

# SC

# Future-proof one-piece design

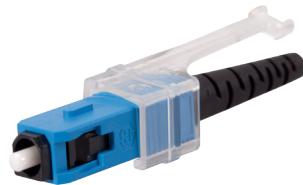

09.2019

## Quick and safe termination

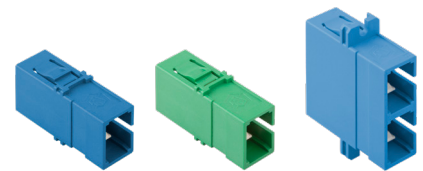

SC is a future-proof one-piece connector with the same simplified termination process as for LC and E-2000™.

## Easy handling

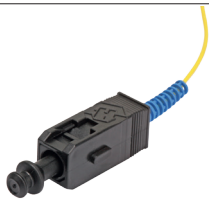

SC is a connector for highest packing density. Its unique clip with extended handle makes the connector ideally suited for high-density environments.

## Highest stability

The one-piece design offers highest stability to ensure best performance.

## Shortest pigtail solution

The BTW pigtail version offers an outstanding bending performance. The combination of the shortest rigid length and the very flexible boot makes the connector suitable for many new applications.

## Availability and global presence

With a global presence in more than 60 countries, HUBER+SUHNER guarantees its customers the fastest availability of products and services as well as best-in-class support.

## Compatibility

The SC connector is fully compliant with IEC 61754-4 and tested according to IEC 61753-1, Telcordia GR-326 and TIA 604-3.
