HUBER+SUHNER cables

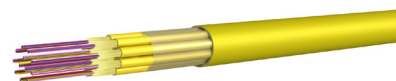

The compatibility of connectors and cable systems is a proven quality with HUBER+SUHNER cables. Accomplishing customer specific requirements, the cables are user and processing friendly.

Product range

HUBER+SUHNER offers dedicated product solutions for market niches and specialised applications. With its extensive expertise and industry knowledge, HUBER+SUHNER can provide solutions that fulfil specific requirements.

Optipack

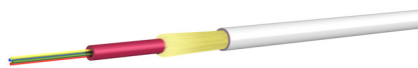

Optipack cables are delivered with CPR-classes B2ca and Cca. These cables come with up to 288 fibers and can be spliced, assembled with MTP® or supplied as a component of a system.

Jelly-free loose tube cables

Jelly-free loose tube cables are CPR-class Cca rated for increased fire protection. They can be delivered with up to 144 fibers with no necessary cleaning efforts due to the completely jelly-free construction.

Fiber in the Home

The HUBER+SUHNER jelly-free micro tubes are CPR-class Dca rated. With up to 4 fibers, they provide an extremely short preparation time for installations.

CPR

HUBER+SUHNER offers a wide range of CPR-classified cables with classifications up to B2ca. The product range is continuously expanded according to new CPR applications.
