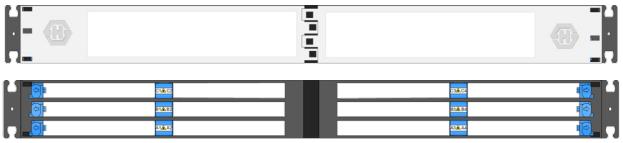

Combined or diverse paths with IANOS layer clip

With IANOS 1U standard and IANOS 4U standard possible various patching paths:
(1) dual paths (no layer clip)
(2) single path B
(3) single path A

IANOS cable manager principals

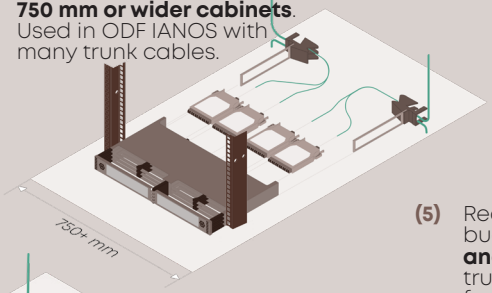

(1) Integral patch cord manager with no additional front cable manager, applicable **for 600 mm and wider cabinets.**

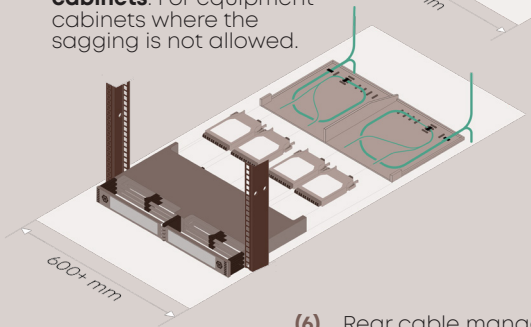

(2) Front cable manager, applicable **for 750 mm or wider cabinets**. Enables guiding of the patch cord to the vertical cavity of the cabinet.

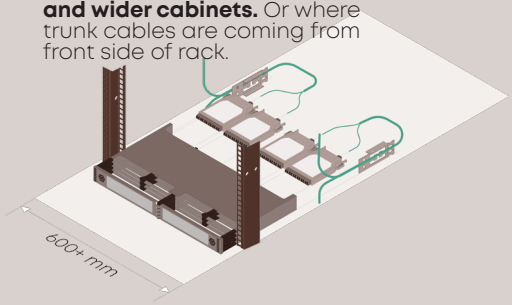

(3) Rear cable manager, **for 750 mm or wider cabinets**. Used in ODF IANOS with many trunk cables.

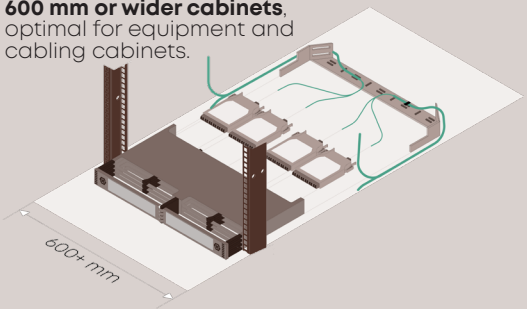

(4) Rear cable manager **for 600 mm or wider cabinets**. For equipment cabinets where the sagging is not allowed.

(5) Rear tie-off cable manager budgetary variant. **For 600 mm and wider cabinets.** Or where trunk cables are coming from front side of rack.

(6) Rear cable manager **for 600 mm or wider cabinets**, optimal for equipment and cabling cabinets.

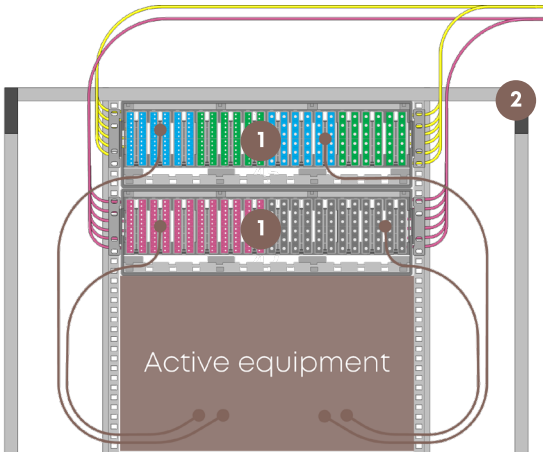

SYLFA HD

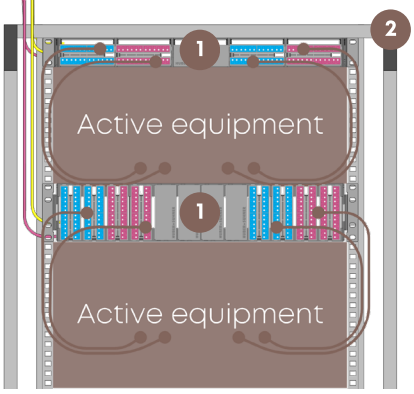

SYLFA HD application

SYLFA HD **(1)** is the 19 inch modular patch panel which can be installed in any generic 19 inch rack, cabinet **(2)** or 300 mm rack **(3)** and allows to use different SYLFA HD modules.

