Compliance with Regulation (EU) 2019/1021 on persistent organic pollutants

The objective of this Regulation is to protect human health and the environment from POPs by prohibiting, phasing out as soon as possible, or restricting the manufacturing, placing on the market and use of substances subject to the Stockholm Convention on Persistent Organic Pollutants.

HUBER+SUHNER is a leading global supplier of components and systems for electrical and optical connectivity. Products of HUBER+SUHNER are often directly installed in electrical and electronic equipment. As downstream user HUBER+SUHNER is neither manufacturing chemicals nor placing them on market. HUBER+SUHNER regularly monitors its material data base for compliance with the applicable European material legislation.

HUBER+SUHNER only delivers products that do not contain any substances listed under annexes I, III, and IV of Regulation (EU) 2019/1021.

Best regards,

Oliver Srb
