HUBER+SUHNER becomes Tier 1 supplier to leading Chinese electric vehicle manufacturer Geely

HUBER+SUHNER signs a first platform contract with Geely for series production. The scope of supply includes high-voltage connection solutions for application in a platform of the latest Geely electric vehicle generation.

Yesterday, HUBER+SUHNER signed a platform contract with Zhejiang Geely Holding Group Co., Ltd. (Geely) and thus becomes a Tier 1 supplier to one of China's largest private car manufacturers. The cooperation includes the production and delivery of RACS connection systems (RADOX® Automotive Connection System) over the next four years for a first vehicle platform. Start of production was in May 2018.

This step is a breakthrough for HUBER+SUHNER in the implementation of the strategic growth initiative for electric vehicles in the Low Frequency technology segment.

In addition, HUBER+SUHNER was nominated as a supplier for two upcoming platform programs, which will be globally shared with Volvo and Lync & CO brands. Possible further series orders resulting from these nominations are staggered over a period until 2023 and hold significant business potential for the coming years.

The components are manufactured locally at the HUBER+SUHNER production site in Changzhou, China. The RACS connection systems for Geely had been successfully validated over a period of two years. RACS is a wire-to-device system that connects high voltage devices within vehicles in a compact, flexible and robust way. It provides 360 degree electromagnetic shielding, excellent environment protection, high vibration and shock resistance.

HUBER+SUHNER Group

HUBER+SUHNER is a global company with headquarters in Switzerland which develops and manufactures components and system solutions for electrical and optical connectivity. With cables, connectors and systems – developed from the three core technologies of radio frequency, fiber optics and low frequency – the company serves customers in the communication, transportation and industrial sectors. The products deliver high performance, quality, reliability and long life – even under harsh environment conditions. Our global production network, combined with group companies and agencies in over 60 countries, puts HUBER+SUHNER close to its customers. Further information on the company can be found at hubersuhner.com.