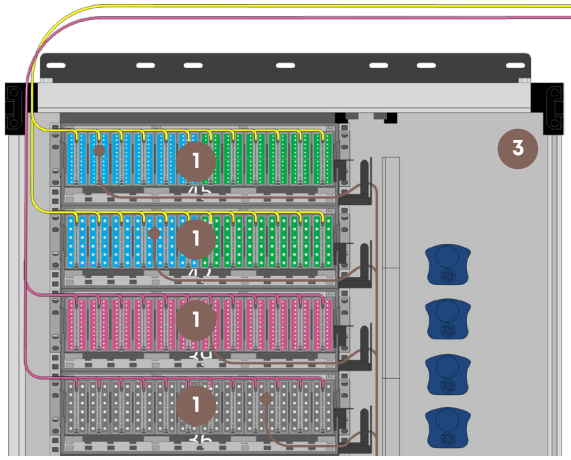

ODF SYLFA HD in 19 inch cabinet

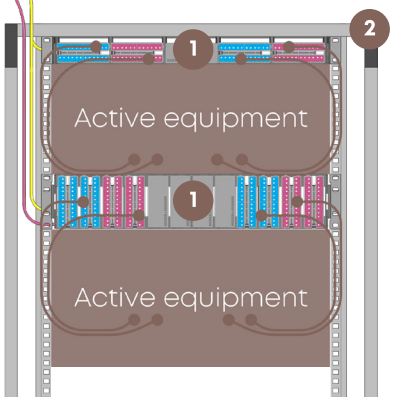

SYLFA HD 19 inch patch panels

Parking panel

Parking panel applications

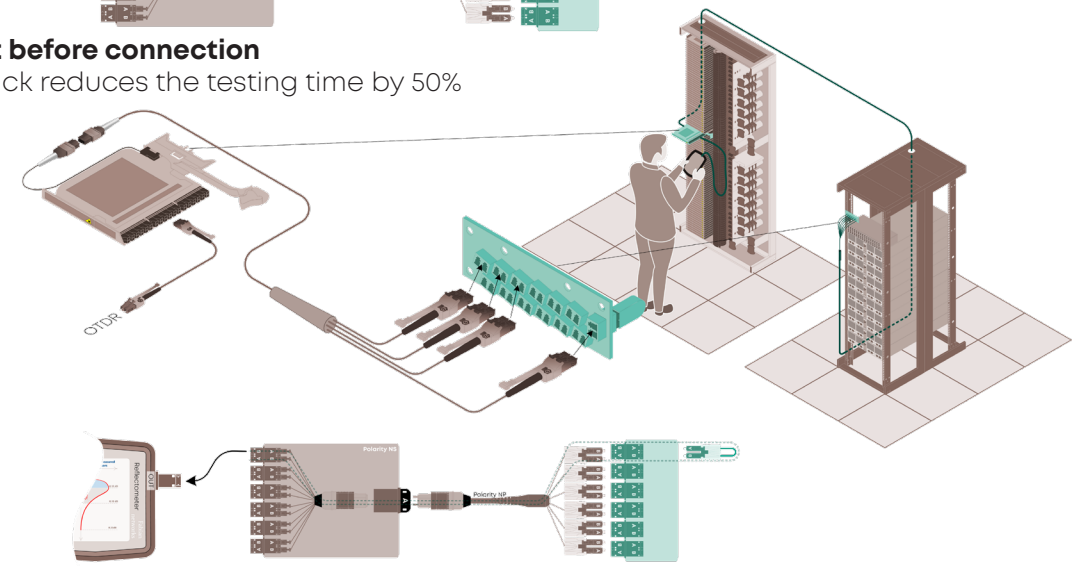

(1) Pre-cable and park

The parking panel makes it possible to park unused connectors of the pre-cabled cable systems in an orderly and clear manner until they are used for connection to equipment.

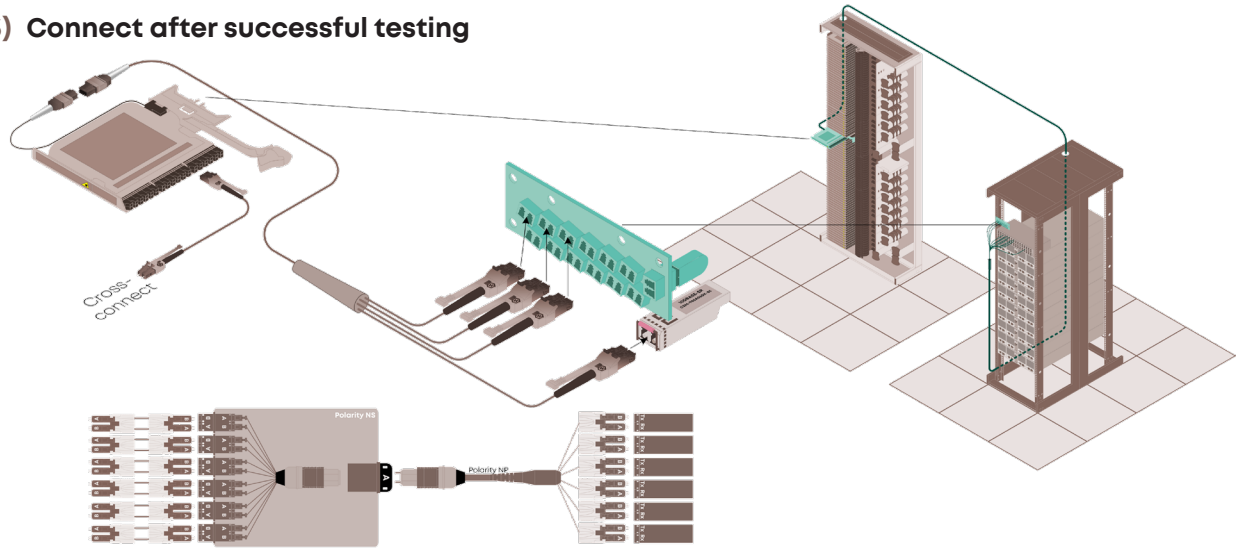

(2) Test before connection

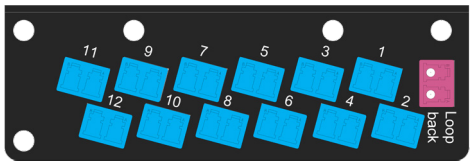

Loopback reduces the testing time by 50%

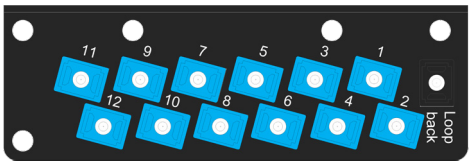

(3) Connect after successful testing

LISA LEFT and RIGHT cassettes

L

LEFT cassette

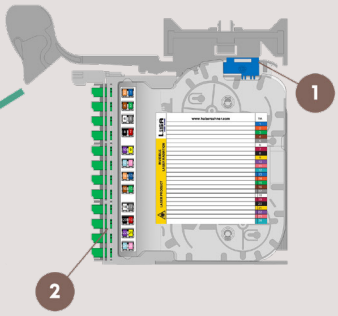

LISA **LEFT** cassette is oriented in the way that the incoming cables **(1)** enter cassette from the left side and patch field **(2)** is on the right side.

R

RIGHT cassette

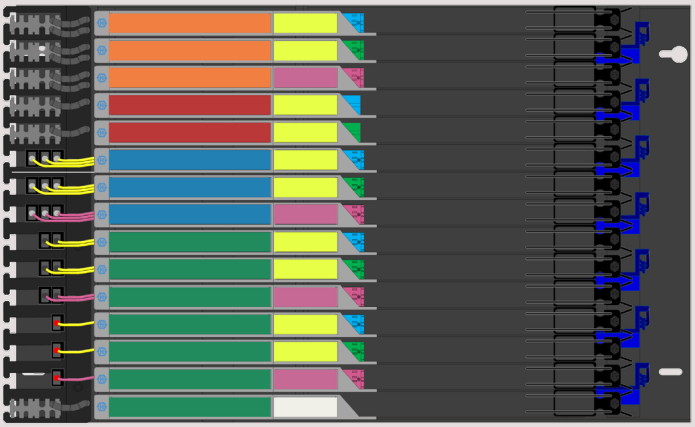

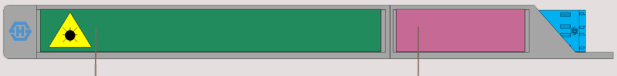

LISA **RIGHT** cassette is oriented in the way that the incoming cables **(1)** enter cassette from the right side and patch field **(2)** is on the left side.

