Company history

Human needs and megatrends shape business focus

Being mobile

Communicating seamlessly

Feeling secure

Urbanisation

- Third places
- Smart city
- Megacity
- Sustainable transport

Eco-intelligence

- Sustainable transport
- Decarbonisation
- Circular economy

Mobility

- E-mobility
- Autonomous driving
- Third places
- Seamless mobility
- Decarbonisation
- 6G

Connectivity

- Artificial intelligence
- Quantum computing
- Business ecosystems
- Autonomous driving
- Omni interaction
- Intelligent automation
- Smart city
- 6G

Knowledge culture

- Open innovation

Security

- Military innovation
- Resilience
- Autonomous driving

Markets and customers

Highly attractive markets across all three segments

Industry

Communication

Transportation

Our solutions in the Industry segment

General Industrial

- Energy
- Process industries
- Medical device
- Quantum computing and cryogenic applications

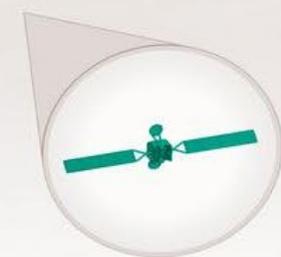

Test & Measurement

- Radio Frequency testing
- Semiconductor testing
- Automated device testing

High Power Charging

- Charging systems – cars
- Megawatt charging systems – trucks

Aerospace & Defense

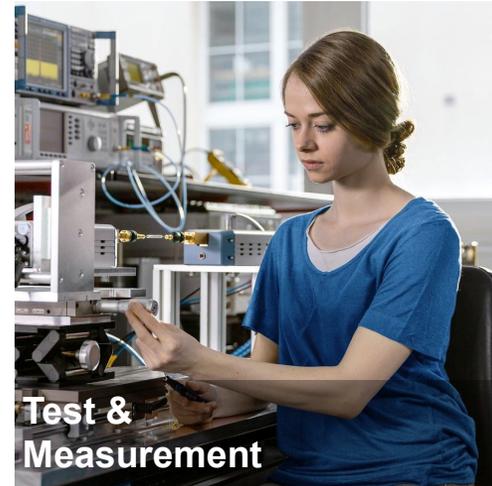

- Space
 - Command, control, communications, computers, cyber, intelligence, surveillance & reconnaissance
 - Airborne
 - Radar & electronic warfare
 - Military vehicles

Industry: Advanced and differentiated solutions

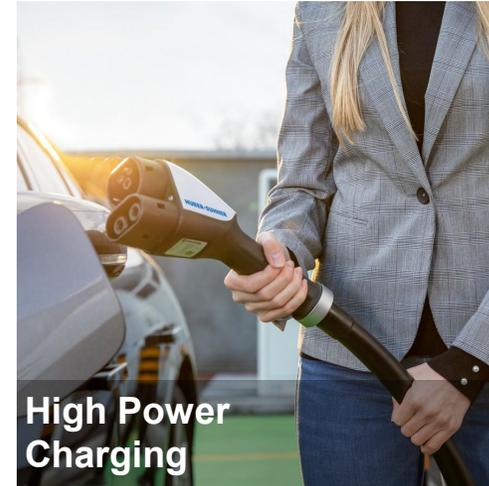

Lifetime data integrity and power transmission for critical applications

Ensuring uncompromised reliability under extreme conditions while at the same time reducing size, costs and weight calls for highly robust connectivity solutions in aerospace and defense.

The functioning of our increasingly high-tech world relies on constant testing and measurement. Reliable performance at high speed, in high frequencies and under all conditions is what our components stand for.

Leading the development of future-proof solutions for high power charging infrastructure builders and station operators to meet the growing demand for safe, efficient and reliable charging of the world's electric vehicles.

Delivering delivers best-in-class connectivity solutions, capable of tackling challenges across energy, medical devices, oil and gas, and other industries such as mining and tunnelling as well as quantum computing.

