

High voltage power splitter

Designed to solve routing issues

Features

- Standard components enabling modularity
- High configurability
- Semi-pluggable interface
- Compatible with RADOX® portfolio
- Full automotive validation

Benefits

- Easy integration into existing EV equipment
- Efficient cable routing
- Helps to reduce the amount of cables, with less space and decreased weight
- Optimal assembly and system maintenance
- Safe and reliable performance in harsh conditions

USPs

- Short lead-times
- Reduced development time on customer side
- Available for prototypes and serial deliveries