Warning
LEFT cassettes should be only used in combination with **LEFT** LISA chassis, and **RIGHT** cassettes should be only used in combination with **RIGHT** LISA chassis.

LISA cassette colour differentiation labelling

LISA cassettes are supplied with 2 sets of colour strips that can be inserted in the label holder.

1 Larger label 2 Smaller label

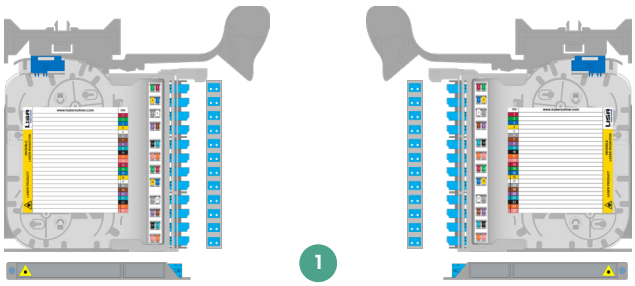

Strip colour	Example of use
RAL 6024 Traffic Green RGB(34,139,94)	Horizontal cabling
RAL 2003 Pastel Orange RGB(240,127,65)	Redundant cabling
RAL 5015 Sky Blue RGB(34,128,178)	Backbone cabling
RAL 3020 Traffic Red RGB(186,56,55)	Equipment cabling
RAL 1060 Sulfur Yellow RGB(231,255,70)	Singlemode fiber
RAL 6027 Light Green RGB(130,190,186)	Multimode OM3
RAL 4003 Heather violet RGB(198,105,149)	Multimode OM4
RAL 7040 Window grey RGB(157,163,168)	Other application
RAL 9010 Pure White RGB(240,239,232)	Other application

LISA splicing through

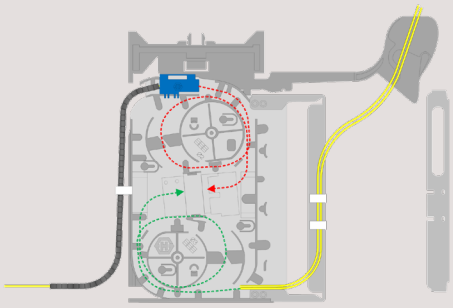

LISA splicing through cassette applications

This product allows two cables to be directly spliced, or a cable spliced to patch cables (duplex or simplex). The result splice connection is protected by the cassette which provides additional safety for critical links.

(1) Outgoing cable
(2) Incoming cable or patch cord
(3) No connector (fixation plate instead)

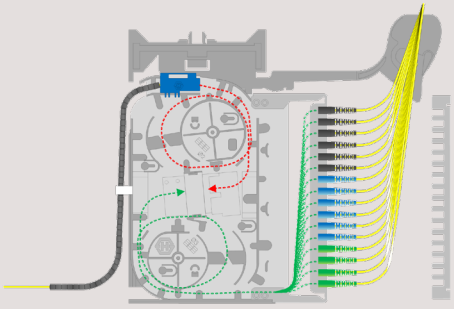

Option 1

Splicing **to multi-fiber** cables:
- max 36 splices per cassette

Option 2

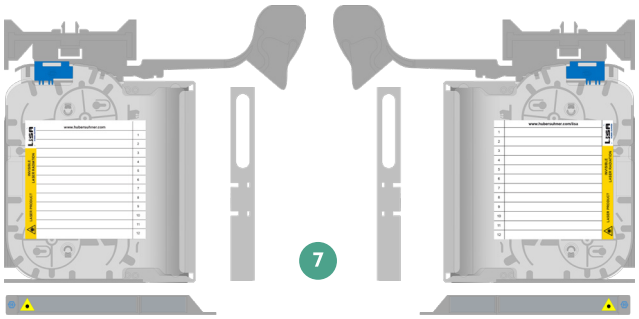

Splicing **to patch** cables:
- 16x patch cables per cassette max
- Cable relief clamps and boots not included, must be ordered separately

Order code LISA splicing

Order code LISA splicing cassette

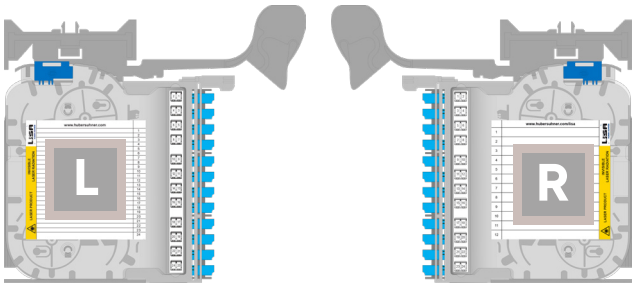

LISA splicing cassette colour code

(1) 24 fiber cassette - 2x pigtail sets
(2) 36 fiber cassette - 3x pigtail sets

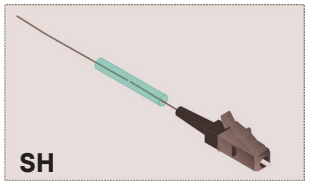

1 Orientation

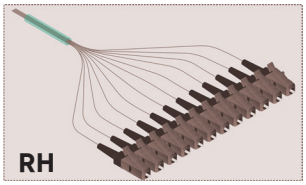

LC-L	LISA cassette LEFT	L
LC-R	LISA cassette RIGHT	R

2 Splicing method

SH	LISA cassette single (individual) pigtail splicing
RH	LISA cassette ribbon pigtail splicing

3 Connector (adapter) type

00	No adapter
88	LC UPC duplex (max 18x)
89	LC APC duplex (max. 18x)
70	SC UPC simplex (max. 12x)
73	SC APC simplex (max. 12x)
90	E-2000 UPC simplex (max. 12x)
93	E-2000 APC simplex (max. 12x)
97	E-2000 UPC duplex (max. 12x)
98	E-2000 APC duplex (max. 12x)
Xi	No adapter, multi-fiber cable splice-through
P2	No adapter, patch cable splice-through

4 Quantity

12-24

Number of pigtails
Number of pigtails shouldn't exceed possible number of connectors

Number of adapters
LISA cassette can be not fully equipped with adapters. Maximum number of adapters depends on adapter type. For example, 18x LC duplex adapters.