Our solutions in the Communication segment

Data Center

- Structured cabling
- Bandwidth expansion and transceivers
- Optical circuit switching
- Timing synchronisation

CEM Components

- Radio frequency components
- Fiber optic components
- Optical coupling modules for transceivers

Mobile Network

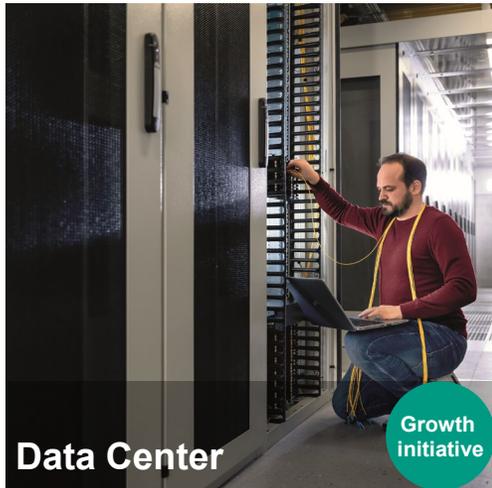

- Timing synchronisation
- Optical circuit switching
- Lab automation
- Harsh environment cabling
- Antenna solutions
- Bandwidth expansion and transceivers

Fixed Access Network

- Outdoor connectivity
- Indoor connectivity
- Bandwidth expansion and transceivers
- Optical circuit switching
- Lab automation
- RF video overlay
- Hybrid Fiber Coax solutions

Communication: Comprehensive connectivity solutions

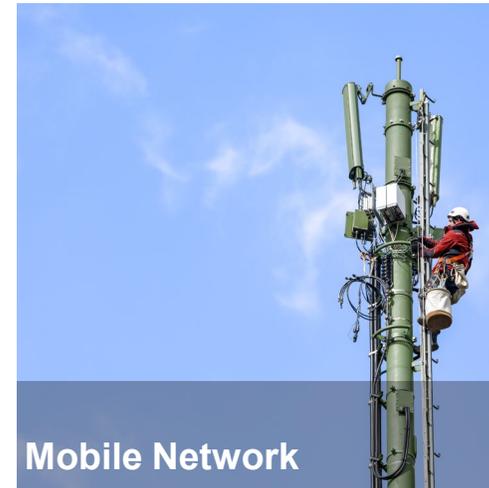

A secure, future-ready physical layer that ensures performance, density and scalability

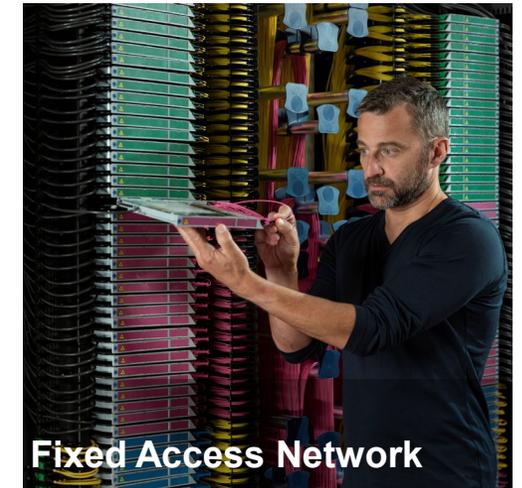

Simplicity is the key to developing compact, easy-to-install and expandable data center solutions in an ever-growing market.

Extending network coverage and capacity at competitive costs and at a fast pace is made possible by partnering with our customers in technology and innovation.

High volumes and increasing cost pressure demand continuous improvements in efficiency. Integrated solutions reduce installation costs and create competitive advantages for our customers.

Bringing high-speed internet into every home is becoming a global commodity. Ensuring the expandability of fiber networks at low costs and with high efficacy is what helps to make this happen.