5 Fiber

00	No fiber (e.g. splice-through)
09	Singlemode G.652.D
54	Multimode OM4

6 Splice protector

00	No splice holder and protectors
S0	Sandwich splice protector (excl. protectors)
S1	Sandwich splice protector (incl. protectors)
H0	Heatshrink splice holder Ø1.5 x 40 mm or Ø5 x 40 mm ribbon (excl. protectors)
H1	Heatshrink splice holder Ø1.5 x 40 mm or Ø5 x 40 mm ribbon (incl. protectors)

See other splice holder and splice protector options

7 Colour code

00	No colour code - all pigtails same colour
02	DIN colour code
04	TIA colour code

See colour code overview

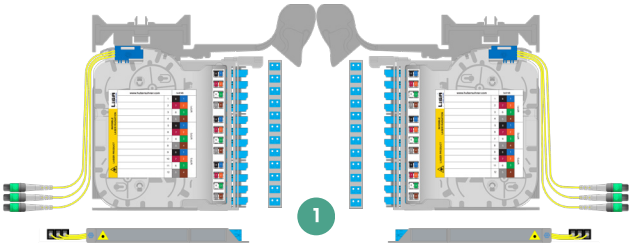

8 Optical performance

00	No fiber
S0	Class S – Singlemode standard
B0	Class B – Singlemode B
L0	Class L – Multimode low-loss
M0	Class M – Multimode standard

Optical circuit switches

POLATIS technology overview

Direct light™ technology

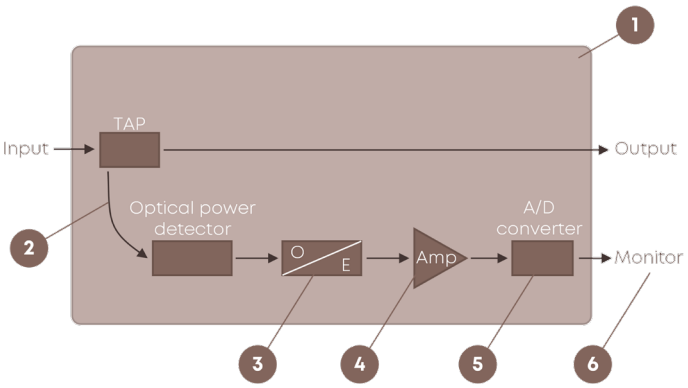

POLATIS all-optical switches (OOO) enable data center operators to make and change single or multiple cross-connects on the fly securely, remotely and from anywhere as part of an SDN-enabled network. The patented DirectLight® **(1)** beam-steering technology at the core of POLATIS optical switches makes connections between opposing arrays of input and output fibers with minimal loss, distortion or interference between paths and switching occurs completely independently of the power level, colour or direction of light on the path. POLATIS optical switches are agnostic with regard to data rates and protocols and can hold dark fiber connections.

Go to external document/link

Optical power monitoring

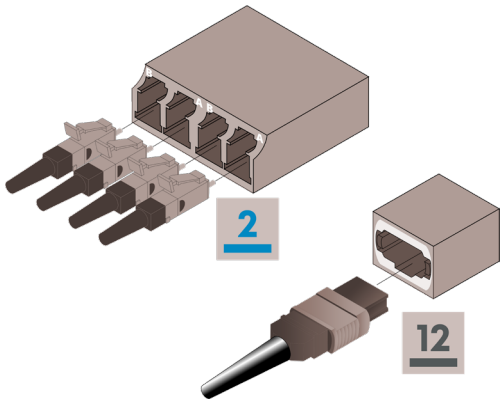

POLATIS optical switches for data centers come with an option to include optical power monitoring on the input fibers. Optical power monitoring is used where the data center operator wants to monitor either an absolute loss of signal or a relative degradation of signal over time, which might indicate an optical component is beginning to fail. The user can set alarm conditions for either application in the switch software.

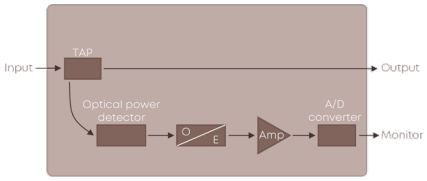

(1) Optical power monitoring
(2) is tapped off to sent to an optical detector
(3) Optical → electrical conversion
(4) Signal amplified
(5) Signal read by A/D converter
(6) Further processed for various calibration factors

Optical switch selection guide

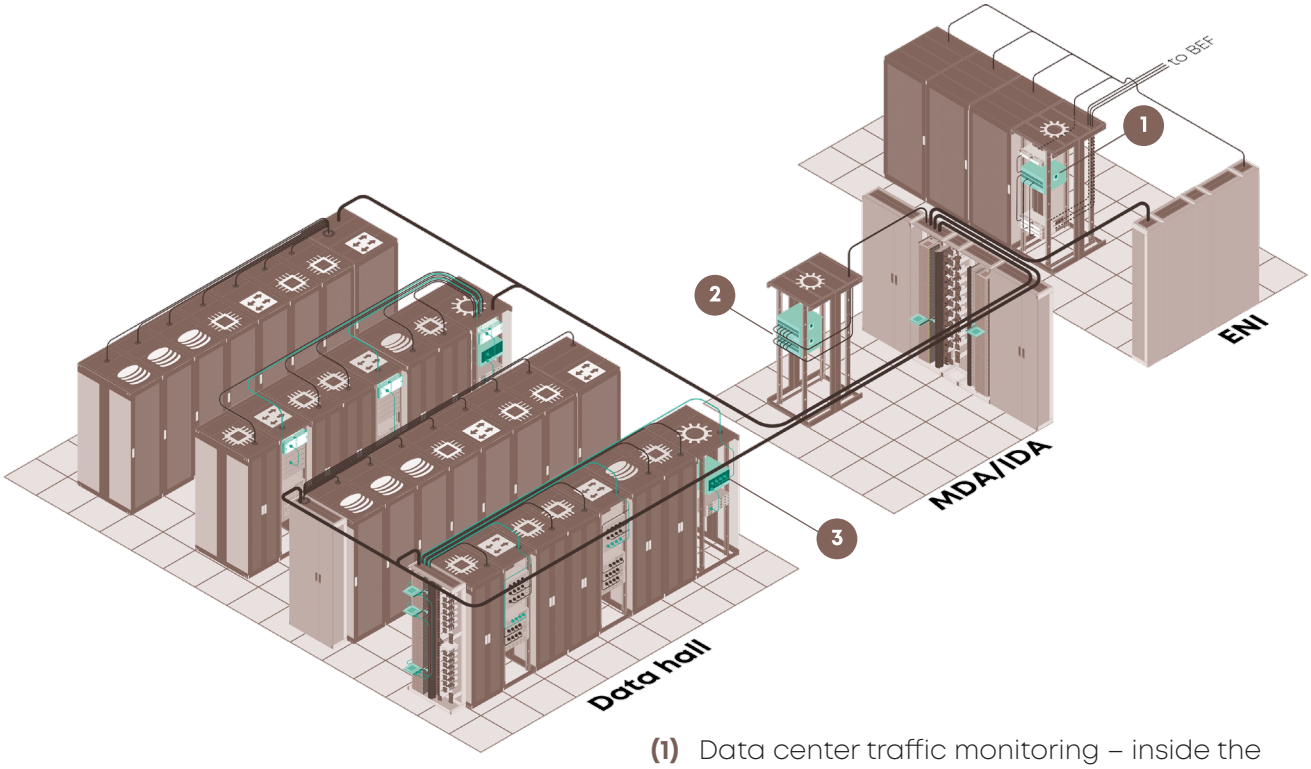

Decide if you want single fiber (LC) or array connectors (12-fiber MTP).

Select OPMs if you want to monitor degradation or loss of signal on the input fibers.

POLATIS – use cases

(1) Data center traffic monitoring – inside the ENI (or meet-me room)

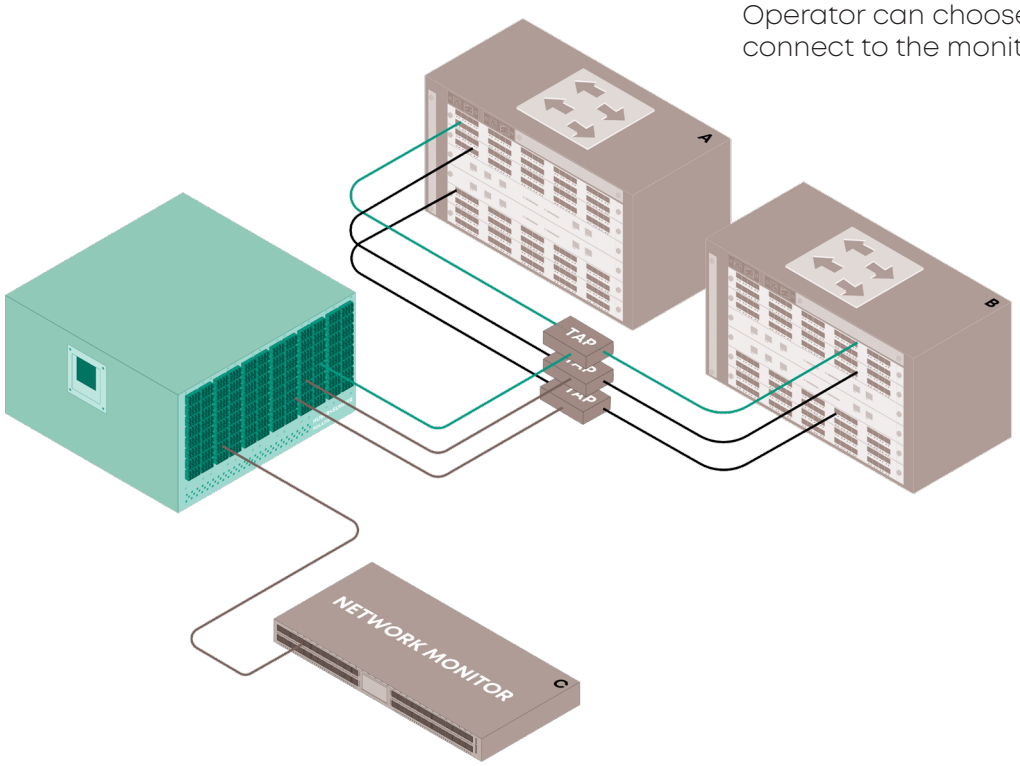

(2) Automated cage-to-cage provisioning – in the MDA/IDA and inside the customer cages in the data hall

(3) Automated fiber testing and protection switching – in the MDA/IDA and inside the customer cages in the data hall

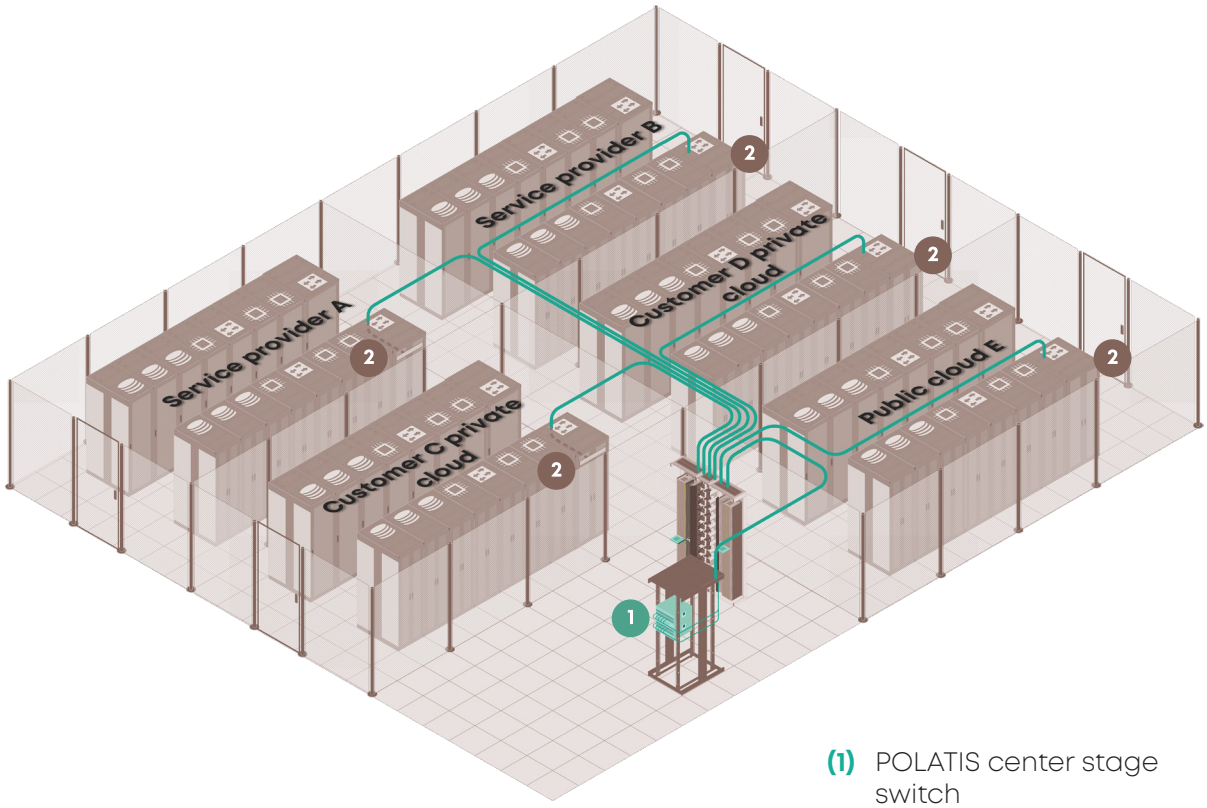

POLATIS data center applications

Data center traffic monitoring

One network monitor (C) can serve multiple links A to B.
Operator can choose which link to connect to the monitor.