Our solutions for the Transportation segment

Rail Communications

- Train-to-ground communication
- Ground communication
- Communication-based train control (CBTC)

Rolling Stock

- In-carriage wiring solutions
- Inter-carriage wiring solutions

Advanced Driver Assistance System (ADAS)

- Wireless communication between vehicles
- V2X (vehicle to X)

Electric Vehicle

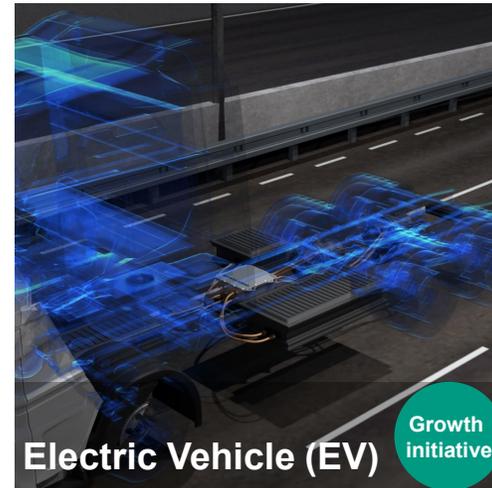

- On-board network wiring
- High-voltage power distribution

Transportation: Sustainable solutions for rail and road mobility

Efficient electrical transmission, high-speed data transfer and autonomous control

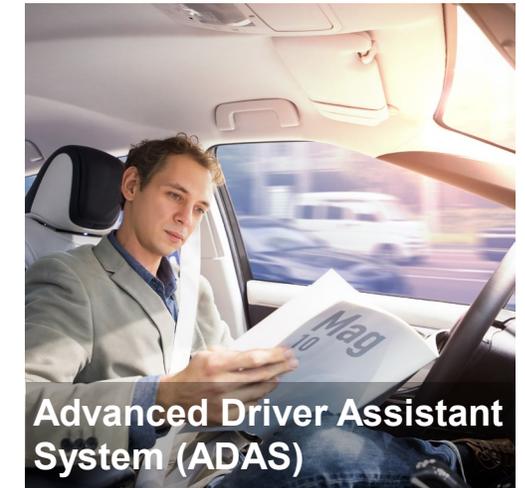

Connectivity solutions in transportation utilise reliable and high-performance communications which ensure operational efficiency, safety and improved passenger experience.

Cutting emissions and making our mobility more sustainable is driving the worldwide need for compact, safe and reliable connectivity systems in electric vehicles.

Rolling stock is now highly complex and requires innovative on-board technologies to efficiently transmit data and power. Our comprehensive connectivity solutions ensure efficiency, reliability, and safety.

Self-driving vehicles are revolutionising the future mobility. High-performing radar systems and high data transmission solutions will ensure safety and offer comfortable driving experience.

Sustainability

Sustainability strategy: responsible ESG practices

Ensuring health and safety:

Occupational accidents with lost time per one million hours worked per year (LTIR): ≤ 3.0

Addressing climate change:

- Scope 1+2 emissions: **-55% by 2030**
- Scope 3 emissions: **-25% by 2030**
- Scope 1, 2 and 3 emissions: **Net zero by 2050**

Lowering intensity of resource use by 2030:

- Energy intensity: **-15%**
- Intensity of waste sent to landfill/incineration: **-25%**

Maintaining a workforce with balanced mix of internal and external career paths:

Ensure that all management and expert positions are filled with a **40–60%** mix of internal and external talent

Fostering a skilled workforce with an agile mindset:

Yearly training hours per employee: $\geq 16h$

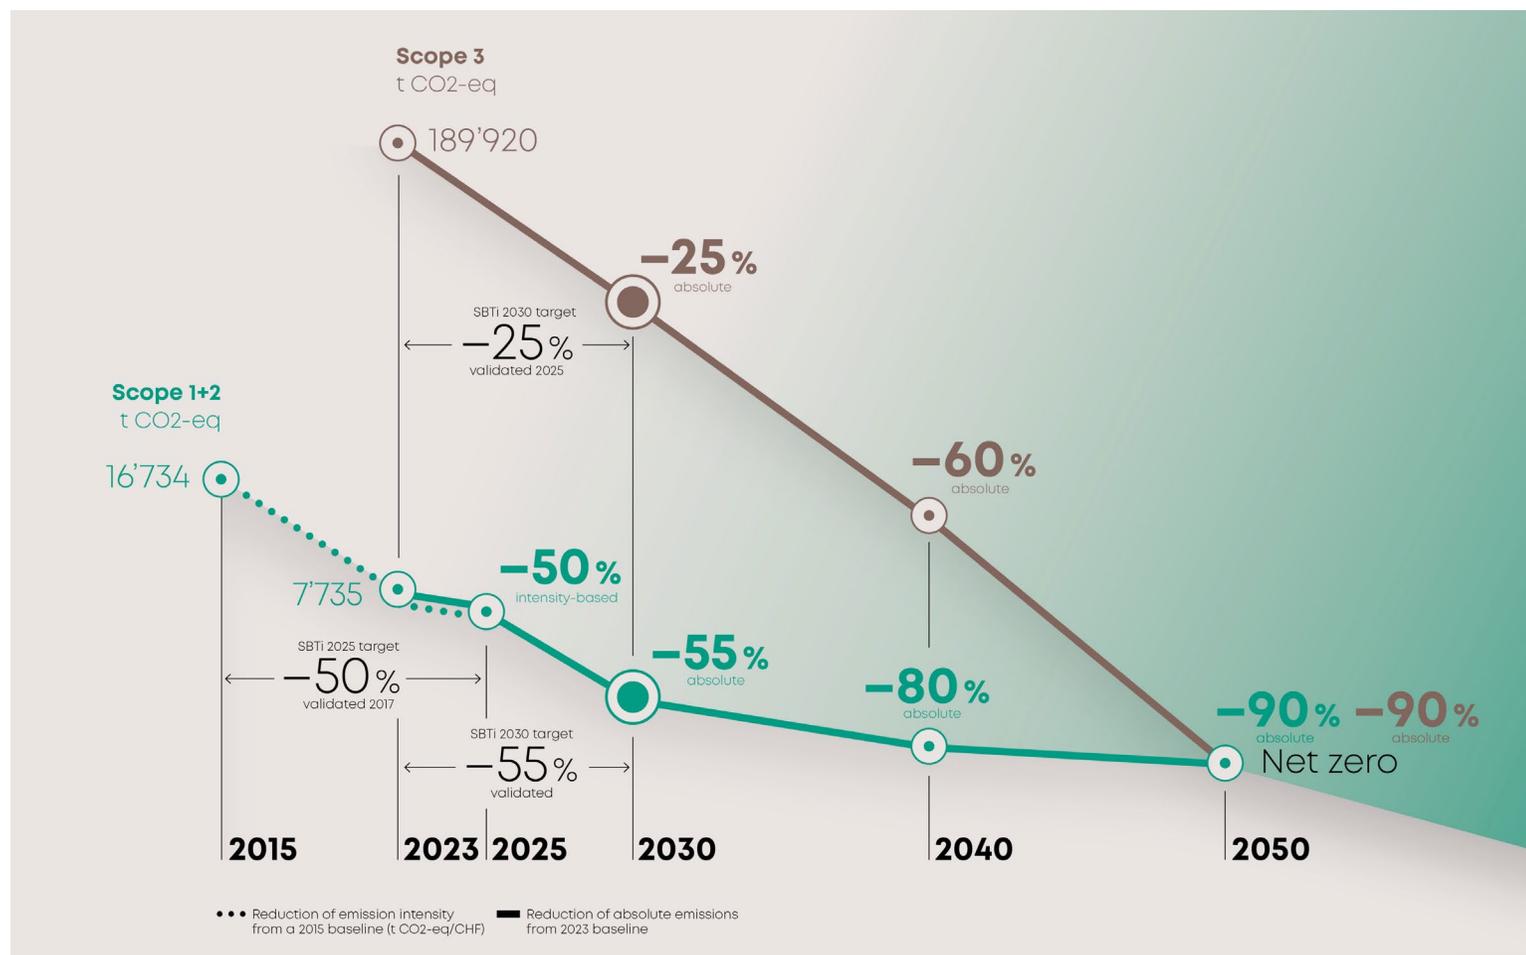

Combating corruption and bribery:

Annual employee online compliance training participation rate: $\geq 95%$

The non-financial reporting 2025 was prepared in reference to the European Union's Corporate Sustainability Reporting Directive (CSRD) and the European Sustainability Reporting Standards' (ESRS) Sector agnostic Set 1. An independent assurance report was performed on selected sustainability disclosures and indicators by Ernst & Young Ltd.

Science Based Target initiative (SBTi)

Greenhouse gas emission goals 2030 and 2050 validated

The near-term SBTi target until 2030 is to reduce absolute emissions in Scope 1+2 by 55% from a 2023 baseline, and by 25% in Scope 3 (emissions that arise in the upstream and downstream value chain). The long-term SBTi target until 2050 is an absolute reduction of 90% of all emissions.

Further information can be found in the [media release](#) and in our [Non-financial Report](#).

Sustainability strategy: progress 2025

	2025	2024	Δ
Scope 1+2 target validated by the SBTi in 2017, reached in 2025 ¹⁾	-	-	-
Scope 1+2 (market-based) in tCO2-eq, Target: -55% by 2030	6'631	6'128	8.3%
Scope 3 in tCO2-eq, Target: -25% by 2030	161'044	209'384	(23.1%)
Intensity waste sent to landfill/incineration in kg as of net revenue Target -25% by 2030	1.7	1.7	1.5% ¹⁾
Energy intensity in MWh as of net revenue, Target: -15% by 2030	61	60	2.7% ¹⁾
LTIR (Occupational accidents with lost time per one million hours worked per year), Target ≤ 3.0	6.0	2.6	3.4
Average training per employee per year in hours, Target ≥ 16	15	17	(12%)
Participation in online compliance training per year in % Target: : ≥ 95%	98%	98%	