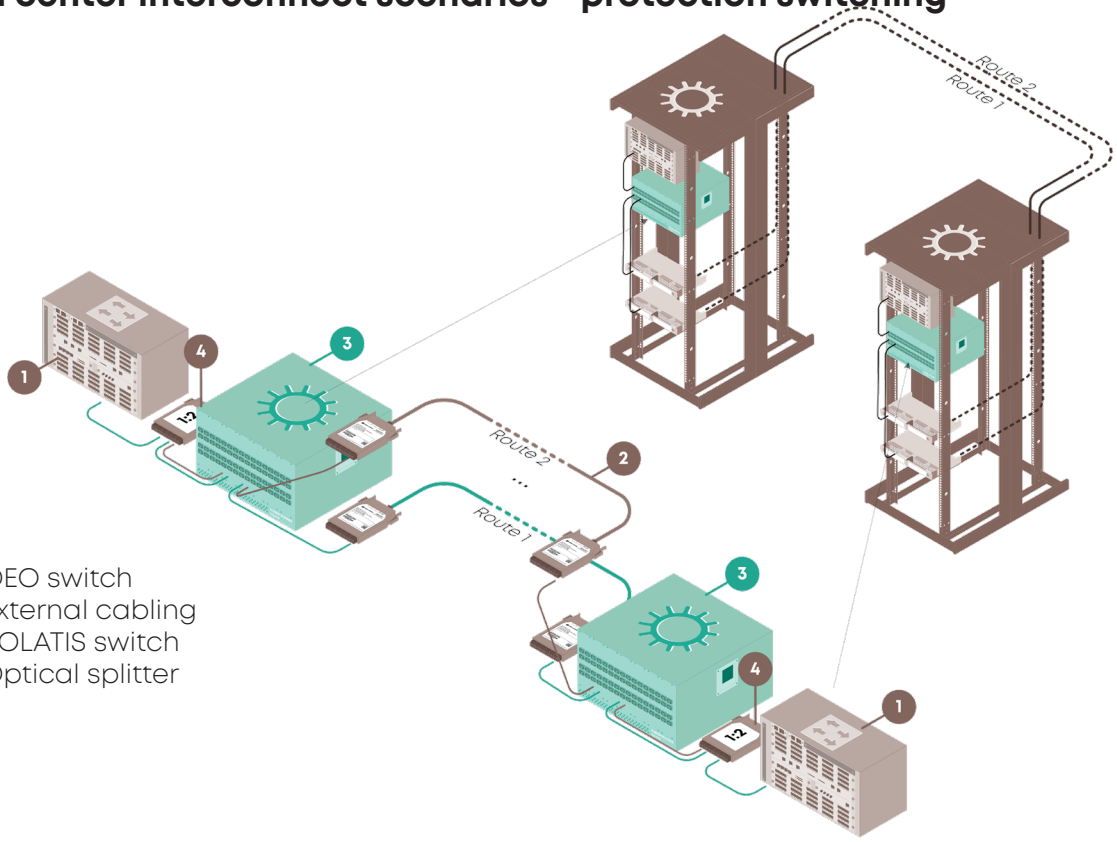

Cage to cage provisioning

Network Cube X - overview

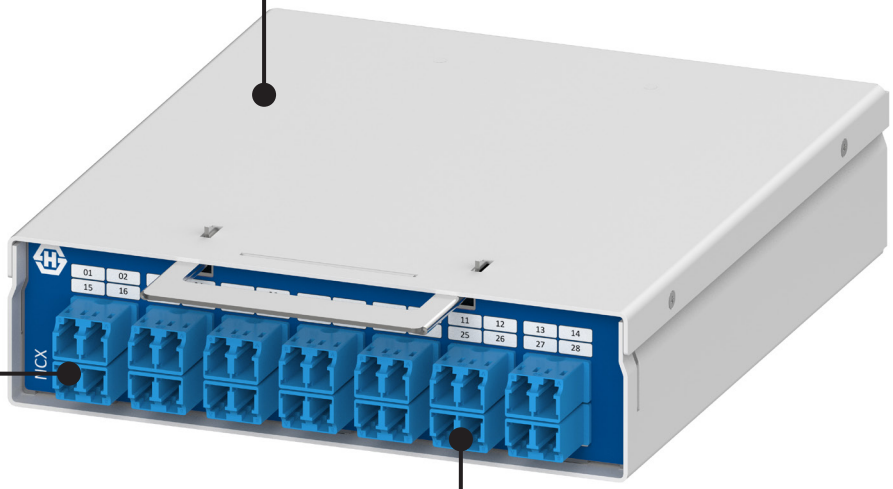

NCX - A range that redefines passive multiplexing

The Network Cube X (NCX) range redefines the passive optical multiplexer by introducing an innovative approach to the upgrade port.
Based on expertise gained from collaborating with customers in countless projects for more than twenty years, the versatile range enables Wavelength-Division Multiplexing (WDM) setups that could previously only be solved by using custom designs.

Modular design

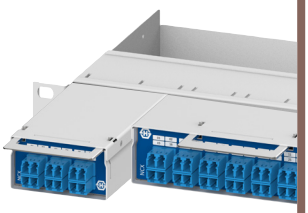

With three standard module sizes, you can choose the most suitable dimensions to minimise the footprint of your setup while meeting your current needs and plans for expansion.

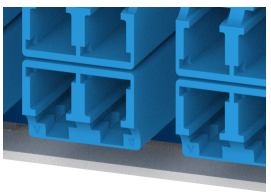

Flexible plug-and-play

The range is equipped with a convenient push-and-pull mechanism that makes installation, moving and removing simple and fast..

Innovative upgrade ports

Three types of application-specific upgrade ports enable you to maximise data transport capacity in line with your system design. And expand it over time.

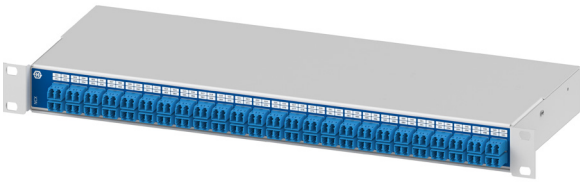

Network Cube X - module types

Mix and match to suit your setup today – and tomorrow

With three standard module sizes, you can choose the most suitable dimensions to minimise the footprint of your setup while meeting your current needs and plans for expansion.

Fixed unit

W 482.6 mm, D 161 mm, H 39 mm

Modules

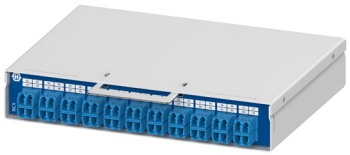

S module
W 71.8 mm, D 161 mm, H 39.25 mm

M module
W 144.3 mm, D 161 mm, H 39.25 mm

L module
W 216.8 mm, D 161 mm, H 39.25 mm

19” NCX shell

The simple auto latching mechanism locks the S, M and L modules in as soon as they have been pushed far enough into the shell. To remove the modules the lever at the top of the individual modules simply has to be pushed down.

Mix and match

The L, M and S modules can be mixed and matched in various combinations, within the 19” NCX shell.

Example packages

The NCX range offers a considerable amount of different options that can be combined to support various applications. The following example packages give an overview of some of our most popular configurations.

GNSS & Power over fiber

GNSS & Power over fiber applications

Single tenant GNSS* connections via fiber structured cabling

(1) Base unit Power over Fiber
(2) Expansion module (Rx)
(3) GNSS antenna + Power over Fiber, L1 + L5
(4) Fiber optic structured cabling

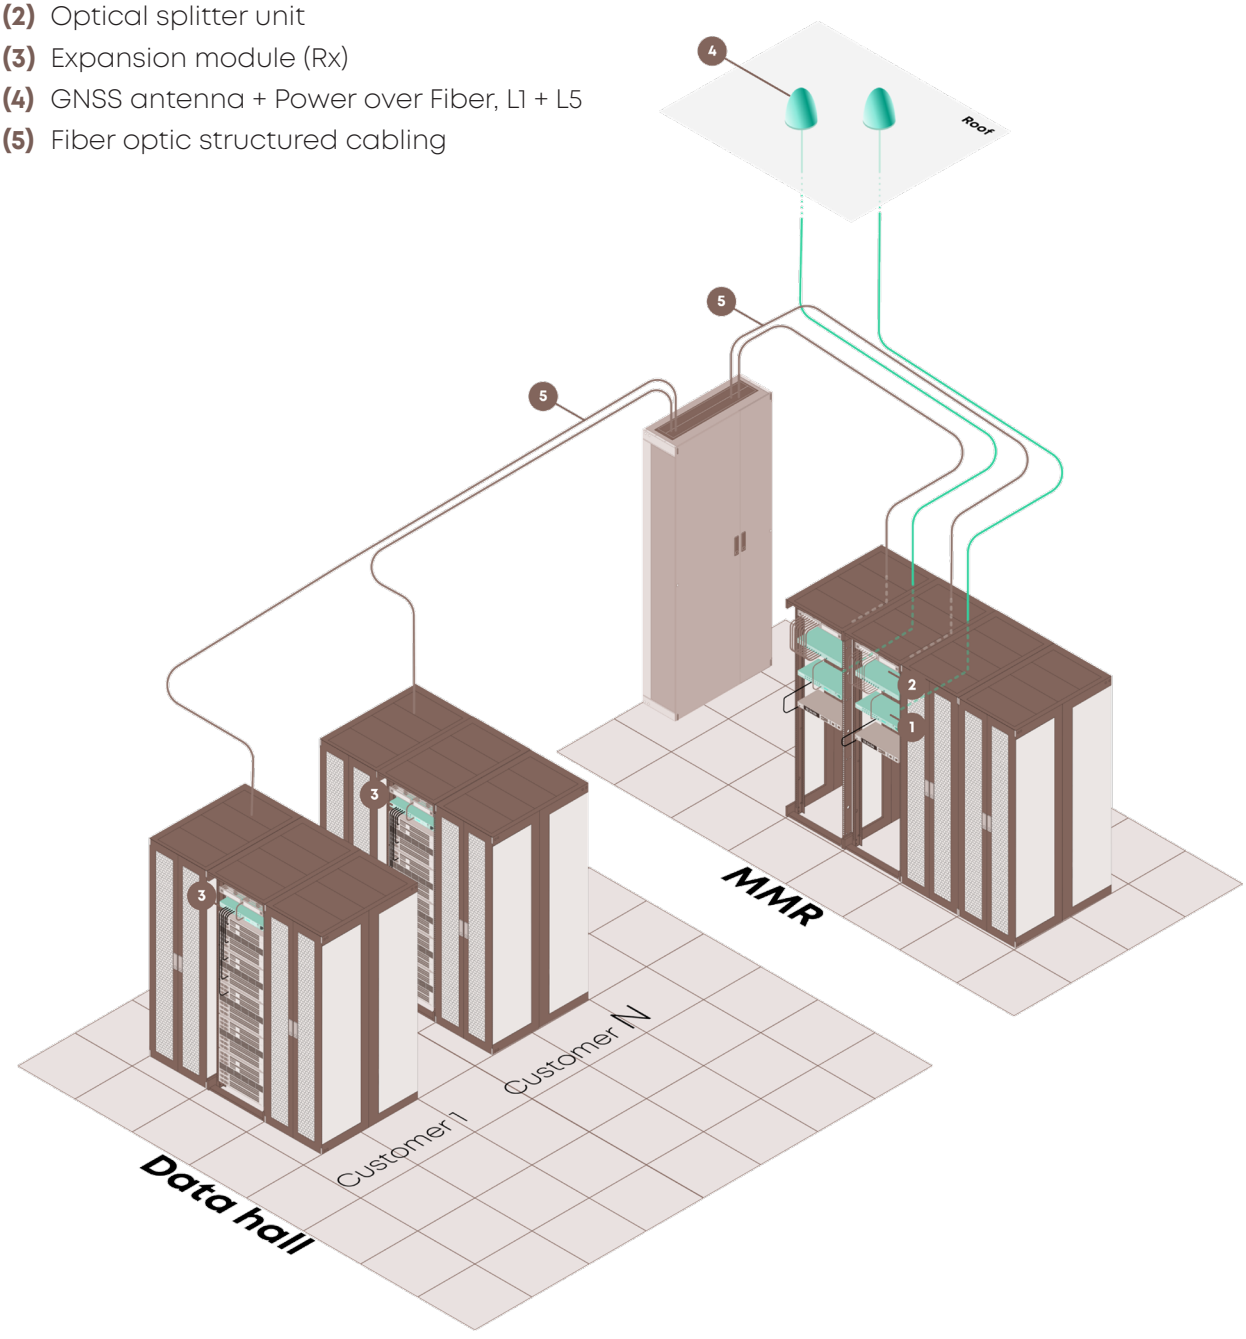

*GNSS— global navigation satellite system. Examples of GNSS: GPS, GLONASS, Galileo