1) The scope 1+2 target from 2017, energy intensity and the intensity of waste sent to landfill/incineration were previously calculated relative to added value (VA). Using added value as the reference, we observe a 6.3% decrease in waste sent to landfill/incineration and a 5.2% decrease in energy intensity.

Commitments, disclosures and ratings

HUBER+SUHNER achieved the SBTi validated target from 2017 of -55% for its Scope 1+2 in 2025. At the beginning of January 2025, the Science Based Target initiative (SBTi) validated our greenhouse gas emission reduction targets in Scope 1, 2, and 3 for 2030 and 2050.

Climate change rating 2025: A- (Implementing current best practices). HUBER+SUHNER is among the 22'100 companies worldwide that discloses data about climate change and water via the CDP platform.

With an overall score of 75/100, HUBER+SUHNER achieves a silver medal and is among the top 15% of companies globally among all sectors which participated in the EcoVadis rating.

COMMUNICATION ON PROGRESS

This is our **Communication on Progress** in implementing the Ten Principles of the **United Nations Global Compact** and supporting broader UN goals.

We welcome feedback on its contents.

HUBER+SUHNER AG and its subsidiaries are a signatory of the UN Global Compact since 2020.

The background of the image is a dark blue gradient. It features a complex network of thin, light blue lines that connect various points. These points are represented by small, bright blue circular nodes of varying sizes. Some nodes are larger and more prominent, while others are smaller and less distinct. The overall effect is that of a digital or neural network, with lines crisscrossing the space and nodes acting as hubs or connection points.