Go to external document/link

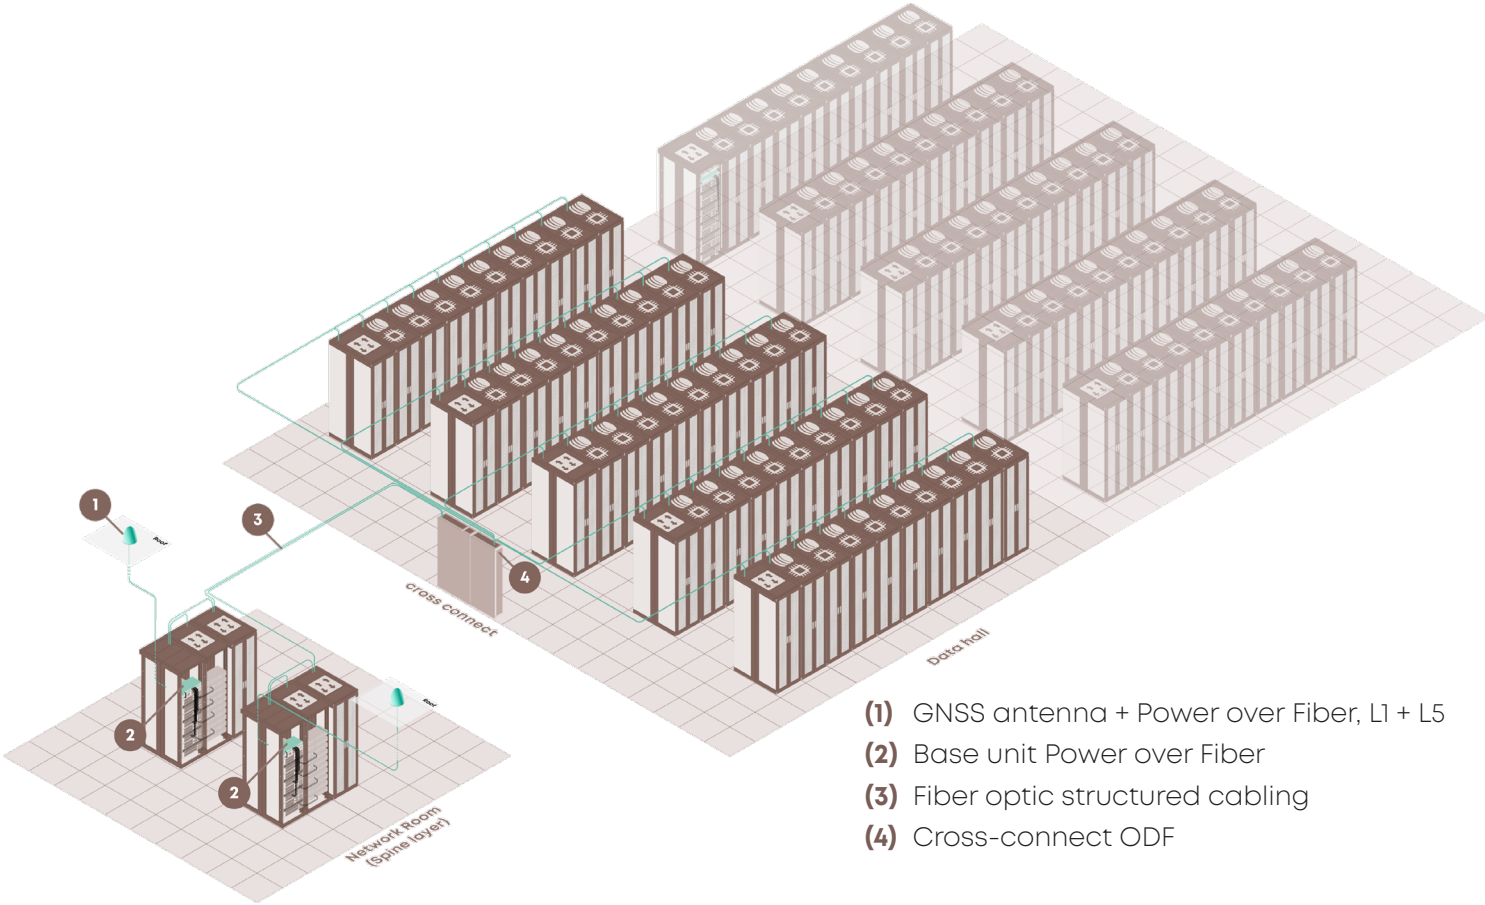

Multiple tenant GNSS connections via fiber structured cabling

(1) Base unit Power over Fiber
(2) Optical splitter unit
(3) Expansion module (Rx)
(4) GNSS antenna + Power over Fiber, L1 + L5
(5) Fiber optic structured cabling

Ordering information

#	Item number	Descriptive code	Item text	LT	URL
1	85238861	P-GNSSPoF16-RxE AC	GNSS Power over fiber reciever(RX), 16RF out & 1FO out, AC		
	85213405	P-GNSSPoF16-RxE DC	GNSS Power over fiber reciever(RX), 16RF out & 1FO out, DC		
2	85227355	O-GNSSPoF0-1-L15	GNSS antenna, power over fiber, L1 + L5, singlemode		
3	85140926	GPSoF32 (RX)	GNSS-over-Fiber receiver (RX) module, (O/E conversion), 2U, 1 LC output & 32 SMA output		
4	85145447	GPSoF16-2 (RX)	GNSS-over-Fiber receiver (RX) modules, (O/E conversion), 2 LC output & 32 SMA output		
5	85128404	GPSoF Amp Expansion Module 32	Direct GNSS-over-Fiber RF expansion modules (RF GNSS Splitters), 1x input / 32x outputs		
6	85154296	GPSoF - OSM (1x8)	GPSoF splitter module 1x8		
7	85152769	Direct GPSoF DC/DC Converter	GPS-over-Fiber power unit		

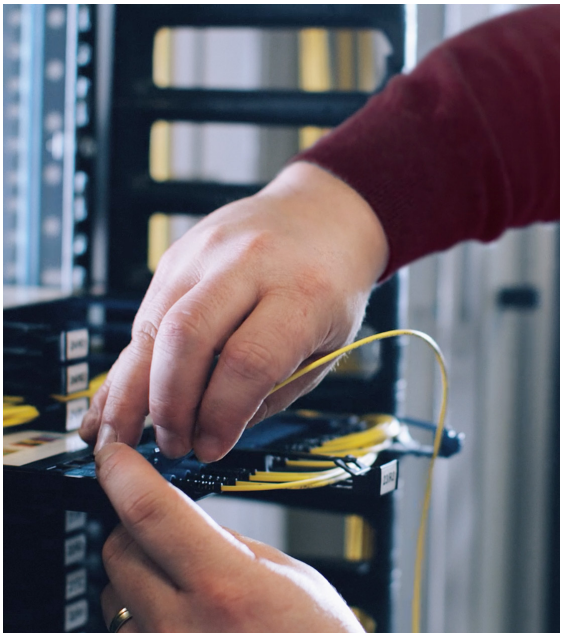

Consultancy services and global support

Find peace of mind by working with a global partner with deep expertise and high attention to detail. Our consultancy services are complimentary and provide a wide range of customisation options to make sure that our solutions fit perfectly with your specific needs.

Expert support
We strive to offer you outstanding support throughout the entire life cycle of your project – from design to installation and measurement. We are a partner that you can depend on, and we offer numerous tools aimed at making it easier and faster for you to get support, including app notes, a design library, an e-shop with order tracking and much more.

Up-to-date training
In order to ensure the efficiency and durability of your equipment, we offer training on the latest techniques and technologies and are always on hand to support you and your team.

About HUBER+SUHNER

We are a leading global supplier of components and systems solutions. With our broad range of products and deep know-how, we serve the industry, communications and transportation markets with applications from the three technologies of radio frequency, fiber optics and low frequency. And as a global company with a presence in over 80 countries, we stay close to our customers. Always.

HUBER+SUHNER AG
Degersheimerstrasse 14
9100 Herisau
